HOSPITAL AND GENERAL DISINFECTION

For use against a broad range of disease-causing organisms, this product can effectively clean, sanitize and disinfect hard, non-porous surfaces. This product is intended for use in healthcare facilities (e.g., hospitals, nursing homes, clinical laboratories) and other institutions where it is necessary to control the transmission of disease (HIV-1, HBV, HCV). This product is also intended for use in non-healthcare settings where it is necessary to control the transmission of disease (HIV-1, HBV, HCV), e.g., households and day care centers.

DIRECTIONS FOR USE

In use as a hospital and general disinfectant:

1. Allow hard, non-porous surfaces to remain wet for 2 minutes to kill HIV-1, HBV, and HCV.

2. Clean and disinfect hard, non-porous surfaces/objects at room temperature when used as directed:
   - Mycobacterium tuberculosis
   - Escherichia coli
   - Staphylococcus aureus
   - Enterobacter aerogenes
   - Salmonella enterica
   - Staphylococcus aureus
   - Listeria monocytogenes
   - MRSA, -with (E. coli), Staphylococcus aureus
   - Pseudomonas aeruginosa, Serratia marcescens
   - Salmonella enterica, Staphylococcus aureus,
   - Vancomycin-Resistant Enterococcus faecium (VRE)
   - Methicillin-Resistant Staphylococcus aureus (MRSA)
   - Virucidal inactivates Herpes Simplex Virus Type 1 (HSV-1), Herpes Simplex Virus Type 2 (HSV-2), Human Immunodeficiency Virus Type 1 (HIV-1)/Human T-lymphotropic Virus Type 1 (HTLV-1), and Adenovirus Type 11.
   - Disinfects polyploid and painted surfaces.

For use as a hospital and general disinfectant in health care or other settings in which there is an expected likelihood of soiling of hard, non-porous surfaces/objects with blood/body fluids, and in which the surfaces/objects likely to be soiled can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS), Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV).

For use as a hospital and general disinfectant in health care or other settings in which there is an expected likelihood of soiling of hard, non-porous surfaces/objects with blood/body fluids, and in which the surfaces/objects likely to be soiled can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS), Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV). This product should not be used in contact lenses.
