Precautionary Statements

HAZARDS TO HUMANS. Warning: Causes substantial but temporary eye injury. Do not get in eyes or on skin or clothing. Harmful if swallowed. Harmful if absorbed through skin. Avoid contact with skin. Wash thoroughly with soap and warm water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

HAZARDS TO DOMESTIC ANIMALS. For external use on dogs only. Do not use on animals other than dogs. Do not use on puppies under seven weeks of age or weighing less than 5 lbs. Do not use this product on dogs’ eyes or mouth. As with all products, consult your veterinarian before using this product on sensitive, debilitated, aged, pregnant or nursing animals. Individual sensitivities, while rare, may occur after using any pesticide product for dogs. If signs occur, or become more severe, consult a veterinarian immediately. If your animal is on medication, consult your veterinarian immediately. If your animal is on medication, consult your veterinarian after using this or any other product.

Individual sensitivities, while rare, may occur after using ANY pesticide product on medicated, debilitated, aged, pregnant or nursing animals. Even after bathing, swimming, or exposure to sunlight or rain. Monthly treatments are required for optimal control and prevention of fleas and ticks.

Environmental Hazards

This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. Do not apply directly to water. Do not contaminate water when disposing of pesticide or packaging.

First Aid

IF IN EYES: Hold one open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, and continue rinsing eye. • Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Remove contaminated clothing if possible. Rinse skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If partly filled: Call your local solid waste agency for disposal instructions.

IF IN EYES: • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • If persisting or严重, call a poison control center or doctor for treatment advice.

IF SWALLOWED: • Do not induce vomiting unless told to do so by the poison control center or doctor. • Call a poison control center or doctor for treatment advice.

Questions or medical emergency: 1-800-224-7387

How to Apply:

1. Remove tube from the package. Separate one tube from the others. Hold the tube with notched end pointing away from the face and body. Tie scissors to cut-off the narrow end of the notches along the line.

2. Squirt tube firmly to apply all of the solution to the dog’s skin from the back of the neck to a point midway between the neck and tail.

For Dogs Weighing 95 lbs. or greater: Do not apply to dogs weighing less than 55 lbs. Do not use two tubes on dogs greater than 55 lbs. Apply one tube 4.0 mL (0.135 fl oz) directly to skin as a line starting from the back of the neck to a point midway between the neck and tail.

Frequency of Application

PetArmor Max for Dogs kills fleas within 12 hours of application and lasts for up to 4 weeks. This product reduces infestations of fleas. This product is waterproof and remains effective, even after bathing, swimming, or exposure to sunlight or rain. Monthly treatments are required for optimal control and prevention of fleas and ticks.

Side Effects: Monitor your dog after application. Side effects may include signs of skin irritation such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting, or diarrhea have also been reported. If these or other side effects (such as lethargy or agitation) occur, consult your veterinarian or call 1-800-224-7387.
