For seed treatment applications to field corn for listed insect pest control

**Active Ingredient**

Chlorantraniliprole:

3-Bromo-N-[4-chloro-2-methyl-6-[(methylamino)carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1H-pyrazole-5-carboxamide ...............50%

Other Ingredients........................................... 50%

Total..........................................................100%

Lumivia® is a flowable suspension. Contains 5.21 lb. active ingredient per gallon.

**Keep Out of Reach of Children**

Lumivia™

352-841

EPA Accepted: 06/24/2020

Label Code: A60003631

The EPA SAL includes the Master label of Lumivia CPL and Lumivia. Lumivia CPL has uses for wheat/triticale and Lumivia has uses for corn.

Final printed label based upon EPA accepted text dated June 24, 2020.

The following changes were made to the master label by amendment:

1. Added new alternate brand name: Lumivia™ CPL (Cereal Product Label)
2. Included current alternate brand names approved by EPA within brackets: Dermacor, Dermacor M (Mexico), DuPont Lumivia Insecticide Seed Treatment, Lumivia Seed Treatment Insecticide.
3. Added ABN qualifier statements for Lumivia “CPL” and Dermacor “M.”
4. Added “INSECTICIDE SEED TREATMENT” descriptor as optional text
5. Sales copy / product description: added “wheat, and triticale for listed”
6. Surface Water Advisory: added “contains chlorantraniliprole” and replaced “this product” with “chlorantraniliprole”
7. Ground Water Advisory: replaced “This chemical” with “Chlorantraniliprole”
8. Removed box from around Precautionary Statements, PPE, and Environmental Hazards to align with Corteva label formatting.
9. Adjusted all-caps headings to normal case and boldface throughout to align with Corteva Agriscience label formatting.
10. Added “refillable” optional text
11. Updated trademark statement to “®™ Trademarks of Dow AgroSciences, DuPont or Pioneer and their affiliated companies or respective owners”
12. Directions for Use:
   • Added “Read all Directions for Use carefully before applying.”
   • Added “Lumivia™ is a seed treatment product for use on field corn, wheat, and triticale to provide protection against early season injury from listed pests.”
   • Added: “Following the planting of Lumivia™ treated seed, do not apply chlorantraniliprole or other Group 28 products for 60 days. Application(s) to the next generation of target pest(s) must be with an effective product with a different mode of action (non-Group 28 insecticide).”
13. Resistance Management: added “Application(s) to the next generation of target pest(s) must be with an effective product with a different mode of action (non-Group 28 insecticide).”
14. Field Corn Seed Treatment:
   • Added heading “Field Corn Seed Treatment” plus use instructions and use rates.
   • Added two columns to Field Corn Seed Treatment table: fl oz Lumivia™ per unit of seed** and lb active ingredient per unit of seed**
   • Added footnote: “**One seed corn unit is equivalent to 80,000 seeds.”
15. Wheat and Triticale Seed Treatment: Added application directions and use rates
17. Commercial Seed Bag Labeling:
   - Updated Commercial Seed Bag Labeling section for the addition of wheat and triticale.
   - Reorganized bulleted information for clarity and flow.
   - Added “The Federal Seed Act requires that the container of seed treated with Lumivia™ must be labeled with the following information:”
   - Added bullet point: “This seed has been treated with Lumivia™ which contains chlorantraniliprole.”
   - Added bullet point: “User is responsible for ensuring that the seed container meets all requirements under the Federal Seed Act.”
   - Added “In addition, the U.S. Environmental Protection Agency requires the following statements on the container of seed treated with Lumivia™:”
   - Added bullet point: “Do not exceed a maximum of 0.054 lb chlorantraniliprole per acre (25 grams ai/acre) regardless of field corn, wheat, or triticale seeding density.
   - Added bullet point: “Following the planting of Lumivia-treated seed, total foliar applications for a crop must not exceed a total rate of 0.146 lb chlorantraniliprole per acre. Soil applications of products containing chlorantraniliprole are not permitted if Lumivia/chlorantraniliprole-treated seeds are planted.
   - Added “This field corn seed has been treated with chlorantraniliprole at 0.XX [up to 0.132] lb ai per 80,000 seeds.”
   - Added “This wheat or triticale seed has been treated with chlorantraniliprole at 0.XX [up to 0.03] lb ai per 100 lbs of seed.”
   - Added bullet point: “Do not apply more than 0.2 lb ai of chlorantraniliprole-containing products per acre per year.”
   - Added bullet point: “Plant wheat and triticale seeds treated with chlorantraniliprole at a soil depth of 0.5 to 1.5 inches.”
   - Added bullet point: “Do not contaminate water bodies when disposing of planting equipment washwaters.”
   - Added “[Not registered for use in California on wheat and triticale.]”
Keep Out of Reach of Children

