FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

NorthStar® Herbicide
For Weed Control in Seedling Stands of Kentucky Bluegrass Grown for Seed Production Only

EPA Reg. No. 100-923
EPA SLN No. OR-190013

This label valid until December 31, 2024 or until otherwise amended, withdrawn, cancelled, or suspended.

Active Ingredient:
Primisulfuron-methyl: 3-[4,6-Bis(difluoromethoxy)-pyrimidin-2-yl]-1-(2-methoxycarbonyl-phenylsulfonyl) urea .............................................................. 7.5%
Sodium salt of dicamba (3,6-dichloro-o-anisic acid*) ...................................................... 43.9%
Other Ingredients: ......................................................................................................... 48.6%
Total: ................................................................................................................................ 100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

SYNGENTA’S SPECIAL CONDITIONS, RISKS OF USE AND DISCLAIMER FOR USE OF NORTHSTAR HERBICIDE ON CROPS ON THIS 24(c) LABEL

IMPORTANT- READ BEFORE USE
THESE CONDITIONS RISKS OF USE AND DISCLAIMER ARE REQUIRED BY SYNGENTA CROP PROTECTION LLC AND NOT SPECIFIED BY U.S. EPA OR THE OF STATE OF OREGON

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SYNGENTA CROP PROTECTION, LLC INTENDS THAT THE PRODUCT THAT IS THE SUBJECT OF THIS SECTION 24(c) LABEL BE PURCHASED ONLY BY END USERS WHO AGREE BY ELECTRONIC SIGNATURE ON SYNGENTA CROP PROTECTION’S INTERNET SITE TO THE TERMS AND CONDITIONS REQUIRED BY SYNGENTA CROP PROTECTION, LLC INCLUDING A WAIVER AND RELEASE FROM ALL LIABILITY AND INDEMNIFICATION BY THE USER AND/OR GROWER OF SYNGENTA AND OTHERS FOR FAILURE TO PERFORM AND FOR CROP INJURY, CROP YIELD REDUCTION, AND/OR CROP LOSS FROM USE OF NORTHSTAR HERBICIDE ON CROPS ON THIS 24(c) LABEL. IF SUCH TERMS AND CONDITIONS ARE UNACCEPTABLE, RETURN THE NORTHSTAR HERBICIDE AT ONCE UNOPENED OR USE
THE NORTHSTAR HERBICIDE FOR A DIFFERENT APPROVED USE IN ACCORDANCE WITH THE LABEL AFFIXED TO THE PRODUCT CONTAINER.

USE OF NORTHSTAR HERBICIDE (THE “PRODUCT”) ON CROPS LISTED (THE “CROP”) FOR THIS SPECIAL LOCAL NEED MAY RESULT IN CROP INJURY, CROP YIELD REDUCTION AND/OR CROP LOSS AS FURTHER DISCUSSED BELOW. READ AND UNDERSTAND THESE CONDITIONS AND RISKS OF USE FOR SPECIAL LOCAL NEED BEFORE USING THE PRODUCT ON THE CROP. SYNGENTA RECOMMENDS THAT THE USER TEST THIS PRODUCT TO DETERMINE ITS SUITABILITY FOR SUCH INTENDED USE.

Syngenta Crop Protection, LLC makes the Product available for use in the manner described in this Section 24(c) Labeling on the basis that, in the sole opinion of the user, the benefits and utility derived from the use of the Product on the Crop outweigh the potential risk of Crop injury, Crop yield reduction or Crop loss.

The decision to use this Product in the manner described in this Section 24(c) Labeling must be made by each individual user on the basis of anticipated benefits versus (i) the potential risk of Crop injury, Crop yield reduction and Crop loss, (ii) the severity of the target pest infestation, (iii) the cost and availability of alternative pest controls and (iv) any other relevant factors. Syngenta recommends that the user test this Product to determine its suitability for such intended use.

By purchasing the Product for use, or using the Product in the manner described in this Section 24(c) Labeling, you acknowledge and accept that, to the extent consistent with applicable law:

1) you assume all risk of Crop injury, Crop yield reduction and Crop loss;

2) Syngenta Crop Protection, LLC do not make, and do not authorize any agent or representative to make, any representations or recommendations regarding the use of this Product on the Crop other than the statements on this Section 24(c) labeling;

3) Syngenta Crop Protection, LLC do not make, and do not authorize any agent or representative to make, any warranties, express or implied, with respect to the use of the Product on the Crop and disclaim all warranties, expressed or implied, including any implied warranty of merchantability;

4) Syngenta Crop Protection, LLC disclaim all liability for any damages, losses, expenses, claims or causes of actions arising out of or relating to Crop injury, Crop yield reduction and/or Crop loss;

5) these conditions and Risks of Use for Special Local Need supersede any contrary representations or recommendations by Syngenta Crop Protection, LLC or their respective agents or representatives, and any provisions in or on any Product literature or labeling including any provisions on the label affixed to the Product container.

