**Prowler**

**PLACE PACS**

**KILLS RATS, MICE & MEADOW VOLES**

**Net Weight:** 4.1 lbs (1.87 kg)

22 x 3 oz (85 g) Place Pacs

**ACTIVE INGREDIENT:**

Bromethalin (CAS #63333-35-7): 0.01%

**OTHER INGREDIENTS:** 99.99%

†Contains Denatonium Benzolate

**TOTAL:** 100.00%

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

See back panels for First Aid, additional Precautionary Statements, and Directions for Use.

Photo may not be representative of a label-consistent bait placement.
3. Dispose of product container and unused, spoiled or unconsumed bait as specified on this label. Wherever children, pets, non-target mammals or birds may have access to the bait placement location.

2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in areas prone to vandalism. This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon products that have eaten this bait. Do not apply bait to aquatic organisms in water adjacent to treated areas. Do not contaminate water when using this product. Do not contaminate water, food or feed by storage or disposal.

NOTE TO PHYSICIAN OR VETERINARIAN
Contains the nerve poison bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of a symptomatic and supportive care.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals
CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear shoes plus socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements
Follow manufacturer’s instructions for cleaning maintain PPE. If no such instructions for washables exists, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

DIRECTIONS FOR USE
This product is extremely toxic to mammals and birds. Do not sell this product in individual containers holding less than 4 pounds of bait.

Do not broadcast bait. Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats, mice or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concaved places, between floors and walls, or in locations where signs of rodents have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:
The active ingredient in this product is different from anticoagulant rodenticides. Individual rats and mice typically feed less or cease feeding altogether after consuming a toxic dose.

Rats: Place 1 to 2 place pacs per placement. Space placements at intervals of 15- to 30- feet. Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

Mice and Meadow Voles*: Place 1 place pac per bait placement. Space placements at intervals of 8- to 12- feet in interested areas. Up to two place pacs may be used at points of extremely high mouse or meadow vole activity. 

Baiting Strategy:
Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity.

Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one night’s feeding will usually provide a lethal dose for mice and rats, maintain bait for at least one week to provide all individuals a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

FOLLOW-UP: Replace contaminated or spoiled bait immediately Wearing waterproof gloves, collect and dispose of all dead, exposed animals and leftover bait. To discourage redistribution, limit sources of rodent food, water, and harborage as much as possible. If reinstatement occurs, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish them as needed.

*Not permitted for use against the following species in California: Cotton rat; Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat; Neotoma albigula, Southern plains woodrat; Neotoma micropus, and Mexican woodrat. (Neotoma mexicana). This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

Burrowing bait with PROWLER Place Pacs is prohibited.

Do not place bait near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

This product is extremely toxic to mammals and birds. Do not sell this product in individual containers holding less than 4 pounds of bait.
