SLOW MOW Lawn Conditioner

READY-TO-SPREAD GRANULES

1. Reduce mowing by up to half
2. Improves turf density & durability

"Take a vacation from mowing your lawn"

Reduce fertilizer needs by up to 30%

COVERAGE:
2,600 Sq Ft @ Medium Rate

NET WT 10.4 Lb (4.7 kg)

KEEP OUT OF REACH OF CHILDREN

CAUTION for use on pet grass areas. See back panel for additional precautionary statements.

ACTIVE INGREDIENT
Trinexapac-ethyl (CAS No. 95266-40-3) . . . . 0.15%

OTHER INGREDIENTS . . . . . . . . . . . . . . . . 99.85%

TOTAL 100.00%
BioAdvanced® Slow Mow Lawn Conditioner allows for longer intervals between mowings, or quicker and easier mowings. Less time in the lawn is more time with your family. Shorter is better. Extensively used on golf courses. Ideal for high visibility areas. Improves turf quality, through increased turf density. Frequently reduces watering requirements and increases green color.

**DIRECTIONS FOR USE**

**How To Use**

1. For Best Results: Multiple applications should be made throughout the growing season, but do not exceed a total of 10.35 lbs. per 1,000 sq. ft. (25 lb. per acre) per year. Make subsequent applications 7-14 days apart. If mowing and watering have been poor for your lawn—do not use this product—your project will be a failure. Be sure the lawn has adequate fertility before this product is applied. Avoid applying the product over watered or temporarily water stressed areas. Use turf types map below to determine whether your grass is Cool Season or Warm Season. Follow the directions for your specific lawn, please.

   **TURF TYPES**
   - **Blue Zones**: Cool Season Turf, use Cool Season Rates chart.
   - **Red Zones**: Warm or Cool Season Turf (Transition Zone).
   - **Green Zones**: Safe for all turf areas.

2. HOW TO APPLY: Apply product evenly, using a properly calibrated granular fertilizer spreader which will uniformly distribute the product over the target area. Avoid allowing the product to grow or temporary water stress or evapotranspiration may occur.

3. **Watering**: Water regularly to ensure even distribution of product. Apply product on a day when there is enough rainfall or irrigation to wet the soil to a depth of 6 inches. Apply product on a day when there is enough rainfall or irrigation to wet the soil to a depth of 6 inches. Apply the product before the next scheduled irrigation is applied or 24 hours after a rainfall of 0.5 inches. Keep the area wet for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:

- Remove contaminated clothing and shoes. Wash exposed skin thoroughly with soap and water or suitable disinfectant. Wash hands before eating, drinking, or using the toilet. Remove contaminated clothing and shoes. Wash exposed skin thoroughly with soap and water or suitable disinfectant. Wash hands before eating, drinking, or using the toilet. Immediate Cool and running water.

IF IN EYES:

- Rinse eyes with water for 15 minutes. Remove contact lenses, if worn. If redness or irritation persists, consult a physician.

IF INHALED:

- Move the person to a fresh air area. Remove contaminated clothing and shoes. Wash exposed skin thoroughly with soap and water or suitable disinfectant. Wash hands before eating, drinking, or using the toilet. If breathing is difficult, give mouth-to-mouth resuscitation if you are trained to do so.

IF SWALLOWED:

- Give 1-2 glasses of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. If vomiting occurs, keep the person comfortable and call the Poison Control Center or doctor.

**Storage & Disposal**

- Do not contaminate water, feed, or food by storage and disposal of this product. Store in a cool, dry place. Keep container closed and away from foods and feeds.

**Disclaimer and Limitation of Liability**

SCIENCE-BASED SOLUTIONS
**PRODUCT INFORMATION**

**BioAdvanced® Slow Mow Lawn Conditioner**

**INDICATIONS OF USE**

- **Cool Season Turf**: Use before the onset of cooler weather in the Fall, or about one month before turf begins to go dormant. Warm-Season grasses slow their growth rate when daily highs exceed 75°F for several consecutive days. Apply when lawn is actively growing and temperatures are at least in the 50°Fs. Discontinue use before the onset of hot weather when turf enters dormancy due to heat or drought. This product does not allow for use in the hot period, which is considered the period when the grass is growing at a lower rate than normal due to heat or drought conditions. Avoid applying when grass is under stress or enters dormancy from heat or drought to prevent yellowing. If temporary discoloration is a concern, test on a small area before applying to an entire lawn. For heavily stressed areas, consider using a slower-acting product to provide a more extended growing season. For more information, contact your local agricultural extension service. **Use only on turf types labeled on the label and is reasonably fit for the specific purpose for which it is used.**

**TURF TYPES**

- **WARM Season Turf**
  - Centipedegrass: 2
  - Hybrid Bermuda: 2
  - Kentucky-31 Tall Fescue: 2
  - Perennial Ryegrass: 2

**USE RESTRICTIONS**

- Do not apply to bermudagrass or zoysiagrass. Do not apply to turf types such as St. Augustinegrass, bahiagrass, and crabgrass or turf types that have not been approved for use in your area.

