KILLS surfaces. Do not spray into the air. Test in an inconspicuous area before applying. Wash thoroughly after application may cause damage. Repeat spraying as necessary but not more than once per week.

HELP YOURSELF TO:

• Remove or cover exposed food and utensils. Cover exposed countertops and other food related surfaces. Use a Raid® Ant or Roach Killer spray or apply directly to water. Do not use on edible crops.

• Remove food spills and exposed food. Store food in sealed containers. Spray rugs and carpets where infestations are bad. Delicate fabrics should be tested for staining in an inconspicuous area prior to use.

• Dust, blot, or apply directly to the spot to kill listed bugs. Dusting is best on flat surfaces such as kitchen countertops, baseboards, and other flat, horizontal surfaces. Be cautious about wetting tender foliage, young leaves, and other sensitive plants.

• Turn the nozzle on the reusable auto trigger to the on position. Sprays insecticide evenly at a consistent rate. Spray directly to kill or destroy or clean thoroughly. Spray pet resting quarters. Adult Fleas and Larvae contacted by spray will be killed. Put pets in a separate room while spraying, or move them to a covered cage while using.

ATTACK BUGS

Use This Product To:

• Remove food spills and exposed food. Store food in sealed containers. Spray rugs and carpets where infestations are bad. Delicate fabrics should be tested for staining in an inconspicuous area prior to use.

• Remove or cover exposed food and utensils. Cover exposed countertops and other food related surfaces. Use a Raid® Ant or Roach Killer spray or apply directly to water. Do not use on edible crops.

• Dust, blot, or apply directly to the spot to kill listed bugs. Dusting is best on flat surfaces such as kitchen countertops, baseboards, and other flat, horizontal surfaces. Be cautious about wetting tender foliage, young leaves, and other sensitive plants.

• Turn the nozzle on the reusable auto trigger to the on position. Sprays insecticide evenly at a consistent rate. Spray directly to kill or destroy or clean thoroughly. Spray pet resting quarters. Adult Fleas and Larvae contacted by spray will be killed. Put pets in a separate room while spraying, or move them to a covered cage while using.

INDOORS:

Spray resting areas. Insects may be killed on contact. If necessary, apply additional treatments. Do not spray bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area.

FLOOR:

Spray thoroughly in corners, cracks, crevices, wall edges, baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and other similar locations. Special attention to ant trails, hidden areas around sinks and storage areas, behind and crack and crevice treatment to areas where these pests crawl and hide, paying special attention to areas near food storage or preparation areas. May be used on wood, linoleum, tile, concrete, plaster, brick, drywall, and painted surfaces. Do not spray on countertops, shelves, or under sinks.

TRASH:

Spray around doors and windows and other places where pests tend to congregate. Spray areas include but are not limited to screens, window frames, eaves, porches, patios, garages and other outside areas. Do not spray on edible crops.

FURNITURE:

Spray around doors and windows and other places where pests tend to congregate. Spray areas include but are not limited to screens, window frames, eaves, porches, patios, garages and other outside areas. Do not spray on edible crops.

APPLIANCES:

Spray around doors and windows and other places where pests tend to congregate. Spray areas include but are not limited to screens, window frames, eaves, porches, patios, garages and other outside areas. Do not spray on edible crops.

CLOTHES:

Spray around doors and windows and other places where pests tend to congregate. Spray areas include but are not limited to screens, window frames, eaves, porches, patios, garages and other outside areas. Do not spray on edible crops.

CLOSET:

Spray around doors and windows and other places where pests tend to congregate. Spray areas include but are not limited to screens, window frames, eaves, porches, patios, garages and other outside areas. Do not spray on edible crops.

CARPET:

Spray around doors and windows and other places where pests tend to congregate. Spray areas include but are not limited to screens, window frames, eaves, porches, patios, garages and other outside areas. Do not spray on edible crops.

BATHROOM:

Spray around doors and windows and other places where pests tend to congregate. Spray areas include but are not limited to screens, window frames, eaves, porches, patios, garages and other outside areas. Do not spray on edible crops.

SITTING AREAS:

Spray resting areas. Insects may be killed on contact. If necessary, apply additional treatments. Do not spray bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area.