Precautionary Statements
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Hazards to Humans and Domestic Animals
When used as directed this product does not present a hazard to humans or domestic animals.

Personal Protective Equipment (PPE)
Applicators and other handlers must wear:
• Long-sleeved shirt and long pants.
• Shoes plus socks.

After the product has been diluted in accordance with label directions for use, shirt, pants, socks, and shoes are sufficient Personal Protective Equipment. Follow manufacturer’s instructions for cleaning/maintaining personal protective equipment (PPE). If no such instructions for washables are available, use detergent and hot water. Keep and wash PPE separately from other laundry.

First Aid
For questions regarding emergency medical treatment, you may contact 1-800-441-3637 for information.

User Safety Recommendations
Users should:
• Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Environmental Hazards
This pesticide is toxic to aquatic invertebrates, oysters, and shrimp. Do not apply directly to water. Drift and runoff may be hazardous to aquatic organisms in water adjacent to use sites.

Surface Water Advisory
This product contains chlorantraniliprole which may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. Chlorantraniliprole is classified as having high potential for reaching surface water via runoff for several months or more after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of chlorantraniliprole from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

Ground Water Advisory
Chlorantraniliprole has properties and characteristics associated with chemicals detected in ground water. This chemical may leach into ground water if used in areas where soils are permeable, particularly where the water table is shallow.

Storage and Disposal
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Do not subject to temperatures below 32 degrees F. Store product in original container only in a location inaccessible to children and pets. Do not contaminate water, other pesticides, fertilizer, food or feed in storage. Not for use or storage in or around the home.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING:
Nonrefillable container. Do not reuse or refill this container.
Triple rinse container (or equivalent) promptly after emptying. Pour rinsates into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then, for Plastic Containers, offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration. Do not burn, unless allowed by state and local ordinances. For Metal Containers, offer for recycling if available or reconditioning if appropriate or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Do not transport if container is damaged or leaking. If the container is damaged, leaking or obsolete, or in the event of a major spill, fire or other emergency, contact DuPont at 1-800-441-3637, day or night.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.

Lumivia® is a seed treatment product for use on field corn to provide protection against early season injury from listed pests.

Lumivia® is a member of the anthranilic diamide class of insecticides with a mode of action acting on insect ryanodine receptors. Lumivia® is effective through ingestion of treated plant material. After exposure to Lumivia®, affected insects will rapidly stop feeding, become paralyzed, and typically die within 1 to 3 days.

Consult your local company representative or agricultural advisor for guidance on predicted pest pressure based on historical field data for these pests in your area.

Lumivia® seed treatment must be used only in accordance with directions on this label or in separate supplemental labeling that is available as a result of new EPA approvals.

