NOTE TO PHYSICIAN
Treat the patient symptomatically.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

RESTRICTIONS:
• Use only on ferrets 10 weeks and older and weighing 1 lb. or greater. Do not use on other animals.
• Do not apply more than one (1) tube per treatment.
• Do not allow children to apply the product.
• Ferrets should be dry prior to application and remain dry for 24 hours after application.

See inside flap for HOW TO OPEN and HOW TO APPLY, or insert for full Directions for Use.

NOTE TO PHYSICIAN
Treat the patient symptomatically.

For all information, including Storage and Disposal see insert inside carton.
HOW TO OPEN
1. Be sure tube is at bottom of pouch.
2. Using scissors, cut the pouch across the top and remove tube.

HOW TO APPLY
1. Use only on ferrets 10 weeks and older and weighing 1 lb. or greater. Do not use on other animals.
2. Ferrets should be dry prior to application and remain dry for 24 hours after application.
3. Remove one pouch from the carton. See “HOW TO OPEN” section.
4. Hold applicator tube in an upright position facing away from your ferret's face and eyes. Pull cap off tube.
5. Turn the cap upside down. Area where the tip of the cap was will be easier to remove.
6. Twist cap to break seal, then remove cap from tube.
7. Pur the cap on the base of the skull until the base is visible. Place the tip of the base on the skin and squeeze the tube to expel the entire contents directly on the skin. Do not get this product in your ferret's eyes, or allow your ferret to ingest the product. The product is bitter tasting and salivation may occur for a short time after the treatment. The product may stain fur and skin of the site of treatment. After treatment, wash hands immediately and remove treated area from my ferret for approximately 1 hour. Do not allow the ferret to lick the treated area.
8. Discard empty tube as described in Storage and Disposal.
9. Under normal conditions this product is effective for a month. However, in case of severe flea infestation, retreatment may be necessary sooner than four (4) weeks. Do not retreat more than every 14 days, not to exceed 2 biweekly treatments. After flea control is attained, return to a monthly treatment schedule.
