LEMON VELVET is a phosphate-free, pH neutral formulation designed to provide effective disinfection and mildew control against mold and mildew growth on pre-cleaned, hard, non-porous inanimate surfaces, food processing equipment and service establishments, restaurants, and manufacturing facilities where thoroughkeeping is of prime importance in controlling cross-contamination from treated hard, non-porous surfaces, tools, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glass ceramic tile, plastic surfaces, vanity tops, shower stalls, bathtubs, and cabinets.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. LEMON VELVET is not for use on critical and semi-critical medical devices.

DISINFECTION: To disinfect inanimate, hard, non-porous surfaces add 4 ounces of LEMON VELVET per gallon of water. Apply solution with a mop, cloth, sponge, hand pump trigger sprayer or low pressure coarse sprayer so as to wet all surfaces thoroughly. Do not remain wet for 10 minutes, then remove excess liquid. For sprayer applications, spray 6-8 inches from surface, rub with brush, sponge or cloth. Do not apply in the presence of food products.

For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use.

Non AND TOILET BOWL DISINFECTION/CLEANER DIRECTIONS: Remove gross filth prior to disinfection.
FROM CONCENTRATE: Add 4 ounces per gallon (32 milliliters per liter) to the toilet bowl and mix thoroughly over roughly hour. Allow to stand for 10 minutes and flush.
FROM USE-SOLUTION: Empty toilet bowl or urinal and apply 4 ounces per gallon (32 milliliters per liter) solution to exposed surfaces, brush or swab thoroughly under the rim with a cloth, mop, sponge or spray, allow to stand for 10 minutes and flush.

FOR HEAVY DUTY USE: Empty toilet bowl or urinal and apply 16 ounces per gallon (128 milliliters per liter) solution to exposed surfaces, brush or swab thoroughly under the rim with a cloth, mop, sponge or spray, allow to stand for 10 minutes and flush.

TO DISINFECT FOOD PROCESSING PREMISES: floors, walls, and storage areas, add 4 ounces of LEMON VELVET per gallon of water. For heavily soiled areas, a pre-cleaning step is required. Apply solution with a mop, cloth, sponge, hand pump trigger sprayer or low pressure coarse sprayer so as to wet all surfaces thoroughly. Do not remain wet for 10 minutes, then remove excess liquid. Before using LEMON VELVET, food contact surfaces should be rinsed and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 or Type 2 (HIV-1, HIV-2), associated with AIDS, Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV).

To deodorize, apply LEMON VELVET as indicated under the HMIS RATING

LEMON VELVET is a fungicide, and is effective against bacterial and fungal spore. The product is not intended to kill bacteria or viruses.

The product is toxic to fish. Do not discharge effluent containing this product to sewer systems unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the requirements of the permitting authority has been notified in writing prior to discharge.

Kills Pandemic 2009 H1N1 Influenza A virus (formerly called Swine Flu)

Mildewstat (on hard, non-porous, inanimate surfaces)

Fungicide (against pathogenic fungi)

Bactericide (against pathogenic bacteria)

Virucide

Deodorizer

Cleaner

Sanitizer

Disinfectant

Surfactant

Disinfectant

To disinfect, wet all surfaces thoroughly, allow to remain wet for 10 minutes, then remove excess liquid and rinse surface thoroughly.

KILLS HIV-1, HIV-2, HBV, and HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BLOOD PRODUCTS

Health care settings (Hospitals, Nursing Homes) or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 or Type 2 (HIV-1, HIV-2), associated with AIDS, Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HIV-2, HBV, and HCV ON SURFACES/OBJECTS SOILED WITH BLOOD/BLOOD PRODUCTS

PERSONAL PROTECTION: When handling items soiled with blood or body fluids, use protective goggles, gloves, and disposable disposable plastic gloves, gowns, masks, and eye coverings.

CLEANING PROCEDURES: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of LEMON VELVET.

DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be immobilized and disposed of according to local regulations for infectious waste disposal.

LEMON VELVET is a hospital use bactericide and *virucide at 4 OUNCES PER GALLON (32 MILLILITERS PER LITER) (EQUIVALENT USE DILUTION), MODIFIED IN THE PRESENCE OF 400 PPM HARD WATER CaCO3.

LEMON VELVET is a fungicide at 4 OUNCES PER GALLON (32 MILLILITERS PER LITER) (EQUIVALENT USE DILUTION), MODIFIED IN THE PRESENCE OF 250 PPM HARD WATER CaCO3.

GENERAL CLEANING - Apply LEMON VELVET to soiled area with a mop, cloth, sponge, or hand pump trigger sprayer to pressure sensitive sprayer. LEMON VELVET can be diluted at 4 OUNCES PER GALLON or applied at full strength. Thoroughly wet soiled surface and scrub as necessary.

DEODORIZATION - Apply LEMON VELVET as indicated under the anticipated use.

See side panel for additional precautionary statements.