• Apply this product in commercial seed treatment facilities only. Not for use on agricultural establishments in hopper-box, planter box, slurry box, or other seed treatment applications at or immediately before planting.
• Treated seed must not be used for or mixed with food or animal feed, or processed for oil.
• Treated seed exposed on soil surface may be hazardous to aquatic invertebrates.
• Cover or collect seeds spilled during loading.
• Store treated seed away from food or feed.
• Dispose of all excess treated seed by burying seed away from bodies of water.
• Following the planting of Lumivia® treated seed, total foliar applications for a crop must not exceed a total rate of 0.146 lb chlorantraniliprole per acre. Soil applications of products containing chlorantraniliprole are not permitted.
• Following the planting of Lumivia® treated seed, do not apply chlorantraniliprole or other Group 28 products for 60 days. Application(s) to the next generation of target pest(s) must be with an effective product with a different mode of action (non-Group 28 insecticide).
• Use of Lumivia® as a seed treatment must be communicated to all personnel involved in seasonal insect control applications.

Integrated Pest Management
DuPont supports the use of Integrated Pest Management (IPM) programs to control pests. This product may be used as part of an IPM program, which can include biological, cultural, and genetic practices, aimed at preventing economic pest damage. IPM principles and practices include field scouting or other detection methods, correct target pest identification, population monitoring, rotation of insecticides with different modes-of-action, and treating when target pest populations reach locally determined action thresholds. Consult your state cooperative extension service, professional consultants or other qualified authorities to determine appropriate action treatment threshold levels for treating specific pest/crop or site systems in your area.

Resistance Management
Lumivia® is a Group 28 Insecticide. Repeated and exclusive use of Lumivia® or other Group 28 Insecticides may lead to the buildup of resistant strains of insects in some crops. Because the development of resistance cannot be predicted, this product may be used as part of resistance management strategies established for the use area. These strategies may include incorporation of cultural and biological control practices, alternation of mode-of-action classes of insecticides (non-Group 28) on succeeding generations and targeting the most susceptible life stage. Consult your local or state agricultural authorities for details.

When planting any seed treated with Lumivia®, unless directed otherwise in the specific crop/pest sections of this label, the best practices are to follow these instructions to delay the development of insecticide resistance:
• Avoid using the same mode of action (same insecticide group) on consecutive generations of insect pests.
• Apply Lumivia® or other Group 28 insecticides using a “treatment window” approach to avoid exposure of successive insect pest generations to the same mode of action.
• A “treatment window” is defined as the period of residual activity provided by single or sequential applications of products with the same mode of action.
• This “treatment window” should not exceed approximately the length of one generation of the target pest which may vary from 25 to 40 days.
• Following the planting of Lumivia® treated seed, do not apply chlorantraniliprole or other Group 28 products for 60 days. Application(s) to the next generation of target pest(s) must be with an effective product with a different mode of action (non-Group 28 insecticide).
• Following a "Group 28 treatment window," rotate to a treatment window of effective products with a different mode of action. This “Non-Group 28 Window” should approximate the duration of one generation of the target pest. Target the most susceptible insect life stages whenever possible.

If resistance develops in your area, Lumivia® or other products with a similar mode of action may not provide adequate control. If poor performance cannot be attributed to improper application or extreme weather conditions a resistant strain of insect may be present.

If you experience difficulty with control and resistance is a reasonable cause, immediately consult your local DuPont Crop Protection company representative or agricultural advisor for the best alternate method of control for your area. For additional information on insect resistance monitoring, visit the Insecticide Resistance Action Committee (IRAC) on the web at http://www.irac-online.org.

Mixing Guidance
For use in commercial seed treaters only, operating standard, calibrated seed treatment equipment. Treatment equipment must be clean and free of previous pesticide deposits before applying Lumivia®. Add Lumivia® directly to mixing tank. Mix thoroughly specified amount of Lumivia® with the required amount of water.

Add an EPA-approved dye or colorant to treat the seeds per 40 CFR 153.155(b)(1) during the seed treatment process. Ensure that all treated seed are dyed an unnatural color.

Mixing Tank Cleanout
Prior to application, start with clean, well maintained application equipment. Immediately following application, thoroughly clean all mixing equipment to reduce the risk of forming hardened deposits which might become difficult to remove.

