PREVENTOL® MP 260
FOR THE PRESERVATION OF PAINTS, STAINS, AQUEOUS METALWORKING, CUTTINGS, COOLING AND LUBRICATING FLUIDS AND CONCENTRATES, PAPER COATINGS, NON FOOD CONTACT PLASTICS AND PLASTICS COATINGS, TEXTILE COATINGS, CANVAS AND CORDAGE, INKS, WOOD PRESERVATIVES, SAPSTAIN, BUILDING MATERIALS, ADHESIVES, CAULKS, PATCHING COMPOUNDS, SEALANTS, AND GROUTS

ACTIVE INGREDIENTS: 3-Iodo-2-propynyl butylcarbamate 30.0%
INERT INGREDIENTS 70.0%
TOTAL 100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION Causes moderate eye and skin irritation. Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with eyes, skin or clothing. Wear goggles or face shield. Avoid breathing dust or spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a poison control center or doctor for further treatment advice.

Environmental Hazards
This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination Systems (NPDES) permit and the permitting authority has been notified in writing prior to the discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste. For terrestrial uses: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washer or rinsate.

Page 1
PREVENTOL® MP 260
FOR THE FUNGAL PROTECTION IN paints, stains, metalworking fluids, paper coatings, plastics and plastic coatings, textile coatings, inks, pigment dispersions, slurries and gypsum, adhesives, construction, polymer emulsions, concrete admixtures, and wood preservation.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

The following guidance is given as an approximation for each use pattern, but field testing is recommended to achieve optimum effectiveness.

MATERIAL PRESERVATION

PAINTS, COATINGS, AND STAINS:
PREVENTOL® MP 260 is used for dry-film preservation of paints and coatings. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 3,400 to 28,000 ppm of the finished product

Wood Stains (NON FOOD CONTACT) – Not for use in the state of California:
PREVENTOL® MP 260 is also used as an additive to stains designed to be applied to exterior siding, decks, lawn furniture, etc. to prevent the growth of mold and mildew. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 5,000 to 25,000 ppm of the finished product

METALWORKING FLUIDS:
PREVENTOL® MP 260 is used in the preservation of concentrated metalworking fluids. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate(Concentrate): 1,000 to 17,500 ppm of the finished product

PAPER COATINGS (NON FOOD CONTACT) – Not for use in the state of California:
PREVENTOL® MP 260 is used to prevent mold and mildew growth in aqueous and solvent-based coatings applied to paper and cardboard substrates. Paper applications include corrugated cardboard, soap wrappers, wall covers, non-food contact packaging materials, and non-food contact paper tapes. This product is added at the end of the production cycle with sufficient agitation to prevent possible mechanical losses and ensure a uniform distribution.

Dosage Rate: 750 to 28,500 ppm of the finished product
PLASTICS AND PLASTICS COATINGS (NON FOOD CONTACT):
PREVENTOL® MP 260 is to be used to prevent surface mold and mildew growth on plastic items including shower curtains, cable, wire insulation, sun umbrellas, polymer furniture, filter media, polymer components of carpet. Intended plastics include polymers such as PVC, polyurethanes, elastomers and rubbers, neoprene, styrene compounds, polyolefins. This product is dispersed in the plasticizer or color concentrate before it is incorporated into the resin to ensure a uniform distribution. Do not use this product if the heat of processing is above 350°F for prolonged periods. Do not use in a plastic that will be in contact with food or medical device applications. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 1,700 to 35,000 ppm of the finished product

TEXTILE COATINGS OR DYES – (NON APPAREL) Not for use in the state of California:
PREVENTOL® MP 260 is used to prevent mold and mildew growth in aqueous and solvent based coating or dyes used in textile processing. Not to be used in fabrics for human wear or direct skin contact. For use as a coating or dye on textile materials used to make awnings, carpet backing, cordage, curtains and sails. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 2,000 to 40,000 ppm of the finished product

PIGMENTS, DYES, AND FILLER SUSPENSIONS:
PREVENTOL® MP 260 is used for dry-film preservation of pigments, dyes, and filler suspension. Pigments, dyes and filler suspensions include dispersed pigments and mineral slurries such as kaolin clay, montmorillonite clay, titanium dioxide, calcium carbonate, calcium sulfate, barium sulfate, magnesium silicate, carbon black, iron oxide, and diatomaceous earth. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage rate: 1,300 to 30,000 ppm of the finished product

PAPER, WALLBOARD (DRYWALL AND GYPSUM BOARD) AND PAPERBOARD PRODUCTS (NON FOOD CONTACT):
PREVENTOL® MP 260 may be used to protect wallboard, paper, and paperboard products. including wallboard paper, insulation backing, newsprint, photographic paper, and drawing paper. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

PREVENTOL® MP 260 may be applied to the gypsum core of wallboard to inhibit the growth of fungi.

