PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGERS. EXTREMELY HAZARDOUS TO HUMAN CONTACT AND POISON TO DOMESTIC ANIMALS. CAUSES SEVERE SKIN RASH AND IRREVERSIBLE EYE DAMAGE, WHICH MAY RESULT IN DELAYED ONSET OF DEAFNESS. DO NOT BREATHE VAPORS OR SPRAY. INHALATION MAY CAUSE BURSOSUS ACUTE ILLNESS, DELAYED NECROGENESIS, OR BRAIN INJURY. DO NOT GET IN EYES, ON SKIN OR CLOTHING.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Some materials that are chemical-resistant to this product are listed below. For more options, follow the instructions for Category II on the chemical-resistance category selection chart. PPE constructed of Tarpon, neoprene, and chlorinated polyethylene provide short-term contact splash protection against liquid in this product. Longer-term protection is provided by PPE constructed of Viton, Tefflon, and EVA tanned leathers (for example, respirator seals manufactured by Life-Guard or Silnet/wed gloves manufactured by North). Where chemical-resistant materials are required, leather, canvas, or cotton materials offer protection from this product and must not be worn as the sole article of protection when contact with this product is possible.

When performing tasks with NO potential for contact with liquid fungicide, all handling (including application) must:
- Wear long-sleeved shirt, long pants, shoes and socks.
- Not wear jewelry, goggles, tight clothing, chemical-resistant gloves, rubber protective clothing, or rubber boots when handling. Methylene blue can trap inside clothing and cause injury.

Handing with potential for contact with liquid fungicide (e.g. showering) may wear cotton, leather, or other personal, non-chemical-resistant gloves. If such gloves are exposed to liquid fungicide, they must immediately be removed and discarded.

When performing tasks with potential for contact with liquid fungicide, all handling (including application) must wear:
- Long-sleeved shirt and long pants.
- Chemical-resistant apron.
- Protective eyewear (Do Not wear goggles), and
- Chemical-resistant boots/seals with socks.

In addition, when an air-purifying respirator is required under this label's Directions for Use, Protection for Users, Respiratory Protection and Stop Work Trigger section, handling (including application) must wear:
- A NIOSH-certified half-face air-purifying respirator with cartridges certified by the manufacturer for protection from exposure to methyl bromide at concentrations up to 5 ppm (e.g., a 3M air-purifying respirator equipped with 3M Model 6002 Organic Vapor/Particulate Class 1 cartridges).

IMPORTANT: A self-contained breathing apparatus (SCBA) is not permitted for routine hand/extent/4, if required in an emergency when corrective action is needed to reduce air concentrations to acceptable levels, use an SCBA. Exposure-only SCBA regulations must not be used by handlers for responding to emergencies. In addition wear PPE required for potential contact with liquid fungicide.

See label booklet for additional Precautionary Statements.

NOTICE: Contains methyl bromide, a substance which harms public health and the environment by destroying ozone in the upper atmosphere.

RESTRICTED USE PESTICIDE
DUE TO ACUTE TOXICITY
For sale only to and use by licensed applicators or persons under their direct supervision and only for those uses covered by the certified applicator's certification.

Tri-Con 80/20
Pre-Plant Soil Fumigant

ACTIVE INGREDIENTS:
Methyl Bromide: 80.0% Chloropicrin: 10.0% OTHER INGREDIENTS: 0.1%

TOTAL: 100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER
POISON
PELIGRO

If used as intended, it is a non-toxic substance. If used as directed, it is not a hazardous substance. (See label for details.)

IN CASES OF OVEREXPOSURE, GET MEDICAL ATTENTION IMMEDIATELY.
TAKEN PERSON TO A DOCTOR OR TO AN EMERGENCY TREATMENT FACILITY.

FIRST AID

IF INHALED:
- Move person to fresh air.
- If person is not breathing, call 811 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if feasible.
- Call a poison control center or doctor for further treatment advice.

IF SWALLOWED:
- Have person see a physician immediately for treatment advice.
- There may be a glass of water to help dilute the material.
- Do not induce vomiting unless told to by a physician or a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for at least 15-20 minutes.
- Call a poison control center or doctor for further treatment advice.