Drain mixing equipment. Thoroughly rinse mixing equipment and flush with clean water.

Clean all other associated application equipment. Take all necessary safety precautions when cleaning equipment. Do not clean near wells, water sources, or desirable vegetation. Dispose of waste rinse water in accordance with local regulations.

Application
Lumivia® may be applied as a water-based slurry with other registered seed treatment fungicides and insecticides. Potential mixing partners should be tested for physical compatibility with Lumivia® and added dyes or polymers before mixing in a large tank for seed treatment. Avoid mixtures of several materials and very concentrated spray mixtures. Follow the most restrictive of the labeling limitations and precautions of all products used in mixtures. Do not mix this product with any product that prohibits such mixing.

Field Corn Seed Treatment
Lumivia® will provide protection against early season injury to corn from wireworms, white grubs, black cutworms, seedcorn maggots, and fall armyworm.
Plant field corn seeds treated with Lumivia® at a soil depth of 1.5 to 2 inches. Treated field corn seed exposed on soil surface may be hazardous to aquatic invertebrates. Cover or collect treated field corn seeds spilled during loading.

Field corn seed treated with Lumivia® may be replanted if an emergency replanting due to crop failure occurs.

### Use Rates

Use Lumivia® as directed to listed crop seeds in the following use-rate table for control of listed insects.

<table>
<thead>
<tr>
<th>Seed Crop</th>
<th>Pest *</th>
<th>mg active ingredient / seed</th>
<th>fl oz Lumivia® per unit of seed**</th>
<th>lb active ingredient per unit of seed**</th>
</tr>
</thead>
<tbody>
<tr>
<td>Field corn</td>
<td>Black cutworms, Fall armyworm, Seedcorn maggots, White grubs, Wireworms</td>
<td>0.25 to 0.75 mg</td>
<td>1.08 to 3.25 fl oz</td>
<td>0.044 to 0.132 lb</td>
</tr>
</tbody>
</table>

* Use the higher rates in areas that are predicted to have high pest pressure.  ** One corn seed unit is equivalent to 80,000 seeds.

### Restrictions:

Do not exceed a maximum of 0.054 lb chlorantraniliprole per acre (25 grams ai/acre) regardless of field corn seeding density. Do not apply more than 0.2 lb ai of chlorantraniliprole-containing products per acre per year.

### Crop Rotation

Crops on this label and the following crops or crop groups may be planted immediately following harvest:

- Artichoke, globe; Asparagus; Banana/Plantain; Brassica (Cole) Leafy Vegetables (Crop Group 5); Bulb Vegetables (Crop Group 3-07); Bushberry subgroup (Crop subgroup 13-07B); Cacao; Canberry subgroup (Berry and Small Fruit Crop Group subgroup 13-07A); Cereal Grains (Crop Group 15); Forage, Fodder, and Straw of Cereal Grains (Crop Group 16); Citrus (Crop Group 10-10); Coffee; Corn (field, pop, seed, and sweet); Cotton; Cucurbit Vegetables (Crop Group 9); Figs; Fruiting Vegetables (Crop Group 8-10); Grass Forage, Fodder, and Hay Group (Crop Group 17); Herbs subgroup (Crop Group subgroup 19A); Grape; Hops; Large Shrub/Tree Berry subgroup (Crop subgroup 13-07C); Leafy Vegetables (nonbrassica, Crop Group 4); Legume Vegetables (Crop Group 6); Foliage of Legume Vegetables (Crop Group 7); Low Growing Berry subgroup (Crop subgroup 13-07G); Nongrass Animal Feeds (Forage, Fodder, Straw, and Hay Crop Group 18); Okra; Oliseed Group (Crop Group 20); Olives; Peanut; Persimmons; Pome Fruits (Crop Group 11-10); Pineapple; Pomegranates; Prickly Pear Cactus; Rice; Root and Tuber Vegetables (Crop Group 1); Leaves of Root and Tuber Vegetables (Crop Group 2); Small Fruit Vine Climbing subgroup, except fuzzy kiwifruit (Berry and Small Fruit Crop Group subgroup 13-07F); Soybean; Spice subgroup (Crop Group subgroup 19B); Spearmint and Peppermint; Stone Fruits (Crop Group 12-12); Sugarcane; Tea; Tree Nuts and Pistachio (Crop Group 14); Tobacco; and Tropical Fruits. All other crops cannot be planted until 12 months after the last planting of Lumivia®-treated seed.