Dosage rate: 150 to 30,000 ppm (0.071 to 14.24 lbs/msf)

ADHESIVES, TACKIFIERS AND SEALANTS:
PREVENTOL® MP 260 is used for dry-film preservation of water based adhesives and water dispersible adhesives, tackifiers and sealants. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 750 to 20,000 ppm of the finished product
BUILDING MATERIAL PRESERVATION:
PREVENTOL® MP 260 is used for dry-film preservation of mastics, caulks, joint compound, grout, concrete admixtures and spackling. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 750 to 20,000 ppm of the finished product

INKS:
PREVENTOL® MP 260 is used for dry-film preservation of inks. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 1,650 to 35,000 ppm of the finished product

POLYMER EMULSIONS:
PREVENTOL® MP 260 is recommended for the control of microorganisms in the manufacture and storage of SBR latex emulsions used in the manufacture of flooring adhesive or carpet backing. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 750 to 20,000 ppm of the finished product

CANVAS (NON APPAREL):
PREVENTOL® MP 260 is used as to prevent mold and mildew growth in both aqueous and solvent based process formulations which coat canvas intended for non-food areas. PREVENTOL® MP 260 is added at the end of the production cycle to the process formulation with sufficient agitation to prevent possible mechanical losses and ensure a uniform distribution. The exact amount for the preservative of any given formulation will depend on the components, storage time, temperature, etc., and can be determined by the actual testing based on formula weight.

Dosage Rate: 1,000 to 20,000 ppm of the finished product

WOOD PRESERVATION:
PREVENTOL® MP 260 is for above ground use only.

Field trials must be conducted to determine the exact level of use within these ranges for each application.

PREVENTOL® MP 260 is applied to new lumber, plywood, particle board, millwork to prevent the growth of mold, mildew, sapstain fungi and wood rotting and decay fungi on these substrates.

Dosage Rate: 3,000 to 60,000 ppm of the finished product
Dosage rate depends upon the severity of conditions for end use, and the extent of time that protection is required.

**For Freshly Sawn Lumber**, A one-minute dip at ambient temperatures in a solution or aqueous dispersion containing PREVENTOL® MP 260 controls the development of mold, mildew and sapstain fungi on the lumber.

Lumber must be treated with the PREVENTOL® MP 260 within 24 hours of cutting. The lumber must be completely immersed in the treating bath. The treating vat must be designed such that it permits easy immersion and removal while minimizing spillage. Additional PREVENTOL® MP 260 during the treatment process, the proper solution must be prepared in a separate container and then added to the treatment vat.
The vat may be cleaned by emptying and rinsing with a suitable solvent or use of a detergent. All waste must be handled and disposed of properly.

After PREVENTOL® MP 260 treatment, lumber must be stacked in a properly maintained seasoning yard to allow air circulation and with appropriate drainage to prevent water accumulation in any areas. The yard must be kept free of vegetation and debris which may hold moisture and promote growth of mold, mildew, sapstain fungi, and wood rotting and decay fungi.

Dosage Rate: 3,000 to 7,000 ppm
Not for use in the state of California on freshly sawn lumber.

For Millwork (Not for use in the state of California), including door and window frames, exterior siding, composite board, plywood and other construction lumber to prevent the growth of mold, mildew, sapstain fungi and wood rotting fungi. The use of PREVENTOL® MP 260 does not alter the wood’s appearance and treated wood may be painted when dry. Once in solution, PREVENTOL® MP 260 is applied by dipping, brushing, spraying, or pressure/vacuum treatment.

Dosage Rate: 7,000 to 60,000 ppm of the finished product

**REMARKS**
If you need assistance or information, please call your nearest LANXESS representative, or our Pittsburgh office at 800-LANXESS.
