**PRECAUTIONARY STATEMENTS**

**Hazard To Humans And Domestic Animals**

DANGERS: WEEVIL-CIDE® Tablets or dust may be fatal if swallowed. Do not get in eye, on skin, or on clothing. Do not eat or smoke while handling aluminum phosphide fumigants. When a sealed container is opened, allowing moisture to contact with moisture, water or acids, toxic phosphine gas will be released and gas production will continue, for appropriate monitoring procedures, refer to section on Industrial Hygiene Monitoring in the Applicator's Manual. Pure phosphine gas is a colorless gas with a distinct odor. When inhaled, phosphine gas is absorbed into the bloodstream. Phosphine is a highly toxic gas, and death may occur very quickly. The gas is odorless, colorless, and tasteless. In certain circumstances, the absence of a garlic odor does not mean that phosphine gas is absent. Observe proper application, safety, and spray down procedures prior to opening of any container of a phosphine product.

**ENVIRONMENTAL HAZARDS**

This product is flammable. Non-target organics exposed to phosphine in burnout will be killed. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Do not contaminate water by clearing of riparian zones where phosphine gas and liquid phosphine would be discharged. Use only as directed in the Applicator's Manual. Physical and Chemical Hazards Aluminum phosphide WEEVIL-CIDE® Tablets and partially spent dust will release phosphine gas. If released to the atmosphere, aluminum phosphide WEEVIL-CIDE® Tablets or dust may be fatal if inhaled at high concentrations. If released to the atmosphere, aluminum phosphide WEEVIL-CIDE® Tablets or dust may be fatal if inhaled at high concentrations. Aluminum phosphide WEEVIL-CIDE® Tablets and partially spent dust may release phosphine gas if exposed to moisture. Electrical equipment should be protected or removed before fumigation. Phosphine will also react with certain metals and cause corrosion, especially at higher temperatures and relative humidities. Metals such as copper, brass and other copper alloys, and precious metals such as gold and silver are susceptible to corrosion by phosphine. Thus, small electric motors, smoke detectors, brass sprinkler heads, batteries and battery chargers, furnaces, temperature monitoring systems, vending machines, communication devices, computers and other electrical equipment should be protected or removed before fumigation. Phosphine will also react with certain metallic salts and these reactions are accelerated by moisture. Gas will form at the point of contact. Gas will not readily diffuse. It is therefore essential to protect electrical equipment from phosphine. When using electrical equipment, some minor ignition, ignition source, etc., should not be exposed to phosphine gas.

**USAGE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is for use against listed insects which infest stored commodities and control of burrowing pests. THE USE OF THIS PRODUCT IS RESTRICTED USE PESTICIDE DUE TO ACUTE INHALATION TOXICITY OF PHOSPHINE GAS. THE COMPLETE LABEL FOR THIS PRODUCT CONSISTS OF THE CONTAINER LABEL AND APPLICATOR'S MANUAL. Read and understand this label. USE ONLY AS DIRECTED.

**FOR CHEMICAL EMERGENCY: SPILL, LEAK, FIRE EXPOSURE, OR ACCIDENT, CALL CHEMTREC 1-800-424-9300.**

Toxicity: aluminum phosphide WEEVIL-CIDE Tablets react with moisture from the air, water, acids, and many other substances to form phosphine gas which is highly toxic. USE PRACTICAL SAFETY PRECAUTIONS. The effects of overexposure get medical attention immediately. CHEMTREC can be reached at 1-800-424-9300.

Toxicity: aluminum phosphide WEEVIL-CIDE Tablets OR DUST WILL BE A GRAYISH-BROWN COLOR.

**RESTRICTED USE PESTICIDE**
