SANITIZER

GLB

POOLCARE

Sticks

STABILIZED CHLORINATING
CONCENTRATE IN STICKS

NET WEIGHT: 50 LBS - 22.68 KG
Sold by weight, not volume.
Distributed by GLB Pool & Spa

ACTIVE INGREDIENTS:
Trichloro-s-Triazine-trione .......... 99%

DANGERS:
Keep out of reach of children
See other precautions and first aid on back panels.

WARNING

AVISO

Children can fall into bucket and drown.
Keep children away from buckets with even a small amount of liquid.

Los niños corren peligro de caerse dentro del balde y ahogarse.

Mantener a los niños lejos de los baldes, incluso cuando solo tengan una pequeña cantidad de líquido.
STABILIZED CHLORINATING
CONCENTRATE IN STICKS

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine.

FOR CONTINUOUS DAILY CHLORINATION:

Before the first use of GLB STICKS, be sure to take the following steps:

1. Adjust the pool water pH value between 7.2 and 7.8 and total alkalinity between 60 and 150 ppm as determined by a suitable test kit.

2. Stabilize pool water with 30 ppm Stabilizer as directed on the container label. Thereafter regular use of GLB STICKS for daily chlorination will provide any needed makeup stabilizer.

3. Shock treat the pool water to oxidize organic contaminants. Before using the pool, be certain the chlorine level returns to 1.0 - 1.5 ppm.

4. Maintain a free available chlorine level of 1.0 to 1.5 ppm (as determined daily by a suitable test kit) at all times. By means of a feeder, float device, or skimmer dispenser, immerse one GLB STICK (or as many as may be necessary to maintain the proper chlorine level) for each 5,000 to 10,000 gallons of pool water. NEVER ADD THESE CHLORINATING STICKS DIRECTLY INTO THE SWIMMING POOL AS DISCOLORATION OF THE POOL LINER OR FINISH MAY OCCUR.

5. Shock treat your pool at least twice monthly (more often in sunbelt regions). During hot weather and peak bath load, shock treat your pool weekly to prevent water cloudiness and algae growth.

STORAGE AND DISPOSAL:

Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS:

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL, AND CHEMICAL HAZARDS

Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

FIRST AID:

If Swallowed: Call a poison control center immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in Eyes: Hold eyelashes open and rinse slowly with water for 15 - 20 minutes. Remove contact lenses if present after 5 minutes then continue rinsing eyes. Call poison control center or doctor for treatment advice. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 minutes. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

You may also contact 800-222-1222 for emergency medical treatment information.