**HOW TO APPLY**

- **Drop Spreaders**: For best results, apply in a single path cutting across the existing turf and moving toward the center. Follow swath width recommendations for your spreader.

**CONSUMER RESPONSE AND CLEANUP**

- **Environmental Hazards**
  - Apply the product only to an area that is large enough to prevent loss into non-target areas.
  - Do not contaminate water, food, or feed by storage or disposal.
  - Keep out of reach of children and pets.

**FIRST AID AND CLEANUP**

- In case of **contact with skin or clothing**: Wash clothing before reusing. Remove contaminated clothing and wash skin with soap and water. In case of **contact with eyes**: If you feel discomfort, wash eyes gently and completely with water. If the eyes become red or if irritation continues, seek medical attention.

**STORAGE AND DISPOSAL**

- **Pesticide Storage & Disposal**: Store in a cool, dry place. Keep out of the reach of children and pets.

**PRECAUTIONARY STATEMENTS**

- **Environmental Hazards**
  - **Avoid applying to turf types that are not labeled on the label.**
  - **Avoid applying to turf types that are not labeled on the label.**
  - **Avoid applying to turf types that are not labeled on the label.**

**FIRST AID AND CLEANUP**

- **In case of contact with skin or clothing**: Wash clothing before reusing. Remove contaminated clothing and wash skin with soap and water. In case of contact with eyes: If you feel discomfort, wash eyes gently and completely with water. If the eyes become red or if irritation continues, seek medical attention.

**STORAGE AND DISPOSAL**

- **Pesticide Storage & Disposal**: Store in a cool, dry place. Keep out of the reach of children and pets.
**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label before using this product.

**FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN UNEVEN GROWTH REDUCTION OR SEVERELY STUNTED TURF.**

For use on home lawns, sports turf and other turf areas.

This is a product that allows the user to reduce lawn-moving by half for a period of about four weeks. The amount of product needed depends on the region and grass type. See the use rate chart below.

### HOW TO USE

**For Best Results:** Multiple applications should be made throughout the growing season, but do not exceed a total of 30.25 lbs. per 1,000 sq. ft. (2.5 lb. a.i./A) per year. Make subsequent applications two weeks apart and mow before or after application. Do not spray this product very dry. Do not use this product if grass is already stressed due to drought or other conditions.

**TURF TYPES**

- **Blue Zones:** Use Cool Season Turf rates.
- **Petite Zones:** Use Warm or Cool Season Turf rates.
- **Midnight Time:** Use Cool Season Turf rates.

**WHEN TO APPLY**

- **Cool Season Turf:** Apply before the first frost to apply in spring through fall, beginning about one month after grass turns green or after second mowing. Scuffing may occur with the first frost of winter in the fall, or one month before frost in the spring. Apply the product again on the first mow after the frost. Warm-Season grasses grow their roots during the fall, so do not apply before the first frost.
- **Warm Season Turf:** Broadcast 3-5 days after the first application.

**STORAGE & DISPOSAL**

- **Runoff** may be hazardous to aquatic organisms in neighboring areas. To protect the environment, do not allow pesticide to enter surface or ground water. Do not apply to or allow run-off from treated areas to enter surface or ground water. When disposing of containers, do not use them to store or transport food or water. Containers may be hazardous even when empty. Do not put containers in lay-up or where they may be exposed to the sun or flame. Call your local waste authority to determine proper disposal methods.

**REDUCED RISK RESULTS**

- **3 weeks** of reduced mowing allowed in the lawn after the first application.

### ENVIRONMENTAL HAZARDS

- **Waste Containers:** Any waste containers used in connection with this product must be disposed of in an environmentally safe manner.

### PRECAUTIONARY STATEMENTS

**CAUTION HAZARDS TO HUMANS & DOMESTIC ANIMALS**

- **Precautionary Statements:** Cause moderate eye irritation. Read label with eyes closed. Wear protective eyewear. Wash thoroughly with soap and water after contact. Avoid contact with eyes or clothing. Avoid contact with mucous membranes. Do not eat, drink, or smoke when using this product. Wash hands after handling this product. Do not use on grass areas that are intended for consumption by domestic animals.

**PREFERRED AIDS**

**STORAGE & DISPOSAL**

- **Do not contaminate water, food, or feed by storage or disposal.**

**PESTICIDE STORAGE**

- **Store in a cool, dry area. Keep container closed and away from food, feed, or other substances.**

**CONTAINER DISPOSAL:** If empty: Nonrefillable container. Do not reuse or refill this container. For qualified disposal, contact your local waste authority.

**FIRST AID**

- **IF IN EYES:** Hold eyes open and rinse slowly with water for 15-30 minutes. Remove contact lenses, if worn. After the first rinse, wash with clear water. For persistent irritation, call a poison control center or doctor for treatment advice.

- **IF ON SKIN OR EYES:** Take off contaminated clothing/dress cloths immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice.

