SANTIZER

Small 1” Tablets

STABILIZED CHLORINATING CONCENTRATE IN SMALL 1” TABLETS

DIRECTIONS FOR USE:
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine.

FOR CONTINUOUS DAILY CHLORINATION:
Before first use of GLB SMALL 1” TABLETS, be sure to take the following steps:
1. Adjust the pool water pH value to between 7.2 and 7.8 as determined by a suitable test kit and adjust Total Alkalinity to 100 ppm (parts per million).
2. Stabilize pool water with 30 ppm Stabilizer as directed on the container label. Then, after regular use of GLB SMALL 1” TABLETS, add any needed maintenance stabilizer.
3. Shock treat the pool water to remove organic contaminants. Follow the label directions. Before using the pool, be sure the chlorinated level returns to 1.0 – 1.5 ppm.
4. Once the pool pH has been adjusted to 7.2 – 7.8, use these GLB SMALL 1” TABLETS to maintain the free residual chlorine at a safe and efficient 1.0 – 1.5 ppm. Test your water frequently to monitor this residual using a suitable free chlorine test kit. By means of an automatic chlorinator, float or barrel dispenser, or manual addition directly into the pool, maintain the free residual chlorine level for 450 – 900 gallons of pool water at 1.0 – 1.5 ppm.

NEVER ADD THESE CHLORINATING TABLETS DIRECTLY INTO THE SWIMMING POOL AS DISCOLORATION OF THE POOL LINER OR FINISH MAY OCCUR.

5. Supervisors (Shock Treatment) of the pool water at least twice monthly (more often in warm climates - water temperatures over 85˚F). Failure to Superchlorexate can result in increased combined chlorine (chloramines) and possible growth of algae.

STORAGE AND DISPOSAL:
Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dilute all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate feed or feed by storage or disposal, or cleaning of equipment.

PRECAUTIONARY STATEMENTS – HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: CORROSIVE: Causes irreversible eye damage. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mist. Irritating to eyes and skin. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

PROPER AND CHEMICAL HAZARDS: Strong Disinfecting Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may cause a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not rinse container. If possible, isolate container in open air or well-ventilated area. Flood with large volumes of water if necessary.

FIRST AID:
If Swallowed: Call a poison control center immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or a doctor. Do not give anything by mouth to an unconscious person.
If In Eyes: Hold eyelid open and rinse slowly with water for 15 – 20 minutes. Remove contact lenses if present after 5 minutes then continue rinsing eye. Call poison control center or doctor for treatment advice.
If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. Call a poison control center or doctor for treatment advice.
If Inhales: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
