PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals
CAUTION: Keep away from children, domestic animals and pets. May be harmful if swallowed because it reduces the clotting ability of blood and causes bleeding. Causes mild eye irritation. Do not get in eyes, on skin or on clothing. Wear gloves when handling. Wash hands with soap and water after applying and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.

FIRST AID
Have this label with you when obtaining treatment advice.
- If swallowed: Call a poison control center or doctor immediately for treatment advice.
- If in eyes: Hold eye open and rinse slowly and gently with water for 15-30 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing eye. Call a poison control center or doctor for treatment advice.
- If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cold water for 15-30 minutes. Call a poison control center or doctor for treatment advice.

Note to Physician or Veterinarian: Contains bromadiolone, an anticoagulant. For humans or pets that have ingested this product, or have obvious poisoning symptoms (bleeding) or prolonged prothrombin times, give Vitamin K by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal. Environmental Hazards: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, drainage areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by disposal of this product. Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. Pesticide Disposal: Waste resulting from the use of this product may be disposed of on site or in approved waste disposal facility. Container Handling: This is a nonrefillable container. Do not reuse or refill the container. Offer for recycling or for disposal by qualified personnel in a sanitary landfill, by incineration, or by collection for permitted use or sale.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on this label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ THIS LABEL AND FOLLOW ALL USE DIRECTIONS AND PRECAUTIONS. For information on this product (including health concerns, medical emergencies or possible accidental oral ingestion), call the National Pesticide Information Center at 1-800-929-9675.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:
1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in temperate non-target bird stations. These stations must be protected from destruction by dogs or cats under six years of age, and must be used in a manner that prevents such children from swarming into bait compartments and obtaining bait. If bait can be obtained from stations when they are filled, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hounds (hounds, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled, and un consumed bait as specified on this label.

USE RESTRICTIONS: This product may be used to control Norway rats, roof rats and house mice. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or milk handling equipment. Do not broadcast bait. Urban areas: This product may be used in and around homes, food processing facilities, industrial, commercial and public buildings, in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. This product may also be used in alleys and sewers. Non-urban areas: This product may be used on homes and agricultural buildings.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely feed and consume the bait. Generally, these are along walls, by food openings, in or beside burrows, in corners and creviced places, between floors or walls, in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

APPLICATION DIRECTIONS: Break each block into 2-3 pieces. Mix: Break the bait and apply one 2-oz. piece per placement. Spaced placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 15 days or until fresh signs of mouse activity cease. Rate: Apply two to eight 2-oz. pieces of block per placement, usually spaced 15 to 50 feet apart. Maintain a constant supply of fresh bait for 15 days or until fresh signs of mouse activity cease. For boron applications, insert one or two 0.2-oz. pieces of block deep into each active burrow. Check treated burrows each morning and evening to make sure that the burrow has not been pushed out of the burrow. For sewer applications, remove 0.2-oz. pieces of block and place at a distance of 6 feet and a distance of 1 foot from each block and the other to a stationary structure such as the bottom step of manhole cover or sewer grate, allowing just enough for the bait to rest on a manhole cover. If block is plugged, suspend block a few inches above the high water line, or place block on a board supported by opposing sides of the ladder. Secure block in this manner to minimize chance for removal by rats or water. Place at least one entire bait block per manhole. Follow-up: Replace contaminated or spoiled bait immediately. Collect and dispose of all visible dead animals and litter box, properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replace bait as needed.

PARAFFIN BLOCKS
KILLS NORWAY RATS, ROOF RATS, HOUSE MICE AND WARFARIN-RESISTANT NORWAY RATS
NORWAY RATS & HOUSE MICE CAN CONSUME A LETHAL DOSE IN ONE NIGHT'S FEEDING WITH FIRST DEAD RODENTS APPEARING FOUR OR FIVE DAYS AFTER FEEDING BEGINS

Active Ingredient: bromadiolone ........................................ 0.005%
 inert ingredient ......................................................... 99.995%
Total ................................................................. 100.000%

KEEP OUT OF REACH OF CHILDREN

CAUTION: See side panel for additional precautionary statements.
