PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS

DANGER

DANGER: Convulsion Poison! Fatal if swallowed or
inhaled. Harmful if absorbed through skin. Do not get in
eyes or on clothing. Avoid contact with skin. Do not
breathe dust. Do not apply this product in a way that will
contact any person or pet. Wash hands before eating,
drinking, chewing gum, using tobacco, or using the toilet.
Remove contaminated clothing and wash clothing before
reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators and other handlers must wear:
- long-sleeved shirt and pants,
- cotton gloves, and
- shoes plus socks.

When handling more than 3 lbs. (1.4 kg) of bait into
mechanical application equipment and when disposing of
non-rigid containers (e.g., bags), handlers must wear:
- long-sleeved shirt and pants,
- waterproof gloves,
- shoes plus socks,
- goggles or face shield, and
- dust/mist filtering respirator. (goods approved
number prefix TC-21C), or a B OSH approved
respirator with any N, P, R, or HE (HEPA, high
frequency particulate aerosol) filter.

Follow manufacturer’s instructions for cleaning and
maintaining PPE. If there are no such instructions for
washable, use detergent and hot water. Keep and
wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS
Remove clothing immediately if pesticide gets inside.
Wash thoroughly before putting on clean clothes.

Remove PPE immediately after handling this product. Wash
the outside of waterproof gloves before removing. As
soon as possible, wash thoroughly and change into clean
clothing.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, birds and other wildlife. Do
not allow bait to be exposed on soil surface. Do not apply
directly to water, or to areas where surface water is
present, or to intertidal areas below the mean high water
mark. Do not contaminate water by the cleaning of
equipment or the disposal of wasties. Do not apply
directly to food or feed crops.

ENDANGERED SPECIES CONSIDERATIONS
NOTICE: The killing of an endangered species
during strychnine baiting operations may result in a fine and/or imprisonment under the
Endangered Species Act. Before baiting, the
user is advised to contact the regional U.S. Fish
and Wildlife Service (Endangered Species Specialist) or the local Fish and Game Office for
specific information on endangered species.
Strychnine balls should not be used in the
geographic ranges of the following species
except under programs and procedures
approved by the US FPA; California Condor, San
Joaquin Kit Fox, Morro Bay Kangaroo Rat, Gray
Wolf, Grizzly Bear and Salt Marsh Harvest
Mouse.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD, OR
FEED BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE: Store only in original
container, in a dry place inaccessible to
children, pets and domestic animals.

PESTICIDE DISPOSAL: Pesticide wastes are
acutely hazardous. Improper disposal of excess
pesticide, spilled bait, or rinseate is a violation of
Federal Law. If these wastes cannot be
disposed of by use according to label
instructions contact your State Pesticide or
Environmental Control Agency or the National
Waste representative at the nearest EPA
Regional Office for guidance.

CONTAINER DISPOSAL: Completely empty by
shaking and tapping sides and bottom to
loosen clinging particles. Empty residue into
application equipment. Then dispose of bags in
a sanitary landfill or by incineration if allowed by
State and local authorities.

KEEP OUT OF REACH OF CHILDREN

DANGER-PELIGRO
POISON

FIRST AID
IF SWALLOWED: CALL PHYSICIAN OR POISON CONTROL CENTER
IMMEDIATELY. If less than ten (10) minutes have passed
since the
poison was taken, give 1 or 2 glasses of water and induce vomiting
by
touching the back of the throat with finger. Repeat until vomit fluid is
clear. Have victim lie down in a quiet, darkened room and keep victim
warm and quiet. If victim is unconscious, do not give anything by mouth
and do not induce vomiting.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial
respiration. Get medical attention.

IF IN EYES: Hold eyelid open and flush with steady, gentle stream of
water for 15 minutes. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

HOT LINE NUMBER
Have the product container or label with you when calling a poison
control center or doctor, or going for treatment. For leaks, fire, and
medical emergencies only, call 1-800-535-5005.

NOTE TO PHYSICIAN
A. Administer 100% OXYGEN by positive pressure to provide as
much
pulmonary gas exchange as possible, despite seizures.

B. Administer ANTICONVULSANT DRUGS intravenously to control
convulsions.

NOTICE: If may be difficult or impossible to stop the seizure activity
without stopping respiration. Be prepared to maintain pulmonary
ventilation mechanically. Tracheotomy may be necessary if seizures
are prolonged.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Sale, distribution and use of this product must be in accordance with the provisions of the final order on Strychnine by the Administrator of the U.S. Environmental Protection Agency.

USE RESTRICTIONS

This product may be only be used in manual, below-ground applications to pocket gophers' burrow systems located in rangelands, pastures, croplands, forests, and non-agricultural areas to control plains pocket gophers (Geomys bursarius), desert pocket gophers (Geomys arenarius), yellow-faced pocket gophers (Pappogeomys castanops), northern pocket gophers (Thomomys talpoides), southern pocket gophers (Thomomys monticolus), Mazama pocket gophers (Thomomys mazama), mountain pocket gophers (Thomomys monticoles), Townsend's pocket gophers (Thomomys townsendii), valley pocket gophers (Thomomys bottae), and Camas pocket gophers (Thomomys bulbivorus). Do not apply this product by use of a mechanical burrow builder. Do not apply this product at residential sites.

Do not apply this product above ground level, to the ground surface or on any food or feed crop. Do not apply this product in a way that will contact workers, other persons, or domestic animals. Keep pets and other people out of the area during application.

SEE NEXT PANEL FOR ADDITIONAL DIRECTIONS FOR USE

DIRECTIONS FOR USE
(Continued from previous panel)

BAITING: Make at least two baits sets per active burrow system. Additional sets, up to seven per system, may be needed for systems with large numbers of mounds. Depending upon pocket gopher population levels, one pound of bait will treat one to eight acres when applied by hand. Apply this product using either of the methods described below.

Probe Method: Pocket gophers' fan-shaped dirt mounds have a horseshoe-shaped depression or burrow plug on the flat side of the fan. Locate gophers' main underground runway by using a gopher-probe product, a rod, or a smooth strong stick to probe the ground surrounding the mound. Begin probing on the plug side, about a foot away from the mound. The optimum probing distance may vary from species to species and place to place. When soil resistance against the probe decreases abruptly, the main runway has been entered.

Remove probe and enlarge probe hole slightly if necessary to accommodate baiting. Deposit one teaspoonful of bait through probe hole and into main runway. If a bait-dispensing probe is used, deposit a teaspoon amount of bait through the probe before removing it. Cover probe hole with dirt and other materials, taking care not to let soil cover bait. Immediately collect and remove any bait that spills on the ground surface.

Lateral Tunnel Method: Remove plug from the flat side of the burrow fan. Using a long-handled spoon, insert one teaspoonful of bait into the main runway system. Close the tunnel with soil. Do not permit soil to cover bait. Immediately collect and remove any bait that spills on the ground surface.
