**B.t.i. BRQUIETS**

FLOATING SUSTAINED-RELEASE LARVICIDE FOR LONG-TERM CONTROL OF MOSQUITO AND PSYCHODID FLY LARVAE

**BIOLOGICAL CONTROL OF MOSQUITES & PSYCHODID FLIES**

ACTIVE INGREDIENTS: *Bacillus thuringiensis* subspecies *israelensis* strain BMP 144 solide, spores and insecticidal toxins

INERT INGREDIENTS: 

TOTAL

7000 Aedes aegypti (AA) International Toxic Units (TTU) per milligram primary powder (Dry weight basis)

The percent active ingredient does not indicate product performance and potency measurements are not federally standardized.

---

**PRECAUTIONARY STATEMENTS**

*Keep Out Of Reach Of Children*

**CAUTION**

**Hazard to Humans:** Avoid breathing dust. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

**Environmental Hazards:** Do not apply directly to treated, finished drinking water reservoirs or drinking water receptacles when the water is intended for human consumption.

**FIRST AID**

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

If on skin: Wash with plenty of soap and water. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor or going for treatment.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Summit B.t.i. BRQUIETS** are formulated to release effective levels of Bti for a period of 30 days or more under typical environmental conditions. The floating action of the briquets will ensure that active material is released at the surface as well as gradually settle to the bottom.

These briquets may be used in all types of mosquito breeding areas. To prevent briquets from being flushed out of certain treatment sites, they can be anchored using string tied through the hole in the center or staked in place.

**Summit B.t.i. BRQUIETS** can also be used for pre-flood treatment. If the briquets are applied to dry areas which are known or suspected to become breeding sites when flooded, such as woodland pools and abandoned swimming pools, the briquets will float to the surface when flooding occurs and start releasing the active Bti material. Alternating wetting and drying will not reduce their effectiveness.

**APPLICATION RATES**

**Mosquito Larvae:**

Flooded larval breeding sites: Use one (1) Summit B.t.i. BRQUIET for up to 100 sq. ft. of surface area, regardless of depth. In water with a high organic content, such as sewage disposal systems or waste lagoons, the application rate may have to be increased to as much as four (4) times the normal dosage based upon evaluation by the user. When larval populations are high, aquatic vegetation dense, or the water highly polluted at the time of the briquet use, pre-treatment with SUMMIT MOSQUITO BITSP is recommended. The briquet will then suppress larval development for up to 30 days or more. Some larva which hatch after briquet application may partially develop before dying. Allow a minimum of 48 hours for their control.

Pre-Flood Treatments: Apply one (1) Summit B.t.i. BRQUIET to each 100 sq. ft. of dry bed surface which is known or suspected breeding site when flooded. Evaporative Treatments: Apply one (1) Summit B.t.i. BRQUIET to each 100 sq. ft. of cooler box or for smaller coolers refer to the table below for application rate. CAN BE USED IN FISH HABITATS

**Outdoor Use around the Household to Kill Mosquito Larvae:** Summit B.t.i. BRQUIETS can be broken into portions for use in many outdoor applications near household, such as standing water in bird baths, old automobile tires, rain barrels, ponds, abandoned or unused swimming pools (particularly above ground types), ditches, tree holes, roof gutters for collecting rainwater, flower pots, animal watering troughs or any other locations near the household where water collects and remains for periods of time. Summit B.t.i. BRQUIETS can be broken and used as shown in the following table, the amount dependent upon the surface area of water in the treatment site.

<table>
<thead>
<tr>
<th>Surface area of standing water</th>
<th>1 to 5 square ft</th>
<th>5 to 25 square ft</th>
<th>25 to 100 square ft</th>
<th>Above 100 square ft</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use Grains</td>
<td>1/4 Briquet</td>
<td>1/2 Briquet</td>
<td>1 Briquet</td>
<td>1 Briquet per 100 sq. ft</td>
</tr>
</tbody>
</table>

**Proflood treatment around the Household:** Apply Summit B.t.i. BRQUIETS to any dry surface which is known to become flooded after a rain. Use the correct amount in accordance with the above dosage table.

**INDOOR USE:** For use in areas that collect water from home to home, areas such as elevator shafts, basements that flood, sump pumps and any drainage areas within buildings. Use the correct amount in accordance with the above dosage table.

**Psychodid Fly Larvae (Fitter Files, Sewage Flies, Drain Flies):**

Waste Water Treatment Plants: Place Summit B.t.i. BRQUIETS in a perforated basket, such as a minnow bait basket, and suspend the basket in the waste water stream before the water enters the trickling filter. Keep basket continuously filled with Briquets to ensure a steady flow of Bti into the filter. The number of Briquets needed for continuous, effective treatment in each facility will be dependent upon the volume and flow rate of the stream. This will have to be determined by the user.

**STORAGE AND DISPOSAL**

Storage: Do not contaminate water, food or feed by storage or disposal. Tightly close containers of unused briquets. Store in cool, dry, well-ventilated place.

Disposal: Do not reuse empty carton or packaging material. Perforate or crush and discard carton according to local trash disposal regulations.
