Kills Clostridium Difficile Sories in 4 minutes:

Disinfects with ease:

• Kills C. diff spores to 99.99999% effective in 4 minutes
• Kills Clostridium perfringens spores in 4 minutes
• Kills Norovirus (V-1) and Hepatitis A virus
• Protects against Salmonella, Staphylococcus aureus, Klebsiella pneumoniae, and influenza
• Protects against Avian influenza, SARS-CoV-2, and other coronaviruses

Preparation of Disinfectant Solution:

• Use PUR:ONE as a Healthcare disinfectant solution at a level of 4306 ppm available chlorine.
• Use as a Healthcare disinfectant solution at a level of 100 ppm available chlorine.

Preparation of Solution:

1. Measure 1 cup (240 mL) of PUR:ONE into a clean 1-gallon container.
2. Add 1 gallon (3,840 mL) of water to the container.
3. Mix the solution thoroughly to achieve the desired concentration.
4. Apply the solution with a mop, cloth, sponge, or sprayer to the surface to be disinfected.
5. Allow the surface to remain wet for the appropriate contact time. (Refer to Dilution Chart for contact time.)
6. Rinse the surface thoroughly with water, or allow to air dry.

Preparation of Dilution Chart:

- Use PUR:ONE at a level of 4,306 ppm available chlorine.
- Use PUR:ONE at a level of 100 ppm available chlorine.
- Use PUR:ONE as a Healthcare disinfectant solution at a level of 4,306 ppm available chlorine.

Cleanliness: Pur:one is effective as a Healthcare disinfectant solution on non-porous surfaces in the following settings:

- Healthcare facilities: Hospitals, nursing homes, medical and dental offices and clinics, operating rooms, isolation wards, and medical research facilities.
- Food processing and food handling operations can help ensure the quality of the final product.
- Pre-cleaned and disinfected according to federal, state and local regulations for infectious waste disposal.

Containers:

- Use the pre-cleaned and disinfected according to federal, state and local regulations for infectious waste disposal.
- Use the pre-cleaned and disinfected according to federal, state and local regulations for infectious waste disposal.

Storage and Disposal:

- Store in a cool, dry, well-ventilated area.
- This product must be disposed of on-site, or at the facility where it was used.
- The label must remain with the container.
- The container must not be mixed with other chemicals or disposed of in a sanitary landfill.
- Do not contaminate drains or water.
