GSI 812 DISINFECTANT CLEANER
One-Step Disinfectant Cleaner-Sanitizer-Fungicide
MidwestAI®Vinyl/Corian®-Deodorizer
for Hospitals, Institutional and Industrial Use
Effective in hard water up to 400 ppm hardness (calculated as CaCO₃) in the presence of 5% serum contamination.

Active ingredients:
- Quat/defy defoamer quaternary ammonium salts
- Diallyldimethylammonium chloride
- AMATH-30, CPC, CPC, CTP, dimethy-benzyl ammonium chloride

GSI 812 DISINFECTANT CLEANER in hospitals, medical offices, dental offices, nurseries, homes, day nurseries, nurseries, restaurants, bars, bakeries, laundries, institutional kitchens, food storage areas, convenience stores, public rest rooms, restaurants, schools, colleges, athletic bottles, locker rooms, display rooms, show and bath areas, exercise facilities, camp grounds, play grounds equipment, institutional facilities, public facilities, transportation terminals, hotels, motels, restaurants, business and office buildings, boats, ships, trucks, trains, buses, cars, airplanes, emergency vehicles, prisons and correction facilities.

GSI 812 DISINFECTANT CLEANER is a one-step (Hospital use) disinfectant formulation according to the current AGC Use Guidelines ToolKit. Fungicide according to the AGC Fungicidal Tool and Validation according to the vaginalization qualification modified in the presence of 400 ppm hard water plus 5% serum contamination.

DIRECTIONS FOR USE

1. Follow a Federal Law to use the product in a manner consistent with its labeling. This product is not for use on medical device surfaces.

2. Preparation of Disinfectant Use Equipment.
   - Add 2 oz per gallon of water. For heavy duty, use 4 oz per gallon of water. Blue 2 oz per gallon of water killed Adenovirus Type 5 and Type 7.

3. DISINFECTION (VISUAL) / FUNGICIDE / BIDS AND MILDEW CONTROL DIRECTIONS.
   - Apply one solution to hard, non-porous surfaces, thoroughly wetting the surfaces with a cloth, mop, sponge, or spray. One application of target surfaces must remain for 10 minutes. Wipe dry with a cloth, sponge, or spray or allow to air dry. For heavily soiled areas, a primary degreasing is required. For equipment applications, is a coarse spray device. Spray 6-8 inches from target surfaces with brush, sponge or cloth. Avoid breathing spray.

4. For fungicidal activity. GSI 812 DISINFECTANT CLEANER is effective against fungi against Trichophyton mentagrophytes (the athlete’s foot fungus) in turbulent air in areas such as locker rooms, changing rooms, shower and bath areas and examination rooms.

5. DISINFECTANT CLEANER is a one-step fungicide at 2 oz per gallon of water in 250 ppm hard water and 5% serum. At 2 oz per gallon of water in 400 ppm hard water, GSI 812 DISINFECTANT CLEANER must be used on unpainted surfaces.

For mild and medium: At 2 oz per gallon, GSI 812 DISINFECTANT CLEANER is a growth of mild and medium and the others caused by them when applied to hard, non-porous surfaces. Follow disinfection instructions. Repeat treatment every seven days. All disinfectants have great effectiveness and are all surfaces that come in contact with skin such as homeowners, appliances, table tops and door knobs with possible water before rinsing. Do not use on utensils, glasses and dishes.

Prepare a fresh solution daily or more often if the use solution becomes visibly diluted or soiled.

To CLEAN AND DEODORIZE: Mix 2 oz per gallon of water to clean and deodorize surfaces. Apply using a cloth, mop, sponge or spray. Wipe dry to allow air dry.

To SANITIZE NON-FOOD CONTACT SURFACES: Add 2 oz of GSI 812 DISINFECTANT CLEANER per gallon of water to sanitize hard non-porous surfaces. Toluidine surfaces must remain wet for 60 seconds. Wipe dry with a sponge, mop or cloth to allow air dry.

"KILLS HIV and HBV and HCV on PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOODYLOOD FLOOIDS in health care settings or other settings in which there is an expected likelihood of soiling of Instrument surfaces objects with blood or bodily fluids. In the surfaces the objects, objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 or Type 2 (HIV-1 or HIV-2) associated with Adenoviruses B or C (Adenovirus 40 and 41).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OR HBV OR HCV ON SURFACES/OBJECTS SOILED WITH BLOODYLOOD FLOOIDS.

PERSONAL PROTECTION: Clean up should always be done wearing protective gloves, gowns, masks and eye protection.

