DIRECTIONS FOR USE:

To Sanitize Food: Make sure food contact surfaces are clean before applying Sani-T-10. Surfaces must not be soiled or greasy. Sani-T-10 can be applied directly or in solution. To apply directly, use 1 oz. per 100 sq ft of food contact surface area. To apply in solution, dilute or use the product at the Total Active ingredient concentration shown on the label. (1 oz. of Sani-T-10 contains 0.01% Clorox® bleach.)

To Sanitize Meat: Remove foreign material and wash to remove gross soil. Sani-T-10 is applied as follows: 1 oz. per 100 sq ft of surface area. After solution is applied, surfaces must remain wet for 10 minutes. Wipe dry with good detergent or compatible cleaner followed by pH neutral rinse. Surfaces must remain wet for at least 1 minute or time specified in the product labeling. Where pooling of film is visible, allow the rinse to adequately drain and air dry. For general use, Sani-T-10 may be used as a deodorizer at 1 oz. per 100 sq ft of area.

GENERAL CLEANING:

Use Sani-T-10 for sanitizing hard nonporous surfaces of food processing equipment, food, utensils, dishes, tables, refrigerated storage and display equipment, and other nonporous surfaces made of stainless steel, chrome, other metals, glazed porcelain, glazed ceramic tile, and plastic. It is also an excellent food contact sanitizer for use in bars, restaurants, fast-food outlets, commercial food processing equipment, food preparation surfaces, utensils and similar hard surfaces. Sani-T-10 works best when applied to food contact surfaces. Do not use Sani-T-10 to sanitize soft surfaces or porous surfaces such as cloth, mop, sponge, or in any manner inconsistent with its labeling. This product is not intended for use as a disinfectant on any surface or instrument that (1) is introduced into normally sterile areas of the body, or (2) is ordinarily penetrated by the bloodstream or normally sterile areas of the body. The use of Sani-T-10 as a disinfectant must be thoroughly cleansed and rinsed with water before use in normally sterile areas of the body.

APPLICATION:

For use as an algicide in Swimming Pools: Add 1 oz. to 50,000 gallons of pool water. Sani-T-10 will begin working immediately. Surfaces must remain wet for at least 1 minute or time specified in the product labeling. Wipe dry with good detergent or compatible cleaner followed by a pH neutral rinse. Surfaces must remain wet for at least 1 minute or time specified in the product labeling. Where pooling of film is visible, allow the rinse to adequately drain and air dry. If visible algae are still present, or for additional algae control, add 1 oz. to 50,000 gallons of pool water and reapply after 6 hours.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

WARNING: HARMFUL IF SWALLOWED. CAUSES EYE AND SKIN IRRITATION. DANGEROUS IF INHALED. IRREVERSIBLE nervous system damage may occur if this product is breathed into the lungs. Avoid breathing mist. Handle with care. Do not inhale. Keep out of reach of children. Use in a well-ventilated area. Wear protective gloves when handling this product. Wash thoroughly with soap and water after handling.

Inhalation: Immediately move to fresh air. If not breathing, give artificial respiration. If breathing is difficult, administer oxygen. Do not give by mouth. If swallowed, do not induce vomiting. Call a poison control center or doctor for treatment advice.

IF SWALLOWED:

15-20 minutes. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:

Wash thoroughly with soap and water after handling and before eating, drinking or smoking. Do not get into eyes, on skin or on clothing. Wear protective eye wear (goggles/face shield/safety glasses) and rubber gloves. See product label for additional protective clothing information.

On contact:

Diluted or soiled. When used as directed for disinfection, processing equipment with potable water. Do not use with cloth, mop, sponge, or allow to air dry. Rinse surfaces must remain wet for ten minutes. Wipe dry

To disinfect and deodorize hard nonporous environmental surfaces, use Sani-T-10 at 1 oz. per 100 sq ft of area. For each 10,000 gallons of pool water, add 1 quart of Sani-T-10. At 1 oz. per 100 sq ft of area, Sani-T-10 has been proven effective against the pathogenic fungi Trichophyton mentagrophytes. For use as an algicide in swimming pools, Sani-T-10 is compatible with most commonly used disinfectants and sanitizers. It is not recommended for use with other sanitizing chemicals.

Sani-T-10 is effective against the following pathogenic bacteria:

- Staphylococcus aureus,
- E. coli,
- Salmonella, and
- Pseudomonas aeruginosa.

Sani-T-10 is effective against the following viruses:

- Influenza, Type A2,
- Herpes simplex Virus Type 1 and 2,
- Adenovirus (England) Virus,
- Vaccinia Virus,
- Varicella-Zoster Virus,
- Rhinovirus,
- Human immunodeficiency virus (HIV-1 and HIV-2),
- Human T-cell lymphotrophic virus (HTLV-1 and HTLV-2),
- Poliovirus Types 1, 2, and 3,
- Coxsackie virus A and B,
- Echovirus,
- Rous sarcoma virus,
- Orthomyxovirus,
- Hepatitis A virus,
- Bovine virus diarrheal virus,
- Neoehrlichia micropolymorpha,
- Candida albicans,
- Penicillium marneffei,
- Aspergillus fumigatus,
- Trichophyton mentagrophytes,
- Trichophyton rubrum,
- Trichophyton violeta,
- Trichophyton schoenleinii,
- Trichophyton tonsurans,
- Trichophyton verrucosum,
- Trichophyton sp.,
- Trichosporon beigelii,
- Trichosporon cutaneum,
- Trichosporon inkin,
- Trichosporon ovale,
- Trichosporon spp,
- Candida albicans,
- Crytococcus neoformans,
- Cryptococcus gattii,
- Aspergillus fumigatus,
- Aspergillus flavus,
- Aspergillus terreus,
- Aspergillus niger,
- Aspergillus versicolor,
- Exophiala jeanselmei,
- Exophiala spinifera,
- Exophiala radicata,
- Exophiala brevipes,
- Exophiala dermatitidis,
- Exophiala moldae,
- Exophiala claviformis,
- Exophiala crassipes,
- Exophiala cepacia,
- Exophiala swindellsii,
- Exophiala piscicola,
- Exophiala orohippuris,
- Exophiala muelleri,
- Exophiala radiata,
- Exophiala rosea,
- Exophiala nodulosa,
- Exophiala sebi,
- Exophiala oligospora,
- Exophiala putrinus,
- Exophiala ch msec C14, 30% C16, and 7% C18. INERT INGREDIENTS: Ammonia chloride ........................................... 5.0% Hydrogen peroxide ........................................... 90.0% WATER .................................................. 100.0%
