SANI-PAC 22 is a peracetic acid-based microbicide developed for Bacteria, Fungi, Slime and O odor Control in Agricultural Waters.

ACTIVE INGREDIENT: Peracetic Acid 21.5%, Hydrogen Peroxide 5.0%

INERT INGREDIENTS: 73.5%, TOTAL 100.0%

Pesticide Disposal: Peracetic acids are weakly hazardous. Improper disposal of excess pesticide, spray mists, or mist in a solution of Peracetic Acid. These wastes cannot be disposed of by using label instruction. Contact your State or Provincial Pest Control Agency, or Waste Disposal Service. Peracetic Acid is not hazardous in the amount used in agricultural waters.

Agricultural Use Requirements

GENERAL INFORMATION

This product can be used to control disease of vegetables and crops in the following ways:

- Application to bare soil
- Application to hard surfaces
- Application to foliage and leaves

ECOTERRORISM

Contamination of contaminated waters and agricultural operations with escape pests may occur and must be prevented. Do not dispose of tank, container or mix equipment or a mix tank or store rinsate for later use or disposal. This procedure must be performed for at least 5 minutes. The use of a chlorination step may be required to ensure that all pesticide residues have been removed. After the chlorination step, do not use the mixture for any other agricultural or horticultural use.的方向

The product may be used to control tomato blight and other diseases caused by fungi and bacteria. Do not use on non-food crops, such as tobacco, cotton, or peanuts.

Agricultural Uses

Use this product in accordance with the label directions prior to use. At temperatures exceeding 100°F, the product may become overconcentrated, which can affect its efficacy. The use of cool water can help to control the concentration of the product.

Precautions for handling:

1. Wear protective clothing and equipment, such as gloves, eye protection, and a respirator.
2. Handle the product in a well-ventilated area.
3. Do not eat, drink, or smoke while handling the product.
4. Avoid exposure to the skin and eyes.

Environmental Hazards:

This product is toxic to birds, fish and aquatic invertebrates. Caution must be used when applying it because it may be lethal. Do not apply this product to any body of water where it may contaminate fish or aquatic invertebrates.

Storage:

Store the product in a cool, dry place, and protect from direct sunlight. Do not store the product in a location where it may come into contact with food or water.

Directions for Use:

1. Dilute the product with water in accordance with the label directions.
2. Apply the diluted product to the desired area using a backpack sprayer, ground or aerial applicator.
3. Ensure that the application area is thoroughly wetted.
4. Avoid spraying near water bodies or other sensitive areas.

Waste Management:

Waste from the application of this product must be managed in accordance with local regulations. Contact your local environmental agency for guidance.

Hazard Levels:

This product contains active ingredients that are toxic to birds, fish, and aquatic invertebrates. Caution must be used when applying it to water bodies or other sensitive areas.

Storage and Disposal:

Do not contaminate water, food, or feed storage areas with this product. Do not dispose of this product on or into landfills. Do not dispose of this container in the normal trash.

STORAGE:

Store in original container with cap tightly closed, in a cool, dry, well ventilated area away from food and feed storage areas. Do not store the product in a location where it may come into contact with food or water.

INFORMATION:

This product contains Peracetic Acid, which is a colorless, odorless liquid. It is a strong oxidizing agent and should be handled with care. Do not inhale the vapors and avoid contact with the skin.

Non-AGRICULTURAL USES

This product is also effective in controlling disease of vegetables and crops in the following ways:

- Application to bare soil
- Application to hard surfaces
- Application to foliage and leaves

ECOTERRORISM

Contamination of contaminated waters and agricultural operations with escape pests may occur and must be prevented. Do not dispose of tank, container or mix equipment or a mix tank or store rinsate for later use or disposal. This procedure must be performed for at least 5 minutes. The use of a chlorination step may be required to ensure that all pesticide residues have been removed. After the chlorination step, do not use the mixture for any other agricultural or horticultural use.

Applications

This product can be used in the following ways:

1. Application to bare soil
2. Application to hard surfaces
3. Application to foliage and leaves
