PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS

WARNING

May be fatal if inhaled. Harmful if absorbed through the skin or swallowed. Causes eye irritation. Do not get in eyes, on skin, or on clothing. Do not breathe dust. Keep away from humans, domestic animals and pets. Avoid contamination of feed or foodstuffs. Avoid contact with acids. Wash all utensils, spoons or measuring devices thoroughly after use.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

All applicators/mixers/loaders must wear:
- long sleeve shirt and long pants;
- eye protection;
- chemical-resistant gloves (any waterproof material, Category A); and
- a dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21C) or a NIOSH-approved respirator with any R, P or HE filter.

All applicators and anyone who retrieves carcasses and unused bait must wear:
- gloves.

User Safety Requirements:

Follow manufacturer’s instructions for cleaning/maintaining personal protective equipment (PPE). If no such instructions are provided for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet.

User Safety Recommendations:

- Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. See additional PRECAUTIONARY STATEMENTS on Left Panel.

RESTRICTED USE PESTICIDE
DUE TO INHALATION HAZARDS TO HUMANS AND HAZARDS TO NONTARGET SPECIES

For retail sale to and use only by Certified Applicators or person under their direct supervision and only for those uses covered by the Certified Applicator’s Certification.

ZINC PHOSPHIDE ON WHEAT FOR MOUSE CONTROL

For use in orchards, groves, nurseries, vineyards, ornamentals, and nonbearing fruit trees; reforestation and rangeland seeding areas; and alfalfa, barley, wheat, dry beans, potatoes and sugar beets to control voles and white-footed mice.

ACTIVE INGREDIENT:
Zinc Phosphide ........................................... 1.82%
OTHER INGREDIENTS: .......................... 98.18%
TOTAL .................................................. 100.00%

KEEP OUT OF REACH OF CHILDREN

WARNING

FIRST AID

Have label with you when obtaining treatment advice. Any person who applies zinc phosphide products and experiences signs or symptoms such as nausea, abdominal pain, tightness in the chest, or weakness, should be seen by a physician immediately.

If swallowed - Immediately call a poison control center, doctor, or 1-800-858-7378 or transport the person to the nearest hospital.
- DO NOT DRINK WATER.
- Do not give anything by mouth or make person vomit unless told to do so by the poison control center or doctor.

If on skin or clothing - Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center, doctor, or 1-800-858-7378 immediately for treatment advice.

If inhaled - Move person to fresh air.
- If person is not breathing, call 911 or an ambulance and give artificial respiration, preferably mouth-to-mouth, if possible.
- Call a poison control center, doctor, or 1-800-858-7378 immediately for treatment advice.

ENDANGERED SPECIES

This product may have effects on Federally listed threatened or endangered species or their critical habitat in some counties. It is a violation of Federal law to kill, harm or harass listed animal species without authorization. The killing of a member of an endangered species may result in a fine and/or imprisonment under the Endangered Species Act. To limit the potential for such impacts when using this product, consult and follow the “Endangered Species Considerations” provided on this label and in the EPA Endangered Species Bulletin for the County or Parish in which you are applying this product. To determine whether your County or Parish has a Bulletin, consult www.epa.gov/ez/bp before each season’s use of this product. Additional Endangered Species Considerations are included on the last page of this label.

ENVIROMENTAL HAZARDS

This product is toxic to wildlife and fish. Birds and other wildlife feeding on toxic bait may be killed. Use with care when applying in areas frequented by wildlife or adjacent to any body of water. Do not apply where runoff is likely to occur. Do not apply this product directly to water. To areas where surface water is present, or to intertidal areas below the mean high-water mark. Do not contaminate water by cleaning of equipment or disposal of waste. Do not apply this product in areas inhabited by livestock, or where a hazard exists to rare or endangered species. Dogs and other predatory and scavenging mammals might be poisoned if they feed upon animals that have eaten this bait.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its label.

READ THIS LABEL: Read the entire label and follow all use directions, use precautions and use restrictions which pertain to the bait application to be made.

GENERAL USE RESTRICTIONS (For All Uses): Do not apply this product by any method or use not specified on this label. Do not apply bait on roads, over water; or, except where specifically indicated in these directions, where plants are grown for food or feed. Wear all required personal protective equipment (PPE) when mixing, handling and applying bait. See PRECAUTIONARY STATEMENTS. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only persons associated with the applications may be present in the area when the bait is being applied, and such persons must wear required PPE. Keep all other persons out of the treated area during application.

ORCHARDS, GROVES, NURSERIES, VINEYARDS, ORNAMENTAL PLANTINGS, AND NONBEARING FRUIT TREES
(to control Voles and White-Footed Mice)

Use Restrictions: Use this product to control meadow voles (Microtus pennsylvanicus), prairie voles (M. ochrogaster), and pine voles (M. pinetorum) and white-footed mice (Peromyscus maniculatus) in orchards, groves, horticultural nurseries, vineyards, ornamental plantings, and nonbearing fruit trees. Do not apply bait to bare ground.

