PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals
CAUTION: Keep away from children, domestic animals and pets. May be harmful if swallowed because it may irritate the lining of the mouth and cause bleeding. CAUSE moderate eye irritation. Do not get in eyes, on skin or on clothing. Wash gloves when handling and after eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.

FIRST AID
Have this label with you when obtaining treatment advice.
If swallowed: Call a poison control center or doctor immediately for treatment advice. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Note to Physicians or Veterinarians: Contains bromadiolone, an anticoagulant. For humans or pets that have ingested this product, or have obvious poisoning symptoms (bleeding) or prolonged prothrombin time, give Vitamin K, by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

Environmental Hazards: This product is toxic to fish and wildlife. Poultry and scavenging mammals and birds might be poisoned if they feed upon food, or if they come into contact with a treated area. Food and livestock might be contaminated. Do not apply directly to water, or to areas where surface water is present or to interstate areas below the mean high water mark.

STORAGE AND DISPOSAL
Do not contaminate water, hay, or feed by leakage or disposal. Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of in an approved waste disposal facility. Container Handling: This is a nonrefillable container. Do not use or recondition the offer. Offer for recycling if available or dispose of properly in a landfill or in an approved waste disposal facility.

WARRANTY: To the extent consistent with applicable law,omid makes no warranty, expressed or implied, concerning the use of the product other than that indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ THIS LABEL and follow all use directions and precautions. For information on this product (including health concerns, medical emergencies or pesticide incidents) call the National Pesticide Information Center at 1-800-855-7564.

IMPORTANT: Do not expose children, pets or other non-target animals to intoxication. To help prevent accidents:
1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in temperate-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and eating bait. If bait can be shaken from stations when they are filled, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hawks, raccoons, opossum, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spilled, and unabsorbed bait as specified on the label.

USE RESTRICTIONS: This product may be used to control Norway rats, roof rats and house mice. Do not place near or inside vegetation. Do not apply bait to areas where surface water is present or to interstate areas below the mean high water mark.

APPLICATION DIRECTIONS: Each block is scored to break into 2-4 pieces. Move Block block and apply 1-2 pieces per place. Space placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 10 days or until fresh signs of activity cease. For burrow applications, insert one or two 2-4 pieces of block deep into each active burrow. Check treated burrows each morning and evening to make sure that bait has not been pushed out of burrows. For newer applications, successively attach one end of a wire to bait block and the other end to a stationary structure such as the bottom of a manhole lid or sewer grate. Allow just enough wire for bait block to rest on a manhole lid. No catch is present. Return bait to a law inches above the high water line. Place baits on a board or glass supported by oppsing slope of the lid. Secure bait in this manner to minimize chance for removal by bats or water. Place of least one entire bait block per manhole. Follow-up: Replace contaminated or spilled bait immediately. Collect and dispose of all visible dead animals and leftover bait properly. To discourage rainfall, limit sources of rodent food, water and harborage as much as possible. Irrigation occurs, repeat treatment. For a continuous integration, use 3 or more permanent bait stations and recheck baits as needed.

PARAFFIN BLOCKS
KILLS NORWAY RATS, ROOF RATS, HOUSE MICE AND WARFARIN-RESISTANT NORWAY RATS
NORWAY RATS & HOUSE MICE CAN CONSUME A LETHAL DOSE IN ONE NIGHT'S FEEDING WITH FIRST DEAD RODENTS APPEARING FOUR OR FIVE DAYS AFTER FEEDING BEGINS

Active ingredient: bromadiolone ........................................ 0.005%
Inactive ingredients........................................... 99.995%
Total .......................................................... 100.000%

KEEP OUT OF REACH OF CHILDREN
