This product cleans and disinfects in one easy step.

Handles daily clean-ups with no need for additional sprays, sponges or buckets.

Use this product on washable hard, nonporous surfaces: toilet seats, glazed tiles, sinks, shower stalls, walls, light switches, door knobs, telephones, garbage cans, counters, kitchen countertops and tables.

Kills Mold & Mildew

Antibacterial and Virucidal*

To Open Package: Slowly peel back the label. Pull out wipe as needed. To retain moisture, reseal pouch by firmly pressing seal back on the pouch.

For use in: Homes, Kitchens, Bathrooms, Medical and Dental Offices, Nursing Homes, Day Care Centers, Health Clubs, Schools, Hotels, Cafeterias and Institutional Facilities.

Directions for Use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not use as a diaper wipe or for personal cleansing. This is not a baby wipe! Do not flush in toilet. For plastic and painted surfaces, spot test on an inconspicuous area before use. This product will not harm most surfaces: including acrylic, sealed fiberglass and vinyl.

To Clean and Disinfect/ Virucidal*/Mold and Mildew Control Directions:

Wipe hard, nonporous surface with wipe until surface is visibly wet. Allow surface to remain wet for 4 minutes. For Norwalk Virus, Norovirus, and Rotavirus, treated surfaces must remain wet for 10 minutes. Let air dry. If surfaces are extremely dirty, clean first with another wipe before disinfecting. Discard used wipe in trash. Do not flush. Rinse food contact surfaces with clean, potable water after disinfecting. Do not use to disinfect dishes, glassware or utensils.

For mold and mildew, this product will effectively inhibit the growth of mold and mildew and the odors caused by them when applied to hard, nonporous surfaces. Follow disinfection instructions. Repeat treatment every seven days, or more often if new growth appears.

Sanitizing, Deodorizing:

To sanitize, deodorize hard nonporous, non-food contact surfaces; wipe surface, using enough wipes to allow treated surface to remain wet for 15 seconds for Staphylococcus aureus (Staph) (ATCC 6538), Klebsiella pneumoniae (ATCC 4352), and Campylobacter jejuni (ATCC 29428). Let surface dry. For highly soiled surfaces, clean excess dirt first.

We assure your complete satisfaction with a one year, 100% money-back guarantee on this Sprayway product.