### Commercial Seed Bag Labeling

The Federal Seed Act requires that the container of seed treated with Lumivia® must be labeled with the following information:

- This seed has been treated with Lumivia®, which contains chlorantraniliprole.
- Do not use for food, feed, or oil processing.
- User is responsible for ensuring that the seed container meets all requirements under the Federal Seed Act.

In addition, the U.S. Environmental Protection Agency requires the following statements on the container of seed treated with Lumivia®:

- Do not exceed a maximum of 0.054 lb chlorantraniliprole per acre (25 grams ai/A) regardless of field corn seeding density.
- Following the planting of Lumivia-treated seed, total foliar applications for a crop must not exceed a total rate of 0.146 lb chlorantraniliprole per acre. Soil applications of products containing chlorantraniliprole are not permitted if Lumivia/chlorantraniliprole-treated seeds are planted.
- This field corn seed has been treated with chlorantraniliprole at 0.XX [up to 0.132] lb ai per 80,000 seeds.
- Do not apply more than 0.2 lb ai of any chlorantraniliprole-containing products per acre per year.
- Do not apply other seed treatment products to seed already treated with Lumivia.
- Use of Lumivia-treated seed must be communicated to all personnel involved in seasonal insect control applications.
- Plant field corn seeds treated with Lumivia at a soil depth of 1.5 to 2 inches.
- Following the planting of Lumivia-treated seed, do not apply chlorantraniliprole or other Group 28 products for 60 days. Application(s) to the next generation of target pest(s) must be with an effective product with a different mode of action (non-Group 28 insecticide).
Commercial Seed Bag Labeling (Cont.)

- Treated seed exposed on soil surface may be hazardous to aquatic invertebrates. Ensure planted seed is covered with soil. Cover or collect spilled seeds.
- Store away from food or feed.
- Dispose of all excess treated seed by burying seed away from bodies of water.
- Do not contaminate water bodies when disposing of planting equipment washwaters.
- **Surface Water Advisory:** This product contains chlorantraniliprole which may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. Chlorantraniliprole is classified as having high potential for reaching surface water via runoff for several months or more after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of chlorantraniliprole from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.
- **Ground Water Advisory:** Chlorantraniliprole has properties and characteristics associated with chemicals detected in ground water. This chemical may leach into ground water if used in areas where soils are permeable, particularly where the water table is shallow.
- Field corn seed treated with Lumivia may be replanted if an emergency replanting due to a crop failure occurs.

