**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER**

CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE AND SKIN BURNS. EYE CONTACT MAY CAUSE LOSS OF VISION. IRITATING TO NOSE AND THROAT. HARMFUL IF ABSORBED THROUGH THE SKIN OR INHALED.

Do not breathe dust or spray mist. Do not get in eyes, on skin, or on clothing. Do not ingest. Keep out of the reach of children.

If swallowed:

- Call a poison control center or doctor for treatment advice.

If inhaled:

- If person is not breathing, call 911 or an ambulance, perform artificial respiration, preferably mouth-to-mouth. If breathing is normal, take person to a fresh air location.

If on skin or clothing:

- Wash skin with soap and water if necessary.

If swallowed:

- Then give artificial respiration, preferably mouth-to-mouth.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish and aquatic organisms. Do not contaminate water by cleaning of equipment or disposal of equipment if the effluent contains this product. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewers without notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**PHYSICAL OR CHEMICAL HAZARDS**

STORAGE AND DISPOSAL

DO NOT SHIP WITH FOODS, FEEDS, DRUGS, OR CLOTHING.

**KEEP CONTAINER TIGHTLY CLOSED WHEN NOT IN USE.**

**DIRECTIONS FOR USE**

This is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and use strictly in accordance with precautionary statements and directions.

**INDUSTRIAL RECIRCULATING COOLING WATER SYSTEMS**

Used effectively at treatments recommended to achieve exposures to one part per million (ppm) of 'active' residual bromine to control algae, bacterial and fungal slimes in industrial cooling towers, influent water systems (e.g. flow-through filters, lagoons, etc.); heat-exchange water systems; industrial water scrubbing systems; brewery and canning systems; and other industrial air-scrubbing systems equipped with a mist eliminator.

**Dosage Rates**

- Initial dose: When noticeably fouled, add 2-6 lbs./10,000 gallons of water contained in the system. Repeat initial treatment until 1-3 ppm of 'active' residual bromine is established for at least 4 hours.

**Toxicity Note:**

The frequency and duration of the treatment will depend upon the severity of the problem and the characteristics of the system. The systems must be cleaned before initial treatment.

**PRODUCT APPLICATION**

Treatment by System Volume: When a system is noticeably fouled, add 1-10 lbs. of this product to 10,000 gallons of water or 12-90 ppm in the system. The product is intended for use as a slimecide for the water process used in the manufacture of paper and paperboard products. Do not use on bleached fiber or any material that will not be bleached to white. For the treatment of paper and paperboard products that contact food. Treat water at critical areas in the process system where the highest concentration of the product will be used. Add 1-5 lbs. of this product to the system per dry metric ton of paper when this product is used in the manufacture of paper and paperboard products that contact food. Treat water at critical areas in the process system where the highest concentration of the product will be used.

**Note:**

Always read and follow label instructions, contact your State Pesticide or Environmental Control Agency, or your local Sureway representative for more information.

**CONTAINER HANDLING:** Nonrefillable. Do not reuse or refill this container. For oxygen, if available. Do not mix with waste, including mixtures of residues of this product with untreated water. Do not mix with any other chemical other than those products specifically recommended for use with this product. A bromine or chlorine test kit can be used to determine the treatment level of bromine. The bromine concentration may be determined with test kits for either bromine or chlorine. Do not use when this product is part of a process where the bromine is expected to be reduced to something less than 1 ppm as bromine. To calculate the appropriate level of this product, estimate the paper mill's daily production, and the number of dry metric tons of dry fiber. Test for bromine to verify the level of 5 ppm is not being exceeded.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal.

**PESTICIDE STORAGE**

Keep product dry and store in a cool, dry, well-ventilated area away from heat or open flame.

**IN CASE OF FIRE**

Do not use ammonium phosphate extinguisher near water and this product. Hazardous reactions may occur.

**WARRANTY**

Sureway warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with label directions under normal conditions of use, but to the extent consistent with applicable law, neither this warranty nor any other warranty of MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE is given. This warranty is nontransferable and is available only to the original buyer. In the event of a breach of this warranty, Sureway's sole obligation is to replace the product or refund the purchase price. Sureway disclaims all other warranties, whether expressed or implied, including warranties of merchantability and fitness for a particular purpose. Sureway shall not be liable for any incidental or consequential damages resulting from the use of this product, including, but not limited to lost profits or savings, damage to other goods or property. This warranty is nontransferable and is available only to the original buyer.