IF IN EYES:
- Hold eyes open and rinse steadily with plenty of water for at least 15 minutes.
- Contact local emergency medical services (police, fire, or medical services).
- Call a poison control center or doctor for further treatment advice.

Note: Have the product container and/or label when calling a poison control center or doctor, or going for treatment.

EMERGENCY PHONE NUMBER: Chemtrol 1-800-424-0000

NOTE TO PHYSICIAN
Early symptoms of overexposure to methyl bromide are dizziness, headache, nausea and vomiting, weakness, and suffocation. Long term may develop 4 to 6 hours after exposure, accompanied by central nervous system effects and the virtual lack of useful. Reproduced exposures can be toxic by inhalation. Tetraethyl and methylamines have triazole recovery after a period of 21 days. Methyl bromide has been toxic in repeated exposures. Although symptoms do not usually develop, levels suggest the occurrence, but not the degree, of exposure. Treatment is symptomatic.

DIRECTIONS FOR USE
Restricted Use Pesticide

This is an idea of the Pesticide Act. Use the product in a manner consistent with its labeling. Do not apply the product is a way as will contaminate water or other places, avoid contact or drift. Only handle may be in the application equipment from the start of the application until the end of the treatment period. Do not use in the application equipment until the end of the treatment period. If use for any purpose requires specific to your State or Territory, consult the agency responsible for pesticide regulation.

Agricultural Use Requirements

Use the product only in accordance with its labeling and the Product Protection Standard. (See CFR 170). This label is bound under Agricultural Use Requirements in the Directions for Use section for information about this standard.

Storage and Disposal

DO NOT CONTAMINATE WATER, FOOD, OR FEED.

BY STORAGE OR DISPOSAL

Pesticide Storage: Store in a dry, cool, well-ventilated area under lock and key. Place as pesticide storage area. Pesticide Disposal: Pesticide residues are toxic. Improper disposal of excess pesticide, spray rinse, or material is a violation of Federal law. If these residues cannot be disposed of by use according to labeling instructions, contact your local State Pesticide of Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. When a pesticide is partially full and is to be further used, the pesticide is to be treated as the registrant or distributor. Replace safety caps and valve protection barrier before applying to contain. Container Handling: Store containers upright, to avoid a seal or web from breaking. Do not store in bags or mechanical storage such as emptying, dumping, or setting. Do not use plastic bags, hose, hose or other device or other safety equipment which can be isolated from contact. Do not store in bags or mechanical storage such as emptying, dumping, or setting. Do not use plastic bags, hose, hose or other device or other safety equipment which can be isolated from contact. Do not store in bags or mechanical storage such as emptying, dumping, or setting. Do not use plastic bags, hose, hose or other device or other safety equipment which can be isolated from contact. Do not store in bags or mechanical storage such as emptying, dumping, or setting. Do not use plastic bags, hose, hose or other device or other safety equipment which can be isolated from contact. Do not store in bags or mechanical storage such as emptying, dumping, or setting. Do not use plastic bags, hose, hose or other device or other safety equipment which can be isolated from contact. Do not store in bags or mechanical storage such as emptying, dumping, or setting. Do not use plastic bags, hose, hose or other device or other safety equipment which can be isolated from contact. Do not store in bags or mechanical storage such as emptying, dumping, or setting. Do not use plastic bags, hose, hose or other device or other safety equipment which can be isolated from contact. Do not store in bags or mechanical storage such as emptying, dumping, or setting. Do not use plastic bags, hose, hose or other device or other safety equipment which can be isolated from contact.

Reutilizable Container: Only the registrant or distributor is allowed to refill this container. The container can be refilled with pesticide only. Do not reuse this container. Also use by another person. Clean the container before final disposal. Clean the container before final disposal. Clean the container before final disposal.

PACKAGING: To clean the container before final disposal, remove any remaining liquid from the container, using dry air pressure if necessary. Allow container to air for at least 8 days. After aerating, wash container using hot water, then contain empty to qualified reconditioner or dispose of as directed by State or local regulations.
