PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE AND SKIN BURNS. MAY BE FATAL IF ABSORBED THROUGH THE SKIN OR SWALLOWED. MAY CAUSE ALLERGIC SKIN REACTION. HARMFUL IF INHALED. Do not get in eyes, on skin, or on clothing. Mixers, loaders and others exposed to this product must wear long-sleeved shirt and long pants; chemical resistant gloves such as nitrile or butyl rubber; shoes plus socks; goggles and face shield; and chemical resistant apron. Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning/maintaining Personal Protective Equipment (PPE). If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly. This product may cause skin sensitization reaction in some people.

PHYSICAL OR CHEMICAL HAZARDS
This product is corrosive to mild steel. This product as supplied evolves gas (largely carbon dioxide) slowly. To prevent buildup of pressure, the product is packaged in specially vented containers. Keep this product in the original containers when not in use. Container must be stored and transported in an upright position to prevent spilling the contents through the vent.

ENVIRONMENTAL HAZARDS
This chemical is toxic to aquatic plants, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer system without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste. Apply this pesticide only as specified on this label.

PROMEX™ EU14

ACTIVE INGREDIENTS:
- 5-Chloro-2-methyl-4-isothiazolin-3-one………………. 10.75%
- 2-Methyl-4-isothiazolin-3-one……………………… 3.60%
OTHER INGREDIENTS:……………………………….. 85.65%
TOTAL:………………………………………………… 100.00%

KEEP OUT OF REACH OF CHILDREN
DANGER
SEE SIDE PANELS FOR ADDITIONAL PRECAUTIONARY STATEMENTS

FIRST AID

IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 min. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 min. Remove contact lenses, if present, after first 5 min., then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control center or doctor. Have person sip a glass of water if able to swallow. Do not give anything to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. In case of emergency, call poison control center at 1-800-222-1222 for treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be necessary.

PESTICIDE STORAGE
Keep this product in the original container when not in use. Container must be stored and transported in an upright position to prevent spilling the contents.

PESTICIDE DISPOSAL
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING
Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple Rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip contain on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available, or reconditioning if appropriate, or puncture and dispose of in a sanitary landfill or by incineration.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage, disposal or cleaning of equipment.

ADHESIVE AND TACKIFIER PRESERVATION
Use PROMEX EU14 microlide as an in-connector preservative for the control of bacteria and fungi in solvent-borne wood preservatives and other finishing materials such as: sealers, paints, primers, concrete admixtures, and thinning agents. To ensure uniform mixing, add 1.1 pounds (0.73 kilograms) to each 1000 gallons (4545 liters) of water to be followed by subsequent maintenance dosage. Concentrates may also contain water-based resins and adhesives.

INDUSTRIAL WASTEWATER TREATMENT SYSTEMS
Use PROMEX EU14 as an in-process preservative for the control of bacteria and fungi in wastewater treatment systems associated with the manufacture of sanitary tissue, paper products, and other fiber-based products. As needed, to maintain control. Clean badly fouled systems before treatment is begun.

MICROBICIDE FOR AQUEOUS COATINGS
Use PROMEX EU14 as an in-connector preservative for the control of microbial biofilms, bacteria, fungi, algae, and inorganic and organic growth in coating systems. Increased frequency of treatment may be required depending upon rate of dilution of the preservative with the fluid/emulsion used. Add 0.1 pounds (0.05 kilograms) of PROMEX EU14 to each 1000 gallons (4545 liters) of fluid to be followed by subsequent maintenance dosage.

INDUSTRIAL WASTEWATER TREATMENT SYSTEMS
Use PROMEX EU14 as an in-process preservative for the control of microbial biofilms, bacteria, fungi, algae, and inorganic and organic growth in coating systems. Increased frequency of treatment may be required depending upon rate of dilution of the preservative with the fluid/emulsion used. Add 0.1 pounds (0.05 kilograms) of PROMEX EU14 to each 1000 gallons (4545 liters) of fluid to be followed by subsequent maintenance dosage.

MICROBICIDE FOR AQUEOUS COATING SYSTEMS
Use PROMEX EU14 as an in-process preservative for the control of microbial biofilms, bacteria, fungi, algae, and inorganic and organic growth in coating systems. Increased frequency of treatment may be required depending upon rate of dilution of the preservative with the fluid/emulsion used. Add 0.1 pounds (0.05 kilograms) of PROMEX EU14 to each 1000 gallons (4545 liters) of fluid to be followed by subsequent maintenance dosage.

MICROBICIDE FOR MILK SYSTEMS
Use PROMEX EU14 as a microbicidal preservative for milk systems. This will provide 0.87 pounds (49.3 kilograms) per 1000 gallons (4545 liters) of fluid to be followed by subsequent maintenance dosage. Increased frequency of treatment may be required depending upon rate of dilution of the preservative with milk mixture used. The nature and severity of contamination, level of control required, filtration effectiveness, and type of system being used will influence the treatment levels required.

MICROBICIDE FOR AQUEOUS COATINGS
For the control of bacteria, fungi, algae, and slime, use PROMEX EU14 as an in-process preservative for coatings. To ensure uniform mixing, add 1.1 gallons (4.1 liters) per 1000 gallons (4545 liters) of fluid in the system weekly or as needed to maintain control. Clean badly fouled systems before treatment is begun.

MICROBICIDE FOR MILK SYSTEMS
Use PROMEX EU14 as an in-process preservative for milk systems. This will provide 0.87 pounds (49.3 kilograms) per 1000 gallons (4545 liters) of fluid to be followed by subsequent maintenance dosage.
