Clorox Pro Clorox Disinfecting Bio Stain & Odor Remover

ACTIVE INGREDIENT: Hydrogen Peroxide 2.20%
OTHER INGREDIENTS: 97.80%
TOTAL: 100.00%

KEEP OUT OF REACH OF CHILDREN

Disinfecting Bio Stain & Odor Remover

- Removes Blood, Feces, Sweat, Vomit and Urine Stains
- Disinfects Human Immunodeficiency Virus Type 1 (HIV-1), Hepatitis B Virus, Hepatitis C Virus
- Kills Odor-Causing Bacteria on Hard Surfaces
- Kills 99.9% of Bacteria on Fabric and Upholstery

Compliant with OSHA Bloodborne Pathogens Standard

EPA Reg. No. 67619-33
TO REFILL: Remove:
Pour:
Tilt bottle at a downward angle.

TO REFILL: Remove:
trigger sprayer from empty bottle.

Spray 6”–8” from surface until surface is thoroughly wet. Allow this product to penetrate
NONPOROUS SURFACES:
sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact
blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semicritical
container 6”–8” from the surface to be treated and spray area until it is covered with the solution. Allow surface to remain wet for contact time listed on the label.

For Carna Dioform, let stand about 10 minutes. Wipe off with a clean cloth, mop or scrape and thoroughly rinse oil surfaces in the area with a potable water.

Deodorize:
surface.
Spray until fabric is wet. DO NOT SATURATE. Let stand for 3 minutes. Allow to air dry. Reapply as necessary. Gross soil must be removed prior to sanitizing. For first time use
on soft surfaces, spot test a small, inconspicuous area and check with manufacturer care guide before use. 

Homes) or other settings in which there is an expected likelihood of soiling of hard, nonporous surfaces/objects with blood or body fluids, and in which the surfaces/objects
Hepatitis B (Virus) (HBV) and Human Hepatitis C (Virus) (HCV).

Contact Time:
Allow surface to remain wet for 1 minute for HBV and HCV and 30 seconds for HIV-1. The contact times for other bacteria and viruses may differ. See product label for

Disposal of Infectious Materials:
– Place instruments into a suitable container. Spray this product onto instruments to thoroughly wet all surfaces. Let stand for up to 10 minutes. Rinse
brush until visibly clean. Rinse instruments thoroughly. Follow with an appropriate disinfection process. Cleaning of critical and semicritical devices must be followed by an
appropriate terminal disinfection/high-level disinfection process.

Urinals:
Apply product to exposed surfaces above the water line. Allow this product to penetrate and remain wet for the contact time listed on organism table.

VETERINARY APPLICATION:
Use to clean and disinfect hard, nonporous surfaces such as feeding and watering equipment, cages, utensils, instruments, kennels, stables,
facilities occupied or traversed by animals. Empty all feeding and watering equipment. Preclean all surfaces with soap or detergent and rinse with potable water before reuse.

ENVIRONMENTAL HAZARD:
fish and aquatic invertebrates. Caution should be used when applying indoors, because pets may be at risk.

KEEP OUT OF REACH OF CHILDREN
1 QT (32 FL OZ) 946 mL
DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

To Refill: Remove: Empty cap off refill port and pour contents directly into empty bottle. Use Replace cap and use as normally would. Refill only with this product.

CONSUMER BASE: NONPOROUS SURFACES: Spray 6”–8” from surface until surface is thoroughly wet. Allow the product to remain wet for contact time listed on organism table. Wipe off with a dry cloth, mop or sponge and thoroughly rinse all surfaces in the area with potable water. Heavily soiled areas must be pre-cleaned before using this product. Food products and packaging materials must be removed or sanitized properly prior to using this product.

To Disinfect Food Processing Premises (floors, walls and storage areas): Hold container 6”–8” from the surface to be treated and spray areas until it is covered with the solution. Allow surface to remain wet for contact time listed on the label. For Caviar Distemper, let stand for 10 minutes. Wipe off with a dry cloth, mop or sponge and thoroughly rinse all areas of the area with potable water. Heavily soiled areas must be pre-cleaned before using this product. Food products and packaging materials must be removed or sanitized properly prior to using this product.

To Sanitize Urinals: Place instruments into a bactericidal solution of disinfectant. Hold container 6”–8” from the surface to be treated and spray area until it is covered with the solution. Allow surface to remain wet for contact time listed on the label. For Caviar Distemper, let stand for 10 minutes. Wipe off with a dry cloth, mop or sponge and thoroughly rinse all areas of the area with potable water. Heavily soiled areas must be pre-cleaned before using this product. Food products and packaging materials must be removed or sanitized properly prior to using this product.