CLEANING PROCEDURE: Blood and other bodily fluids containing HIV-1 or HBV or HCV must be thoroughly decontaminated and disinfected before application of GSI 812 DISINFECTANT CLEANER. CONTACT TIME: Leave surfaces wet for 1 minute for HIV-1 and 10 minutes for HBV and HIV-C with a 2 oz per gallon solution. Use 4 oz per gallon of water to Adenovirus Type 5 and Type 7. Use a 10-minute contact time for disinfection against all other viruses, bacteria and fungi (classed as DESTRUCTION OF INFECTIONOUS MATERIALS). Blood, body fluids, clothing materials and surfaces should be sterilized and disposed of according to local regulations for infectious waste disposal.
GSI 812 DISINFECTANT CLEANER
One-Step Disinfectant-Cleaner-Sanitizer-Fungicide
Mildewstat-Virucide-Deodorizer
for Hospitals, Institutional and Industrial Use
Effective in hard water up to 400 ppm hardness (calculated as CaCO₃) in the presence of 5% serum contamination

Active Ingredients:
0.65% Chlorine
0.15% Hexachloroethane

Other Ingredients:
4% Benzyl Alcohol
1% Polysorbate 80

Total: 5.85%

KEEP OUT OF REACH OF CHILDREN
DANGER (PELIGRO)

IF IN EYES: Hold eye open and slowly and gently with water for 15-30 minutes. Remove contact lenses. Transport, after first aid, then continue medical care.
IF INHALED: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip 2 g-pms of water if able to swallow. Do not induce vomiting unless instructed to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN: Prompt medical damage may contraindicate the use of gastric lavage.

Please the product container or label when calling poison control center or doctor for treatment advice.

SEE LEFT PANEL FOR PRECAUTIONARY STATEMENTS

DIRECTIONS FOR USE
It is a solution of Federal Law to use this product in a manner inconsistent with its labeling. This product is not for use on medical device surfaces.

Preparation of Disinfectant Use-Solution: Add 2 oz. per gallon of water. For very heavy duty, add 8 oz. per gallon of water. Use 5 oz. per gallon of water to kill Aeromonas Type 3 and 7.

DISINFECT/ VIRAICID / FUNGICIDAL / MOLD AND MILDew CONTROL DIRECTIONS: Apply use-solution to hard, impervious surfaces, thoroughly wetting the surface, with a cloth, mop, spray, sprayer or by immersion. Treated surfaces must remain wet 10 minutes. Wipe dry with a cloth, sponge or mop or allow to air dry. For heavily soiled areas, a precleaning is required.

For spacer applications, use a coarse spray device. Spray 8 - 12 inches from surface; fan with brush, mangle or fan. Avoid breathing spray.

For fogging activity, GSI 812 DISINFECTANT CLEANER is an effective fogging agent against Thripophyton metarhizium (the alfalfa root fungus) in areas such as locker rooms, dressing rooms, showers and bath areas and exercise buildings.

Use GSI 812 DISINFECTANT CLEANER in homes, hospitals, medical offices, dental offices, nursing homes, day care centers, nurseries, restaurants, bakeries, laundromats, food service establishments, department stores, cinemas, movie theaters, motels, hotels, restaurants, bars, taverns, schools, colleges, athletic fields, locker rooms, dressing rooms, and other areas where bacteria and both areas, vehicle interiors, camp grounds, recreational vehicles, equipment, recreational facilities, public buildings, transportation terminals, hotels, motels, restaurants, athletic or commercial fields, implants, floor, carpet cleaning and storage areas, and other places where bacterial growth can cause problems.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMAN AND DOMESTIC ANIMALS
DANGER. Corrosive. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin or on clothing. Wear protective eyeglasses (goggles, face shield or safety glasses), protective (rubber or chemical resistant) gloves and protective clothing. Harmful fumes/odor can be absorbed through the skin. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Open during use is permitted. Store original containers in areas inaccessible to children.

Pesticide Disposal: Pesticide waste are actively hazardous. Improper disposal of excess pesticide, spray residue or rinse water is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative of the nearest EPA Regional Office for guidance.

Container Disposal: Nonrefillable containers. Do not reuse or refill this container. Clean container promptly after emptying.

(Plastic and Metal Containers) Triple rinses as follows: Fill container 1/4 full with water and recirculate the contents. Repeat two more times. Then offer for recycling if acceptable or puncture and dispose in sanitary landfill or by other procedures approved by state and local authorities. Follow periodic disposal instructions for drums. If not triple rinsed, these containers are acute hazardous wastes and must be disposed in accordance with local, state and federal regulations.

ENVIRONMENTAL HAZARDS
Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of The National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has not been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without first notifying the local health treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.
