SEASON-LONG
WEED PREVENTER

Agricultural Chemical: Do not ship or store with food, feeds, drugs, or clothing. Read the entire label. Use only according to label directions.

This product will provide control of crabgrass and control or suppression of other listed grass and broadleaf weeds when applied prior to their germination.

WEEDS CONTROLLED OR SUPPRESSED do not prevent germination. In addition, this product provides postemergence control of seedling crabgrass after germination and emergence. Postemergence Control of Crabgrass:

SPRING APPLICATION

APPLICATION TIMING

bluegrass, annual barley

In newly established lawns of Kentucky bluegrass, perennial ryegrass and/or tall fescue, this product may be applied two weeks after the first sign of germination.

In established lawns, this product may be applied at any time after crabgrass germination. For best results, cultural practices that disturb the soil, such as core-, spike-, or hydro-aerification, and verticutting, should be done before reseeding, overseeding or sprigging.

Do not apply this product later than 4 weeks after crabgrass germination.

This product, containing Dimension® herbicide, can be applied 4 weeks later than other crabgrass preventers and provides up to 4 months of crabgrass control.

For best results, cultural practices that disturb the soil, such as core-, spike-, or hydro-aerification, and verticutting, should be done before reseeding, overseeding or sprigging.

For best results, apply this product evenly and uniformly by 1/2 inch of rainfall or sprinkler irrigation. Erratic weed control may result if not activated by rainfall or irrigation within 30 days after application.

This product may be applied with drop or rotary-type spreaders designed to apply granular herbicides. For best results, apply this product evenly and uniformly.

1. Refund of purchase price paid by buyer or user for product bought, or
2. Replacement of amount of product used.