If these Conditions and Risks of Use for Special Local Need are not acceptable, the unopened Product may be returned to the seller for a refund or used for a different labeled use in accordance with the label affixed to the Product container.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR WEED CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.
Environmental Hazards
Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

Groundwater Advisory
Dicamba has been identified in groundwater sampling under vulnerable conditions. There is the possibility that the dicamba in NorthStar may leach through soil to groundwater, especially where soils are coarse and groundwater is near the surface. Consult with the pesticide state lead agency or local agricultural agencies for information regarding soil permeability and aquifer vulnerability in your area.

DIRECTIONS FOR USE
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This Section 24(c) label and the federal label for this product must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, and precautions on this 24(c) label and the main EPA-registered label for NorthStar Herbicide, EPA Reg. No. 100-923.

Cleaning Equipment after NorthStar Application
Because many crops are extremely sensitive to low rates of NorthStar, special attention must be given to cleaning equipment before spraying a crop other than Kentucky bluegrass. Mix only as much spray solution as needed. Immediately after spraying, clean equipment thoroughly using this procedure.
1. Prepare a tank cleaning solution of 1 gal of household ammonia per 25 gal of water. Use sufficient cleaning solution to thoroughly rinse all surfaces.
2. When available, use a pressure rinser to clean the inside of the spray tank with this solution. Start agitation in the sprayer and thoroughly recirculate the cleaning solution for at least 15 minutes. All visible deposits must be removed from the spraying system.
3. Dispose of rinsate in an appropriate manner. Spray the cleaning solution on untreated Kentucky bluegrass, or return to a rinsate tank for later use as makeup water for spraying Kentucky bluegrass.
4. Repeat steps 1-3.
5. Remove nozzles and screens and clean separately after completing the above procedures to avoid injury to crops sprayed after the NorthStar/Kentucky bluegrass application.

Seedling Stands of Kentucky Bluegrass (*Poa pratensis*) Grown for Seed Production
NorthStar can be applied postemergence to bluegrass with at least one tiller but prior to jointing in the year of establishment for control of emerged weeds such as quackgrass, windgrass, partial control of cheat and downy brome. NorthStar applications should be made to actively growing weeds. Kentucky bluegrass should be growing vigorously under favorable growing conditions.

Apply NorthStar at 5.0 oz/A. Application should be a broadcast spray with ground equipment. Refer to the EPA-registered NorthStar label for mixing instructions, recommended spray volumes, and additive requirements. In general, a crop oil concentrate is the preferred additive when NorthStar is applied alone for weed control in Kentucky bluegrass grown for seed. Tank-mixing NorthStar with other herbicides is not recommended because of limited tank-mix testing to date; however, if NorthStar is tank mixed with other products, the use of a nonionic surfactant instead of crop oil concentrate is recommended, to reduce the risk of crop injury from certain mixtures.
Syngenta will not be responsible for crop injury from tank mixtures of NorthStar with other herbicides applied to spring or fall-planted seedlings of Kentucky bluegrass. In addition, do not apply NorthStar in tank mixture with, nor within 10 days before or 10 days after the application of, any organophosphate insecticide.

Restrictions/Precautions:

- Apply NorthStar only in the year of establishment.
- **DO NOT** treat new seedings of Kentucky bluegrass with NorthStar if the plants have less than one well established tiller and are not in good vigor and growing condition. Applications can be made in the spring or fall, when the target weeds are in the recommended size range, and both the bluegrass and weeds are actively growing.
- **DO NOT** apply NorthStar when the bluegrass is stressed due to drought, excessive heat, frost, flooding, poor fertility, diseases, insects, or other reason. Early applications to actively growing weeds and bluegrass give the best results.
- **DO NOT** irrigate within 4 hours after a NorthStar application.
- **DO NOT** graze NorthStar-treated Kentucky bluegrass fields within 90 days of application.
- **DO NOT** harvest within 60 days of application.
- **Chemigation:** **DO NOT** apply this product through any type of irrigation system.
- The total amount of NorthStar applied during one crop season must not exceed 7.6 oz/A.
- Stunting of bluegrass plants may occur following application and, in some instances, seed yields may be adversely affected.
