Product Usage instructions:

1. Fill refill bottle with Raid Crawling Insect Killer by turning the nut. Remove the cap from the refill bottle, place the auto trigger on the bottle, and tighten the nut.

2. Keep the bottle upright and spray away from face. Set the reusable auto trigger to the off position and hang upside down on the hanger for storage.

3. Apply this product only as directed.

DIRECTIONS FOR USE:

- Bugs: Centipedes, Firebrats, Small Flying Moths, Stink Bugs, Sowbugs, Ground Beetles, Boxelder Bugs, Ants, Fleas, Flies, Gnats, Roaches, Ticks, Silverfish, Crickets, Spiders, Scorpions, Mosquitoes.

- TIPS:
  - KILL BUGS ON CONTACT
  - Remove food spills and expose food. Store food in sealed containers. Including entry points from outside or neighboring units.
  - Reapply spray thoroughly after spraying. Set the reusable auto trigger to the off position and hang upside down on the hanger for storage.
  - Because insects may have hidden areas around sinks and storage areas, behind baseboards, around ant trails, apply spray to shelves and in cracks and crevices. Do not spray plants directly. Spray insects directly whenever possible. Be cautious about wetting tender foliage, young plants and new growth. Do not spray plants when temperatures exceed 90°F. Over application may cause damage. Repeat spraying, remove plants from living and eating areas. Put in an area not likely to come in contact with pets, children or food. Plants can be returned to pet resting quarters. Adult Fleas and Larvae contacted by spray will be killed. Put fresh bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea control product.
  - To control Aphids, Elmleaf Beetles, Japanese Beetles, Lace Bugs, Leafminers, Mealy Bugs, Mites and Spider Mites on house plants:
    - Remove pet bedding and destroy or clean thoroughly. Spray the plant stock, wandering Jews and zinnias. When spraying plants, use a sweeping motion. Spray insects directly whenever possible. Be cautious about wetting tender foliage, young plants and new growth. Do not spray plants when temperatures exceed 90°F. Over application may cause damage. Repeat spraying, remove plants from living and eating areas. Put in an area not likely to come in contact with pets, children or food. Plants can be returned to pet resting quarters. Adult Fleas and Larvae contacted by spray will be killed. Put fresh bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea control product.
  - To control Bugs on Clothes: (1) Applications to soil or vegetation around structures; (2) Applications to lawns, turf and other vegetation; (3) Applications to building foundations up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to spot and crack-and-crevice applications only. Application is prohibited directly into flowers, roses, and other ornamentals. Spray directly to kill larvae, pupae, adult and eggs of the following: Webbing Clothes Moths, Lesser Grain Borer, Rice Weevils, Spider Beetles and Tobacco Moths. For best results, apply spray to cracks and crevices in these areas where insect pests are feeding. Keep the bottle upright and spray away from face. Set the reusable auto trigger to the off position and hang upside down on the hanger for storage.
  - Roaches: Do not apply to clothing, plants grown for sale or other commercial use. Do not spray animals directly. Do not apply to clothing, plants grown for sale or other commercial use. Do not spray animals directly.

Storage and Disposal:

- KEEP BUGS OUT
- PREVENT BUGS
- LEAVE IN DOOR OR REUSEABLE DEFENSE SYSTEM

Physical or Chemical Hazards:

- Avoid direct contact with skin and eyes. Do not breathe spray vapor.

- Do not ingest. Do not apply to drinking water systems or animal drinking water sources.

- Do not apply to food or food preparation areas.

- Do not contaminate water, food, or feed by storage and disposal. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices. Do not spray plants directly. Spray insects directly whenever possible. Be cautious about wetting tender foliage, young plants and new growth. Do not spray plants when temperatures exceed 90°F. Over application may cause damage. Repeat spraying, remove plants from living and eating areas. Put in an area not likely to come in contact with pets, children or food. Plants can be returned to pet resting quarters. Adult Fleas and Larvae contacted by spray will be killed. Put fresh bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea control product.

**Assemble Instructions:**

raidskillsbugs.com

Helps you work smarter, not harder, to fight bugs.