- **IF INHALED:** Provide fresh air. If not breathing, give artificial respiration. If breathing stops, call a poison control center or doctor for treatment advice.

**ACTIVE INGREDIENT**

- **TriXimate (CAS No. 95266-40-3) 0.15%**

**OTHER INGREDIENTS**

- **WATER 99.85%**

**EPA REG. NO. 910-035-2054**

**DIRECTIONS FOR USE**

- **Apply the product evenly, using a properly calibrated granular fertilizer spreader which will uniformly distribute the product over the target area. Avoid skips as uneven growth or temporary grass discoloration may occur.**

**EQUATIONS FOR USE**

- **Temperature/Frost** to apply in spring through fall, beginning about one month after grass turns green or after second mowing. Scuffing may occur with the first frost of winter in the fall, or one month before frost in the spring. Apply the product again on the first mow after the frost. Warm-Season grasses grow their roots during the fall, so do not apply before the first frost.

**WHEN TO APPLY**

- **Cool Season Turf:** Broadcast 3-5 days after the first application.

**STORAGE & DISPOSAL**

- **Waste Containers:** Any waste containers used in connection with this product must be disposed of in an environmentally safe manner.

**REDUCED RISK RESULTS**

- **3 weeks** of reduced mowing allowed in the lawn after the first application.
**DIRECTIONS FOR USE**

*It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label before using this product.*

**FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN UNEVEN GROWTH REDUCTION OR SEVERELY STUNTED TURF.**

For use on home lawns, sports turf and other turf areas. This is a product that allows the user to reduce lawn-mowing by half for a period of about four weeks. The amount of product needed depends on the region and grass type. See the use rate charts below.

**HOW TO USE**

For Best Results: Multiple applications should be made throughout the growing season, but do not exceed a total of 10.25 lbs. per 1,000 sq. ft. (25 lb. or 250,000 sq. ft.) per year. Make subsequent applications when grasses are dormant and no mowing has been done for at least 7 days. Do not water this product, as the majority of the grass type is intended for temporary growth or temporary grass discoloration may occur.

**TURF TYPES**

- **Cool Season Turf:** Cool Season Turf use Cool Season Turf Rates chart
- **Warm Season Turf:** Use Warm Season Turf Rates chart

**USE PRECAUTIONS:** Avoid applying when grass is wet or where there is snow or ice from frost or drought. To prevent yellowing, if temperature is unknown, use the small area before applying to entire lawn. This has low observable discoloration occurs, usually lasting only two or three weeks, the product will need to be reapplied. This product provides more than a 95% reduction in turf that is damaged or destroyed due to frost or drought. The product can also allow for up to 50% more growth under conditions of lawn fertility, water retention, or other factors such as drainage, which stress the turf. Multiple applications into adjacent areas, such as gardens and flower beds.

**USE RESTRICTIONS:** Do not use around potted plants or vegetation. Keep out of reach of children. Do not apply where children or livestock will be exposed to the treated area. Do not apply within 24 hours of applying to avoid removing product from the treated area. Do not use in or near drainage ditches or ditches, wetlands, shallow water bodies, or other water bodies. Do not apply where runoff can enter storm drains or sewage systems. Do not apply to lawns that are to be mowed during the next 4 hours. Apply to lawns that are not mowed during the next 4 hours. Do not apply to lawns that are not mowed during the next 4 hours.

**EXPECTED RESULTS:** Growth control begins about 1 to 2 days after first application.

---

**ENVIRONMENTAL HAZARDS**

Most of these chemicals are hazardous to aquatic life. Avoid spraying drift onto water or onto areas of standing water. Do not apply to areas where use of drift spray could pose a hazard to wildlife, fish, or aquatic life. Do not apply in areas that may cause drift; for example, near ponds, lakes, streams, or drainage ditches. Do not apply to lawns that are to be mowed during the next 4 hours after application. Do not apply where runoff can enter storm drains or sewage systems.

**FIRST AID**

**IF IN EYES:** Hold eyes open and rinse slowly with water for 15-30 minutes. Remove contact lenses, if present. After rinsing eyes, remove any remaining debris by gently washing with a clean cloth.

**IF ON CLOTHING OR CLOTHING:** Take off contaminated clothing. Rinse immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice.

**IF SKIN:** Wash thoroughly with soap and water. Wear rubber gloves when handling this product. Rinse skin thoroughly with soap and water. For long-term exposure, seek medical attention.

**IF INHALED:** Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. If swallowed, do not induce vomiting. Call a poison control center or doctor for treatment advice.

---

**RESEARCH AND DEVELOPMENT**

BioAdvanced® Slow Mow Lawn Conditioner allows for longer intervals between mowings, or quicker and easier mowings. Less time in the lawn is more time with your family. Shorter turf density. Frequently reduces water requirements and increases green color.

- **Reduce mowing by up to half for a period of about 4 weeks.**
- **Exclusive granular formula.**
- **Safe for use around flower gardens when used as directed.**
- **Widen the turf when used as directed.**
- **Reduce fertilizer needs by 30%. Save money by mowing less.**