To Sanitize Soft Surfaces: Spray 6”–8” from surface until surface is thoroughly wet. Allow this product to penetrate and remain wet for the contact time listed on organism table.

To Deodorize: Spray until thoroughly wet. DO NOT SATURATE. Allow to air dry. For heavily soiled areas, a pre-treatment is required.

To Disinfect Food Processing Premises (floors, walls and storage areas): Hold container 6”–8” from the surface to be treated and spray areas until it is covered with the solution. Allow surface to remain wet for contact time listed on the label. For Caviar Distemper, let stand for 10 minutes. Wipe off with a dry cloth, mop or sponge and thoroughly rinse all areas of the area with potable water. Heavily soiled areas must be pre-cleaned before using this product. Food products and packaging materials must be removed or sanitized properly prior to using this product.

To Disinfect Urinals: Place instruments into a bactericidal solution of disinfectant. Hold container 6”–8” from the surface to be treated and spray area until it is covered with the solution. Allow surface to remain wet for contact time listed on the label. For Caviar Distemper, let stand for 10 minutes. Wipe off with a dry cloth, mop or sponge and thoroughly rinse all areas of the area with potable water. Heavily soiled areas must be pre-cleaned before using this product. Food products and packaging materials must be removed or sanitized properly prior to using this product.

To Sanitize Soft Surfaces: Spray 6”–8” from surface until surface is thoroughly wet. Allow this product to penetrate and remain wet for the contact time listed on organism table.

To Deodorize: Spray until thoroughly wet. DO NOT SATURATE. Allow to air dry. For heavily soiled areas, a pre-treatment is required.

To Sanitize Urinals: (1) Spray 6”–8” from surface. Spray until sufficiently wet. DO NOT SATURATE. Let stand for 3 minutes. Allow to air dry. Repeat as necessary. Gearing must be removed prior to sanitize. For first three use on soft surfaces, spot test in a small, inconspicuous area and check with manufacturer's care guide before use.

Special Instructions for Use: This product kills HIV-1, HBV and HCV on surfaces previously soiled with blood or body fluids in healthcare settings associated with AIDS, Human Hepatitis B (Virus) (HBV) and Human Hepatitis C (Virus) (HCV). Special Instructions for Using This Product to Clean and Decontaminate Against HIV-1, HBV and HCV on Surfaces: Solids with Blood or Body Fluids: Personal Protection: When handling items soiled with blood or body fluids, use disposable impermeable gloves, gowns, masks and eye coverings. Contact: Allow surfaces to remain wet for 1 minute for HBV and 5 minutes for HIV-1. The contact times for other bacteria and viruses may vary. See product label for contact times. Disposal of Infectious Materials: Use disposable impermeable gloves, gowns, masks and eye coverings. Gowns and other body fluids must be removed and disposed of according to local regulations for infectious waste disposal. To Deodorize: Spray until thoroughly wet. DO NOT SATURATE. Allow to air dry. For heavily soiled areas, a pre-treatment is required.

To Sanitize Soft Surfaces: Spray 6’’–8’’ from surface until surface is thoroughly wet. Allow this product to penetrate and remain wet for the contact time listed on organism table. For heavily soiled areas, pre-treatment is required.

To Clean and Disinfect in a Veterinary Application: Use to clean and disinfect hard, nonporous surfaces such as feeding and watering equipment, public areas and areas frequented by animals. Emptiy all feeding and watering equipment. Preclean all surfaces with soap and detergent and rinse with water. Saturate surfaces with this product and let stand for 5 minutes. Ventilate buildings and all closed areas. Do not leave animals or equipment unpainted until treated surfaces have been thoroughly rinsed with water and allowed to dry. Thoroughly scrub all feeding, feeding and watering appliances with soap or detergent, and rinse with potable water before reuse.

Environmental Hazards: This pesticide is toxic to birds, fish and aquatic invertebrates. Caution should be used when applying indoors, because pets may be at risk. Before applying this product, read the label carefully. Dispose of all washed or rinsed items in a waste stream. Pet owners and their veterinarians should follow safety precautions and cleaning instructions.
Disinfecting Bio Stain & Odor Remover

- Removes Blood, Feces, Sweat, Vomit and Urine Stains
- Disinfects Human Immunodeficiency Virus Type 1 (HIV-1), Hepatitis B Virus, Hepatitis C Virus
- Kills Odor-Causing Bacteria on Hard Surfaces
- Kills 99.9% of Bacteria on Fabric and Upholstery