**Crop Rotation**

Crops on this label and the following crops or crop groups may be planted immediately following harvest:  
- Artichoke, globe;  
- Asparagus;  
- Banana/Plantain;  
- Brassica (Cole) Leafy Vegetables (Crop Group 5);  
- Bulb Vegetables (Crop Group 3-07);  
- Bushberry subgroup (Crop subgroup 13-07B);  
- Cacao;  
- Caneberry subgroup (Berry and Small Fruit Crop Group subgroup 13-07A);  
- Cereal Grains (Crop Group 15);  
- Forage, Fodder, and Straw of Cereal Grains (Crop Group 16);  
- Citrus (Crop Group 10-10);  
- Coffee;  
- Corn (field, pop, seed, and sweet);  
- Cotton;  
- Cucurbait Vegetables (Crop Group 9);  
- Figs;  
- Fruiting Vegetables (Crop Group 8-10);  
- Grass Forage, Fodder, and Hay Group (Crop Group 17);  
- Herbs subgroup (Crop Group subgroup 19A);  
- Grape;  
- Hops;  
- Large Shrub/Tree Berry subgroup (Crop subgroup 13-07C);  
- Leafy Vegetables (nonbrassica, Crop Group 4);  
- Legume Vegetables (Crop Group 6);  
- Foliage of Legume Vegetables (Crop Group 7);  
- Low Growing Berry subgroup (Crop subgroup 13-07G);  
- Nongrass Animal Feeds (Forage, Fodder, Straw, and Hay Crop Group 18);  
- Okra;  
- Oilseed Group (Crop Group 20);  
- Olives;  
- Peanut;  
- Persimmons;  
- Pome Fruits (Crop Group 11-10);  
- Pineapple;  
- Pomegranates;  
- Prickly Pear Cactus;  
- Rice;  
- Root and Tuber Vegetables (Crop Group 1);  
- Leaves of Root and Tuber Vegetables (Crop Group 2);  
- Small Fruit Vine Climbing subgroup, except fuzzy kiwifruit (Berry and Small Fruit Crop Group subgroup 13-07F);  
- Soybean;  
- Spice subgroup (Crop Group subgroup 19B);  
- Spearmint and Peppermint;  
- Stone Fruits (Crop Group 12-12);  
- Sugarcane:  
- Tea;  
- Tree Nuts and Pistachio (Crop Group 14);  
- Tobacco;  
- and Tropical Fruits.  

All other crops cannot be planted until 12 months after the last planting of chlorantraniliprole-treated seed.

**Limitation of Warranty and Liability**

**NOTICE TO BUYER —** Purchase of this material does not confer any rights under patents of countries outside of the United States.

**NOTICE:** Read this Limitation of Warranty and Liability Before Buying or Using This Product. If the Terms Are Not Acceptable, Return the Product at Once, Unopened, and the Purchase Price Will Be Refunded.

DuPont will not be responsible for losses or damages resulting from use of this product in any manner not specifically published by DuPont and stated on this label or other labels or recommendations which conform with Section 2(ee) of the Federal Insecticide, Fungicide and Rodenticide Act. User assumes all risks associated with such non-specified use.

It is impossible to eliminate all risks associated with the use of this product. Such risks arise from weather conditions, soil factors, off target movement, unconventional farming techniques, presence of other materials, the manner of use or application, or other unknown factors, all of which are beyond the control of DuPont. These risks can cause: ineffectiveness of the product, crop injury, or injury to non-target crops or plants. **WHEN YOU BUY OR USE THIS PRODUCT, YOU AGREE TO ACCEPT THESE RISKS.**

DuPont warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for the purpose stated in the Directions for Use, subject to the inherent risks described above, when used in accordance with the Directions for Use under normal conditions.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, DUPONT MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO EVENT SHALL DUPONT OR SELLER BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. **BUYER’S OR USER’S BARGAINED-FOR EXPECTATION IS CROP PROTECTION. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER AND THE EXCLUSIVE LIABILITY OF DUPONT OR SELLER, FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY OR CONTRACT, NEGLIGENCE, TORT OR STRICT LIABILITY), WHETHER FROM FAILURE TO PERFORM OR INJURY TO CROPS OR OTHER PLANTS, AND RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT, OR AT THE ELECTION OF DUPONT OR SELLER, THE REPLACEMENT OF THE PRODUCT.**
Limitation of Warranty and Liability (Cont.)

To the extent consistent with applicable law that allows such requirement, DuPont or its Ag Retailer must have prompt notice of any claim so that an immediate inspection of buyer’s or user’s growing crops can be made. Buyer and all users shall promptly notify DuPont or a DuPont Ag Retailer of any claims, whether based on contract, negligence, strict liability, other tort or otherwise, or be barred from any remedy.

This Limitation of Warranty and Liability may not be amended by any oral or written agreement.
