DIRECTIONS FOR USE:
• Open bag. Shake side to side to dispense.
• Liberally apply in areas where snake activity has been noticed such as around houses, garages, sheds, barns, woodpiles and patios. Snakes are often searching for several things around your home such as food and areas to cool, warm or shelter themselves. For best results in deterring snakes: (1) Reduce rodent and insect prey populations, (2) Limit potential snake habitats available in your backyard by cutting back vegetation around buildings and structures, trimming bushes away from the ground, and removing rocks, boards and other sources of cover. Snakes dislike being in open areas, (3) Seal any openings to structures, especially to areas that are cool, damp and dark or areas with rodents and insects.
• Repeat application every 30 days. More frequent application may be required after periods of heavy rainfall and if more snake activity is noticed.

KEEP OUT OF REACH OF CHILDREN

CAUTION:
Avoid contact with eyes and prolonged contact with skin. To reduce contact with skin, wear gloves when handling. If eye or skin contact occurs, flush thoroughly with water. For medical information call 1-877-332-0755.