KEEP OUT OF REACH OF CHILDREN

1 GAL (128 FL OZ) 3.78 L

ACTIVE INGREDIENT: Hydrogen Peroxide: 2.20%
OTHER INGREDIENTS: 97.80%
TOTAL: 100.00%

Compliant with OSHA Bloodborne Pathogens Standard
TO CLEAN AND DISINFECT IN A VETERINARY APPLICATION: Remove all animals and feed from premises, animal transportation vehicles, crates, etc. Remove all litter, droppings and manure from walls, floors and surfaces of facilities. Preclean all surfaces with soap or detergent and rinse with water. Saturate surfaces with this product and let stand for 10 minutes. Remove all feeding and watering equipment. Preclean all surfaces with soap or detergent and rinse with water. Saturate surfaces with this product and let stand for 10 minutes. Rinse with potable water for food-contact surfaces. For all others, no rinsing is required. This product must be used as a terminal desiccant high-level disinfectant on any surface or equipment that is in intimate contact with the human body, either in or out of contact with the disinfectant. Avoid damage to surfaces of the body or (2) contacts intact mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preserve or disinfect medical devices prior to sterilization or high-level disinfection.

TO DISINFECT FOOD PROCESSING PREMISES (Floors, walls and storage areas): Hold container 6”–8” from the surface to be treated and spray area until it is covered with the solution. Allow solution to remain wet for contact time stated on the label. For Canine Distemper, let stand for 10 minutes. Wipe off with a clean cloth, mop or sponge and thoroughly rinse all surfaces in the area with potable water. Heavily soiled areas must be precleaned before using this product. Food products and packaging materials must be removed or carefully protected prior to using this product.

TO DISINFECT TOILETS AND URINALS: Spray until surface is thoroughly wet. DO NOT SATURATE. Allow to air dry. For heavily soiled areas, a precleaning is required.

TO SANITIZE GLOVES: Sprays will thoroughly wet. DO NOT SATURATE. Allow to air dry. For heavily soiled areas, a precleaning is required.

ENVIRONMENTAL HAZARD: This pesticide is toxic to birds, fish and aquatic invertebrates. Caution should be used when applying indoors, because pets may be at risk.

TO DISINFECT CRITICAL AND SEMICRITICAL MEDICAL INSTRUMENTS: To thoroughly wet all surfaces. Let stand for up to 10 minutes. Remove all blood and other body fluids from instruments using a stiff-bristle brush until visibly clean. Rinse instruments thoroughly. Follow with an appropriate disinfection process. Cleaning of critical and semicritical devices must be followed by an appropriate terminal sterilization high-level disinfection process.

TO PRECLEAN INSTRUMENTS PRIOR TO TERMINAL STERILIZATION/HIGH-LEVEL DISINFECTION: As a precleaning spray – Place instruments into a suitable container. Spray this product onto instruments to thoroughly wet all surfaces. Let stand for up to 10 minutes. Remove all blood and other body fluids from instruments using a stiff-bristle brush until visibly clean. Rinse instruments thoroughly. Follow with an appropriate disinfection process. Cleaning of critical and semicritical devices must be followed by an appropriate terminal sterilization high-level disinfection process.

TO DEODORIZE: Spray until surface is thoroughly wet. Allow to air dry. For heavily soiled areas, a precleaning is required.

TO CLEAN AND DISINFECT IN A VETERINARY APPLICATION: Use to clean and disinfect hard, nonporous surfaces such as feeding and watering equipment, cages, isolators, instruments, feeders, tables, cots, etc. Remove all animals and feed from premises, animal transportation vehicles, crates, etc. Remove litter, droppings and manure from walls, floors and surfaces of facilities using a forceful brush or invertebrates. Caution should be used when applying indoors, because pets may be at risk.

STORAGE AND DISPOSAL: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. Never contaminate. Do not re-use or refill empty container. Do not empty containers or discard trash, or parts of packaging.

ORGANISMS

Bacteria
- Escherichia coli
- Klebsiella pneumoniae
- Staphylococcus aureus
- Staphylococcus epidermidis
- Proteus mirabilis
- Pseudomonas aeruginosa
- Enterobacter cloacae
- Aeromonas hydrophila

Viruses
- HIV-1
- HBV
- HCV
- Influenza A Virus (H1N1) (Strain A/PR/8/34)
- Rhinovirus (Type 37)
- Influenza A Virus (H1N1) (Strain A/PR/8/34)
- Herpes Simplex Virus Type 1
- Herpes Simplex Virus Type 2

Soft Surface Sanitization:
- 3-minute contact time
- 5-minute contact time
- 10-minute contact time
- 30-second contact time
