**DIRECTIONS FOR USE:**
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**TOTAL CHLORINATION:**
Throughout the pool season, adjust pH to 7.2-7.8 with appropriate pool care products. Follow label directions.

**METHOD OF APPLICATION:**
Broadcast the product evenly over a wide area in the deepest part of the pool with the pump on. Follow label directions.

**SHOCK TREATMENT:**
For Start-Up or Initial Shocking: Per 10,000 gallons of water directly into the deep end of the pool. To prevent possible damage to pool surface, use a pump to agitate your preparation that may have settled on the bottom of the pool. Re-enter into treated pools is prohibited above levels of 3 ppm chlorine. As a preventative treatment, you should shocking shock weekly to prevent pool problems which occur when bathing loads are high, water appears hazy or dull, unpleasant odors or eye irritation occur, or heavy rain or snow storms, when temperatures are high, in case of colored water, or if algae develops with resulting green color and slimy feeling.

**REAGENT TREATMENT:**
Per 10,000 gallons of water directly into the deep end of the pool. To prevent possible damage to pool surface, use a pump to agitate your preparation that may have settled on the bottom of the pool. Re-enter into treated pools is prohibited above levels of 3 ppm chlorine.

**WATER BALANCE:**
Always maintain pH in the 7.2-7.4 range, total alkalinity in the 90-125 ppm range and calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Make necessary adjustments with the appropriate pool care products.

**PRECAUTIONARY STATEMENTS**
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**
**DANGER:**
Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

**CHEMICAL HAZARDS:**
**DANGER:**
Strong oxidizing agent. Use only clean, dry utensils. Mix only with water. Contamination with moisture, dirt, organic matter, or other chemicals (including other pool chemicals), or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of the fumes and explosion. Avoid any contact with fluming or burning material, such as a dental syringe. Do not use this product in any equipment device which has been used with any energetic or unstable and chlorinating compounds (e.g. caustic hypochlorite). Such use may cause fire or explosion.

**ENVIRONMENTAL HAZARD:**
This pesticide is toxic to fish and aquatic organisms.

**STORAGE AND DISPOSAL:**
Store your product in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flames. Do not reuse or refill empty container. DISPOSAL: If empty, handle it safely. Do not reuse or refill this container. Place in trash or offer for recycling, if available. If not, follow all local regulations. Call your local waste disposal agency for specific instructions. Never place unused product down any indoor or outdoor drain.

**EMERGENCY HANDLING:**
Contact local poison control center or doctor immediately for treatment advice. Burns are prevented by a highly viscous material in an unusual burn area.

**NOTICE TO PHYSICIAN**
Probable mucosal damage may contraindicate the use of gastric lavage.
