Supplemental Labeling

EPA Reg. No.: 279-3158

This supplemental label expires 12/10/2021 and must not be used or distributed after this date.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA REGISTERED LABEL ARE TO BE FOLLOWED.

This Supplemental labeling must be in the possession of the user at the time of pesticide application. Read the label affixed to the container for Command® 3ME Microencapsulated Herbicide before applying. Use of this product according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Command 3 ME Microencapsulated Herbicide.

RAPESEED (Canola)

Command 3ME Microencapsulated Herbicide may be applied as a soil applied broadcast treatment after seeding and prior to crop and weed emergence for control or suppression of annual grass and broadleaf weeds in rapeseed (canola). For a list of weeds controlled or suppressed, refer to the Weeds Controlled table in the Vegetable Crops section on the full product label.

Apply 21.3 fluid ounces of Command 3ME Microencapsulated Herbicide (0.5 lb. ai clomazone) in a minimum spray volume of 10 gallons of water per treated acre.

NOTE: Prior to use, refer to the full product label for the Directions sections for vegetable crops.

RESTRICTIONS

Do not apply more than 21.3 fluid ounces Command 3ME Microencapsulated Herbicide (0.5 lb. ai clomazone) per acre per application.
Do not make more than one application to rapeseed (canola) per year.
Do not apply more than 21.3 fluid ounces Command 3ME Microencapsulated Herbicide (0.5 lb. ai clomazone) per acre per year.
Do not apply within 90 days of harvest of rapeseed (canola).
