Total: 100.00%

NOTE:

1. To disinfect inanimate, hard non-porous surfaces apply 3 ounces of this product per 5 gallons of water. Apply solution with a cloth, sponge or hand pump trigger sprayer so as to cover all contaminated areas. Let stand for 10 minutes, then remove excess liquid. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. Surfaces which may contact food must be rinsed thoroughly with potable water after use. For low pressure sprayer and canister applications, spray 6-8 inches from the contaminated area.

2. To control mold and mildew on pre-cleaned, hard, non-porous surfaces add 3 ounces of this product per 5 gallons of water. Apply solution with a coarse sprayer and hand pump trigger sprayer applications, spray 6-8 inches from the contaminated area. Let stand for 10 minutes, then remove excess liquid. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. Surfaces which may contact food must be rinsed thoroughly with potable water after use. Note: This product is not recommended for use on porous surfaces or those areas that are prone to water damage.

3. When used as directed, this product is effective against common viruses, bacteria, fungi, and yeast. It is not designed for use on body tissues.

4. If a tag or label indicates a clean-in-place (CIP) procedure is required, the manufacturer's directions are to be followed.

5. This product is formulated to disinfect hard, non-porous, inanimate environmental surfaces: floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic, ceramic tile, plastic, glass, and fiberglass. It is not designed for use on soft surfaces, painted surfaces, or sealed plastic.

6. Colorfastness: This product is formulated to be colorfast when properly used as directed. Therefore, it is recommended that products be pre-treat tested to verify colorfastness prior to use. This product is not effective in removing oil based stains. To remove oil based stains, it is recommended that the surface be thoroughly cleaned with an oil based cleaner prior to the application of this product.

7. Special Instructions for Cleaning and Decontamination of Blood/Bodily Fluids:

The following procedures must be followed:

A. Blood and other body fluids must be thoroughly cleaned and disinfected using this product before being moved into containers for disposal. When using this product to clean and disinfect blood/body fluids, follow the label directions for use. This product is an effective decontaminant of blood/body fluids.

B. When blood/body fluids are handled in a non-porous environment, such as a vehicle, the non-porous area must be thoroughly cleaned and disinfected before transportation. If the vehicle is loaded with non-porous items, the floor and seat must be thoroughly cleaned and disinfected before transportation. This product is an effective decontaminant of blood/body fluids.

C. The removal of blood/body fluids from porous environments is not recommended. When removing blood/body fluids from porous environments, the porous area should be thoroughly cleaned and disinfected before disposal. This product is an effective decontaminant of blood/body fluids.

D. When removing blood/body fluids from porous environments, the porous area should be thoroughly cleaned and disinfected before disposal. This product is an effective decontaminant of blood/body fluids. When removing blood/body fluids from porous environments, the porous area should be thoroughly cleaned and disinfected before disposal. This product is an effective decontaminant of blood/body fluids.

E. When removing blood/body fluids from porous environments, the porous area should be thoroughly cleaned and disinfected before disposal. This product is an effective decontaminant of blood/body fluids.

F. When removing blood/body fluids from porous environments, the porous area should be thoroughly cleaned and disinfected before disposal. This product is an effective decontaminant of blood/body fluids.

G. When removing blood/body fluids from porous environments, the porous area should be thoroughly cleaned and disinfected before disposal. This product is an effective decontaminant of blood/body fluids.

H. When removing blood/body fluids from porous environments, the porous area should be thoroughly cleaned and disinfected before disposal. This product is an effective decontaminant of blood/body fluids.