Special Use Restrictions for Orchards and Groves: Applications (except aerial) must be made at a rate of 6 to 10 pounds of 2% zinc phosphate bait per acre. Aerial applications must be made at 4 to 5.5 pounds of 2% zinc phosphate bait per acre. Applications can be made after harvest or anytime during the dormant season, but before tree growth begins in the spring. Do not broadcast over non-orchard, non-grove crops. Do not graze animals on treated areas.

Special Use Restrictions for Vineyards: Baits may be applied only during the non-bearing season. Do not apply bait over the growing crop. Do not apply bait by air. Do not graze animals on treated areas. Ground broadcast applications must not exceed 10 pounds of bait per acre.

DIRECTIONS FOR USE, CONTINUED

APPLICATION DIRECTIONS

HAND BAITING: Near the base of each infested tree, place one teaspoonful quantities of bait at 2 to 4 locations, either on surface or 1 foot below surface; and any point on the base of the tree, in larger quantities as needed. For trees under 20 feet tall, position baits 4 to 5 feet apart. For trees over 20 feet tall, position baits 6 to 9 feet apart. Do not disturb the nesting site, if present. Pour bait into the tree cavity, or mix with water before applying. Apply 2 to 5 pounds of 2% zinc phosphate bait per acre of infested trees.

TRAILBUILDER BAITING: Drop teaspoonful quantities of bait at 4 to 5 foot intervals in the artificial trail made by the machine just before the tip of the system. Apply 2 to 3 pounds of 2% zinc phosphate bait per acre.

GROUND BROADCAST BAITING: For infested trees broadcast evenly by cyclone seeder or by hand. Concentrate in areas with the heaviest vegetative cover. Apply at a rate of 10 to 15 pounds of 2% zinc phosphate bait per acre.

AERIAL APPLICATION: Broadcast bait at a rate of 6 to 10 pounds of 2% zinc phosphate per acre. Broadcast applications are made immediately after harvest and before leaf fall, when the grass is not yet mowed. Do not make broadcast applications of bait over growing crops when the vegetable cover is present. Do not apply to bare ground.

RANGELANDS AND REFORESTATION SEEDING AREAS
(to control Voles and White-Footed Mice)

Use Restrictions: Use this product to control meadow voles (Microtus pennsylvanicus), prairie voles (M. ochrogaster), and pine voles (M. pinetorum) and white-footed mice (Peromyscus maniculatus) in rangeland. Use this product to control meadow voles (Microtus pennsylvanicus), prairie voles (M. ochrogaster), and pine voles (M. pinetorum) and white-footed mice (Peromyscus maniculatus) in rangeland and reforestation areas. Applications can be made after harvest or anytime during the dormant season, but before tree growth begins in the spring. Do not broadcast over non-orchard, non-grove crops. Do not graze animals on treated areas.

APPLICATION DIRECTIONS

ALFALFA, BARLEY, DRY BEANS, POTATOES, SUGAR BEETS, AND WHEAT
(to control Voles and White-Footed Mice)

USE RESTRICTIONS: Use this product to control meadow voles (Microtus pennsylvanicus), prairie voles (M. ochrogaster), pine voles (M. pinetorum), and white-footed mice (Peromyscus maniculatus) on alfalfa, barley, dry beans, potatoes, sugar beets, and wheat. Pre-baiting: Pre-baiting with untreated bait may be necessary to control voles. Treatment: Treatment: Treat at a rate of 6 to 10 pounds of 2% zinc phosphate per acre at the rate before the seeds fall or seeding efforts. Treatment may be necessary in spring to control emerging plantings. Do not apply bait to pasture or to bare ground.

APPLICATION DIRECTIONS

ALFALFA

Use Restrictions: All applications must occur after a killing of the hay, and/or prior to new growth attaining a length of 2 inches. Do not apply this product to alfalfa forage from treated areas until the dormant season, but before tree growth begins in the spring. Do not broadcast over non-orchard, non-grove crops. Do not graze animals on treated areas.

APPLICATION DIRECTIONS

HAND BAITING: For hand baiting, place 1 teaspoon of bait in surface runways or in burrow entrances. If a trailbuilder is used, apply at a rate of 1 teaspoon of bait at 4 to 5 foot intervals.
DIRECTIONS FOR USE, CONTINUED

BARLEY
Use Restrictions: Do not apply bait post-harvest or pre-plant. Do not apply this product to barley within 50 days of harvest. This use is restricted to Idaho, Oregon and the state of Washington.
Broadcast Baitsing: This product may be broadcast by air or by ground driven dispensing devices. Apply Zinc Phosphide bait at a rate up to 10 lbs (0.2 lb active ingredient) per acre. No more than one application per growing season is permitted.

POTATOES
Use Restrictions: Do not apply bait post-harvest or pre-plant. Do not apply this product to potatoes within 30 days of harvest. This use is restricted to Idaho, Oregon and the state of Washington.
Broadcast Baitsing: This product may be broadcast by air or ground driven dispensing devices. Apply Zinc Phosphide bait at a rate up to 10 lbs (0.2 lb active ingredient) per acre. No more than one application per growing season is permitted.

