TO CLEAN AND DISINFECT HARD, NONPOROUS SURFACES:

Turn nozzle counterclockwise to ON. Spray 6–8 inches from surface and allow product to penetrate tough stains and messes. Let stand 30 seconds. Wipe with a wet sponge or cloth and rinse with water. No scrubbing required. For heavily soiled surfaces, pre-clean surface before disinfecting. Prolonged contact with metal, old porcelain or worn plastic laminate may cause discoloration. To spray every drop: Tilt bottle at a downward angle while spraying.

To refill: Turn trigger on spray bottle counterclockwise and pull upward to remove. After refilling spray bottle, replace trigger by aligning red tip on trigger to small opening inside bottle and push down.
