Neutral Disinfectant Cleaner is phosphate-free, pH-neutral formulation designed to provide effective cleaning, disinfecting, and deodorization for hospitals, wards, homes, schools, and offices where householding of prions is important in controlling cross-contamination from treated surfaces. This product, when used as directed, is formulated to kill the following non-transmissible mammalian environmental viruses: Bovine Viral Diarrhea Virus (BVDV), Feline Leukemia Virus (FeLV), Feline Picornavirus (FePV), Canine Distemper Virus (CDV), Rabies Virus, Bovine Clostridium Perfringens (B. C. Perfringens), Actinomyces bovis, Enterococcus faecalis, Streptococcus pyogenes, Staphylococcus aureus, and Pseudomonas aeruginosa. It is also virucidal against HIV-1, HIV-2, Hepatitis B Virus (HBV), Hepatitis C Virus (HCV), Herpes Simplex Type 1 (causative agent of fever blisters), Herpes Simplex Type 2 (causative agent of genital sores), Mycobacterium tuberculosis, Methicillin-Resistant Staphylococcus aureus (MSSA) and Community Associated Methicillin resistant Staphylococcus aureus (CA-MRSA) NRS 384 Genotype USA300.

**FUNGICIDAL ACTIVITY:** At the 2 ounce per gallon dilution this product is fungicidal against the pathogenic fungi, Trichophyton mentagrophytes, athlete's foot fungus (M. canis) and Candida albicans. Apply this product to soiled area with a mop, cloth, sponge, hand pump trigger sprayer or low pressure coarse sprayer. This product is effective against fungi in water up to 200 ppm hardness (as CaCO₃) in the presence of organic material (as carbon). Apply a coarse sprayer so as to wet all surfaces thoroughly. Let air dry. Prepare a fresh solution for each use. Repeat application at weekly intervals or when mold growth appears.

**MILDEWSTAT (on hard, non-porous, inanimate surfaces)** If swallowed: Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for medical treatment. For heavily soiled areas, a pre-cleaning step is required. Use this product to clean and disinfect hard, non-porous, inanimate surfaces found in a bathroom, shower stall, toilet, cabinet or other similar equipment. Let air dry. Prepare a fresh solution for each use. Repeat application at weekly intervals or when mold growth appears. **GENERAL CLEANING:** This product is formulated to a neutral pH, yet provides effective cleaning strength that will not dull high-gloss floor finishes with repeated use.

**CLEANING PROCEDURES:**

- **SURFACE CLEANING:** When using on environmental surfaces, to clean and disinfect hard, non-porous surfaces (e.g. walls, floors, shutters, and tables). This product may be used on hard, non-porous surfaces without pre-cleaning. Apply this product to soiled area with a mop, cloth, sponge, hand pump trigger sprayer or low pressure coarse sprayer. This product is effective against fungi in water up to 200 ppm hardness (as CaCO₃) in the presence of organic material (as carbon). Apply a coarse sprayer so as to wet all surfaces thoroughly. Let air dry. Prepare a fresh solution for each use. Repeat application at weekly intervals or when mold growth appears.

- **FUNGICIDAL ACTIVITY:** At the 2 ounce per gallon dilution this product is fungicidal against the pathogenic fungi, Trichophyton mentagrophytes, athlete's foot fungus (M. canis) and Candida albicans. Apply this product to soiled area with a mop, cloth, sponge, hand pump trigger sprayer or low pressure coarse sprayer. Let air dry. Prepare a fresh solution for each use. Repeat application at weekly intervals or when mold growth appears.

- **SPARE INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HIV-2, HBV, AND HCV OF SURFACES/OBJECTS SOILED WITH SUSPECTED INFECTIOUS MATERIALS:**

  **PERSONAL PROTECTION:** Wear plastic gloves, rubber footwear, and protective clothing. Remove removed clothing and wash clothing thoroughly. Proper decon should be performed. Wash hands with soap and water after handling and before eating, drinking or smoking.

- **SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HIV-2, HBV, AND HCV OF SURFACES/OBJECTS SOILED WITH SUSPECTED INFECTIOUS MATERIALS:**

  **DISPOSAL OF INFECTIOUS MATERIALS:**

  - If used in the treatment of infectious waste, the container should be labeled infectious waste. This product is specifically intended for use on environmental surfaces and will not exert a level of virucidal activity against HIV-1, HIV-2, HBV or HCV that is sufficient to render infectious waste clean. The potential for transmission of Human Immunodeficiency Virus Type 1 or Type 2 (HIV-1 or HIV-2) associated with AIDS, Hepatitis B Virus (HBV), Hepatitis C Virus (HCV), Herpes Simplex Type 1 (causative agent of fever blisters), Herpes Simplex Type 2 (causative agent of genital sores), Mycobacterium tuberculosis, Methicillin-Resistant Staphylococcus aureus (MSSA) and Community Associated Methicillin resistant Staphylococcus aureus (CA-MRSA) NRS 384 Genotype USA300.

  **EFFECTIVE TESTS HAVE DEMONSTRATED THAT THIS PRODUCT IS AN EFFECTIVE BACTERICIDE AND VIRUCIDE AGAINST THE FOLLOWING ORGANISMS IN WATER UP TO 100 PPM HARDNESS (AS CaCO₃) IN THE FREQUENCY OF ORGANIC SOL (250-500ppm). THIS PRODUCT IS AN EFFECTIVE FUNGICIDE AND VIRUCIDE AGAINST THE FOLLOWING ORGANISMS IN THE FREQUENCY OF ORGANIC SOL (250-500ppm).

  **KILLS HIV-1, HIV-2, and HBV on PRE-CONTAMINATED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/FLUIDS in health care settings (Hospitals, Nursing homes) or other settings in which there is an inescapable pool of blood of inanimate environmental surfaces. This product will safely and effectively inactivate blood and blood products can be safely and effectively inactivated with a rinse of 100.000% neutral pH solution.**