SUGAR BEETS
Use Restrictions: Do not apply bait post-harvest or pre-plant. Do not apply this product to sugar beets within 30 days of harvest. This use is restricted to Idaho, Oregon and the state of Washington.
Broadcast Baitsing: This product may be broadcast by air or ground driven dispensing devices. Apply Zinc Phosphide bait at a rate up to 10 lbs (0.2 lb active ingredient) per acre at planting. A second application may be made at this rate. The maximum application rate per year is 20 lbs (0.4 lb active ingredient).

WHEAT
Use Restrictions: Do not apply bait post-harvest or pre-plant. Do not apply this product to wheat within 50 days of harvest. This use is restricted to Idaho, Oregon and the state of Washington.
Broadcast Baitsing: This product may be broadcast by air or ground driven dispensing devices. Apply Zinc Phosphide bait at a rate up to 8 lbs (0.12 lb active ingredient) per acre. A second application may be made within 25 days. The maximum application rate per year is 12 lbs (0.24 lb active ingredient).

DIRECTIONS FOR USE, CONTINUED

DRY BEANS
Use Restrictions: Do not apply by air. Do not apply this product to dry beans within 30 days of harvest. This use is restricted to Idaho, Oregon and the state of Washington.
Broadcast Baitsing: This product may be broadcast by hand or ground driven dispensing devices at a rate of 8 lbs (0.12 lb active ingredient) per acre. No more than one application per growing season is permitted.

NONCROP AREAS (RIGHTS-OF-WAYS, PARKS, HIGHWAY MEDIANS, NONRESIDENTIAL LAWNS, TURF, GOLF COURSES, AIRPORT GRASSES)
(to control Voles and White-Footed Mice)

Use Restrictions: Use this product to control meadow voles (Microtus pennsylvanicus), prairie voles (M. ochrogaster), pine voles (M. pennsylvanicus), and white-footed mice (Peromyscus leucopus) in non-crop areas (rights-of-ways, nonresidential lawns, parks, turf, golf courses, airport grasses, highway medians). Do not apply bait to bare ground. Do not apply bait by air.

PREBAITING: Prebaiting with untreated wheat may lead to more consistent acceptance of toxic bait. Prebait should be applied at rates appropriate for toxic baiting, beginning 2 to 3 days before toxic baits are to be used.

APPLICATION DIRECTIONS
HAND BAITING: Place 1 teaspoon (4 grams) of bait in surface runways or at mouths of holes leading to underground burrow systems. Apply the bait at rates of 3 to 5 pounds (0.06 to 0.1 pounds of active ingredient) per acre.

TRAILBUILDER BAITING: Follow manufacturer’s instructions for type of equipment used. Set equipment to drop 1 teaspoon (4 grams) of bait at 4- to 5-foot intervals in the artificial trail made by the machine. Apply the bait at rates of 2 to 3 pounds (0.12 to 0.2 pounds active ingredient) per acre.

GROUND BROADCAST BAITING: Broadcast bait evenly by cyclone seeder or by gloved hand. Apply the bait at rates of 8 to 10 pounds (0.12 to 0.2 pounds of active ingredient) per acre.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store only in original container, in a dry place inaccessible to children, pets and domestic animals.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinsate is a violation of Federal law. If these wastes cannot be disposed of according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

EPA Reg. No. 56226-3
Page 3 of 4
ENDANGERED SPECIES
CONSIDERATIONS

Whooping Crane (Grus americana): Do not use this product 30 days prior to arrival and 30 days after the whooping crane leaves its known critical habitat.

Attwater's Greater Prairie Chicken (Tympanuchus cupido attwateri): Do not use this product in critical habitat of the Attwater's greater prairie chicken in the following Texas counties: Aransas, Austin, Brazoria, Colorado, De Witt, Fm, Fm, Galveston, Goliad, Harris, Refugio, Victoria, Waller, and Wharton.

Yellow-Shouldered Blackbird (Agelaius xanthomelas) and Puerto Rican Plain Pigeon (Columba inornata wetmorei): Do not use in critical habitat except in tamper-proof bait boxes: within 6.3 miles of central Aquirre Leguía, Cebal, San German; 9.4 miles of La Esperanza; south of highway 2 from city at Mayaguez to the city of Ponce, and all of Mona Island, Puerto Rico.

Utah Prairie Dog (Cynomys parvidens): Do not use this product in critical habitat of the Utah prairie dog. (Utah)

Salt Marsh Harvest Mouse (Rathrondonomys raviventris): Do not use this product in critical habitat within 0.5 mile of salt marsh vegetation and/or brackish water wetlands which are located: 1) near or adjacent to San Pablo Bay and San Francisco Bay, or 2) in the Sacramento River below or adjacent to the confluence of the Sacramento River and the San Joaquin River. (California)

Morro Bay Kangaroo Rat (Dipodomys heermanni morroensis): Do not use this product in critical habitat within 2.5 miles of Baywood Park which is located on Morro Bay. (California)

Northern Idaho Ground Squirrel (Spermophilus brunneus brunneus): Do not use this product within 0.5 mile of the critical habitats of the Northern Idaho Ground Squirrel in Adams and Valley counties, Idaho.