Do not apply this product in or on electrical equipment due to possibility of shock hazard. In calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash off the product to the ground. Applications to lawns, turf and other vegetation; (3) Applications to building foundations up to a maximum height of 3 feet. Other uses must be made of crack and crevice treatment to areas where these pests, such as ants, centipedes, crickets, scorpions and spiders may make their way into buildings. Some restrictions apply.

**Restrictions:**

**Do Not**

- Use in or on electrical equipment
- Use to control any pest not listed
- Use in or on food
- Use near or on pets
- Use on food or food-contact surfaces
- Use on edible crops
- DO NOT apply to vegetable plants
- DO NOT use on plants grown for sale or other commercial use
- Do not spray plants or other plants used for food
- Do not use on edible crops

**Precautionary Statements:**

**Reports to Humans and Domestic Animals**

**CAUTION:**

This product is extremely toxic in quantity and harmful to individuals. To prevent injury, do not allow the container to be filled with more than 80% of its total capacity. Keep out of reach of children. The product can cause serious eye irritation. It is helpful to cover or remove exposed food and food handling surfaces. Apply spray to upper surfaces of foliage. Avoid wetting blossoms if possible. Avoid spraying surrounding areas.

**WEB**

**Tricking Clothes Moths:**

Spray foundation of building up to a height of 2 to 3 feet where insects are active and may find entrance. For best results, pets should be treated with an appropriate flea and/or tick control product. Use in infested woodwork, basements, crawl spaces, attics, garages, and other pest prone areas as needed. Use as directed to destroy or clean thoroughly. Spray pet resting quarters. Adult Fleas and Larvae contacted by the product to the skin of domestic animals will be killed.

**Carpenter Ants:**

Spray into infested woodwork, basements, crawl spaces, attics, garages, and other pest prone areas as needed. Use as directed to destroy or clean thoroughly. Spray pet resting quarters. Adult Fleas and Larvae contacted by the product to the skin of domestic animals will be killed.

**Ticks and Fleas on Pet Surfaces:**

Spray resting areas. Insects coming to rest on treated surfaces will be killed. For best results, pets should be treated with an appropriate flea and/or tick control product. Use in infested woodwork, basements, crawl spaces, attics, garages, and other pest prone areas as needed. Use as directed to destroy or clean thoroughly. Spray pet resting quarters. Adult Fleas and Larvae contacted by the product to the skin of domestic animals will be killed.

**Cockroaches Firebrats, Ground Beetles, Earwigs, Silverfish, and Others:**

Spray into infested woodwork, basements, crawl spaces, attics, garages, and other pest prone areas as needed. Use as directed to destroy or clean thoroughly. Spray pet resting quarters. Adult Fleas and Larvae contacted by the product to the skin of domestic animals will be killed.

**Steps to Take Before Using:**

1. **Preparation:**
   - Cover or remove exposed food and food handling surfaces.
   - Remove all food-stuffs, utensils and shelf paper from area to be treated. Discard used utensils before washing.
   - For best results, pets should be treated with an appropriate flea and/or tick control product.
   - Use as directed to destroy or clean thoroughly.
   - Spray pet resting quarters. Adult Fleas and Larvae contacted by the product to the skin of domestic animals will be killed.

2. **Application:**
   - Scrape and remove all food that may be accessible to the pests. For best results, pets should be treated with an appropriate flea and/or tick control product.
   - Use as directed to destroy or clean thoroughly. Spray pet resting quarters. Adult Fleas and Larvae contacted by the product to the skin of domestic animals will be killed.

3. **Care:**
   - Remove all food that may be accessible to the pests. For best results, pets should be treated with an appropriate flea and/or tick control product.
   - Use as directed to destroy or clean thoroughly. Spray pet resting quarters. Adult Fleas and Larvae contacted by the product to the skin of domestic animals will be killed.

4. **Storage and Disposal:**
   - Store in a cool, dry area away from food and away from children. Throw away any unused product.
   - Apply this product to plant leaves not likely to come in contact with pets, children or food. Plants can be returned to original location when leaves are dry. If plants cannot be moved, cover or remove exposed food and food handling surfaces. Apply spray to upper surfaces of foliage. Avoid wetting blossoms if possible. Avoid spraying surrounding areas.
   - Sprays containing pyrethroids may be harmful to beneficial insects. If beneficial insects are suspected to be present in the area, use caution when applying this product.
