Here are a few reminders. If you need additional help we’re here!

How quickly will it start to work? You may also call 1-800-224-7387 for emergency medical treatment information.

The collar must be worn loosely to allow for growth of the dog and to permit the collar to move about the neck. The collar must be worn continuously to remain effective, and a new one should be replaced every 6 months.

The collar uses sustained release technology releasing the active ingredient at a steady rate up to 6 months. The dog’s skin and coat providing full body protection. The active ingredient, Deltamethrin, kills fleas and ticks by direct contact with the surface at a certain rate. Friction will not affect the rate of release for the active.

No, a standard collar should not rub the ingredients off the collar as a second collar, will the standard fabric and reduce its effectiveness? Collar as a second collar, will the standard fabric and reduce its effectiveness?
