Sanoxx II® is a proven "one-step" disinfectant-cleaner-sanitizer-fungicide-mildewstat-virucide* which is effective in water up to 400 ppm hardness in the presence of 5 percent serum contamination.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Apply Sanoxx II solution to walls, floors, and other hard (inanimate) nonporous surfaces such as tables, chairs, countertops, sinks, file, porcelain, toilet bowls, and urinals with a cloth, mop or coarse spray so as to thoroughly wet surfaces. For heavily soiled areas, a preliminary cleaning is required. Prepare a fresh solution daily or when use solution becomes visibly dirty.

Disinfection: To disinfect hard, nonporous surfaces in hospitals, add 2 ounces per gallon of water (1:64 dilution). Treated surfaces must remain wet for 10 minutes. At 1/4 ounces per gallon of water (~1:256 dilution) Sanoxx II will disinfect hard, nonporous surfaces in homes, schools, industry and nonmedical institutions.

Sanitizing moist contact surfaces (such as floors, walls, tables, etc.): At 2 ounces per 4 gallons of water (1:128 dilution) use level. Sanoxx II is an effective sanitizer against Staphylococcus aureus and Klebsiella pneumoniae on hard, nonporous environmental surfaces. Treated surfaces must remain wet for 30 seconds. Refill applicator bottle: Sanoxx II can be used with Cristin's Sanoxx II refill applicator bottle. When using this applicator, follow the use instructions found on the bottle label.

* Kills HIV on pre-cleaned, hard nonporous surfaces

Effective in hard water

For home, hospital, institutional, and industrial use

DANGER

KEEP OUT OF REACH OF CHILDREN

Active ingredients:
- Dodecyl dimethyl ammonium chloride: 1.05%
- Dicaprylyl dimethyl ammonium chloride: 0.59%
- Diethyl dimethyl ammonium chloride: 0.90%
- Alkyl (C10, 50.0%, C12, 40.0%, C14, 10.0%)
- Dimethyl benzyl ammonium chloride: 2.05%

Directions:

- Make up to 32 gallons
- Net Contents: 1 US Pint (473 mL)

Disposal of infectious material: Blood, body fluids, cleaning materials and clothing should be autoclaved and disposed of according to local regulations for infectious waste disposal.

PRECAUTIONARY STATEMENTS

DANGER: Hazards to humans and domestic animals.
- Corrosive. Harmful if swallowed. Causes eye and skin damage.
- Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid contamination of food.

FIRST AID

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses. If present, after the first five minutes, then continue rinsing eye.
- Call Poison Control Center or doctor for treatment advice.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with water for 15-20 minutes.
- Call Poison Control Center or doctor for treatment advice.

If swallowed:
- DO NOT Induce vomiting unless told to do so by Poison Control Center or doctor.
- DO NOT give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN
Perhaps most serious damage may result from the use of gastric lavage?
Measures against local irritation, necessary prehospital and consultation may be needed.

STORAGE AND DISPOSAL

Store in a cool, dry place, away from food and drink. Do not store near any source of heat. Use of this product reduces the effectiveness of other disinfectants, bleaches and fungicides.

Disinfecting hard, nonporous surfaces: Hospitals — measure two teaspoons of Sanox II into spray bottle and fill to 22-ounce mark with water. Schools, industrial and nonmedical institutions — measure 1 1/4 teaspoons of Sanox II into spray bottle and fill to 22-ounce mark with water. Thoroughly wet surfaces. Treated surfaces must remain wet for 10 minutes.

Sanitizing nonfood contact surfaces: Measure 1/3 teaspoon of Sanox II into spray bottle and fill to the 22-ounce mark with water. Thoroughly wet surfaces. Treated surfaces must remain wet for 60 seconds.

First Aid: In case of contact, immediately flush eyes or skin with plenty of water for 15 minutes. For eyes — call a physician. If swallowed — promptly drink a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician immediately. Avoid alcohol.

NOTE TO PHYSICIAN: Possible mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

STORAGE AND DISPOSAL: Store in areas inaccessible to children. Always replace cap securely. Wrap original container in several layers of newspaper and dispose of in trash.

For US Hazards Information, call 1-888-736-0974.

Sanox® II is a proven "one-step" disinfectant-cleaner-sanitizer-fungicide-mildewstat- 
virucide® which is effective in water up to 400 ppm hardness in the presence of five 
percent serum contamination.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its 
labeling.

Apply Sanox II to walls, floors, and other hard (animate) non-porous surfaces such as 
tables, chairs, countertops, sinks, tile, porcelain, toilet bowls, and urinals with a 
cloth, mop or coarse spray so as to thoroughly wet surfaces. For heavily soiled areas, 
a preliminary cleaning is required. Prepare a fresh solution daily or when solution in 
use becomes visibly dirty.

Disinfection: To disinfect hard, non-porous surfaces in hospitals, add two ounces 
Sanox II per gallon of water (1:16 dilution). Treated surfaces must remain wet for 10 
minutes. At 1% ounces per gallon of water (1:100 dilution), Sanox II will disinfect 
hard, non-porous surfaces in schools, industry and non-medical institutions.

Sanitizing non-food contact surfaces (such as floors, walls, tables, etc.): At 
two ounces per four gallons of water (1:256 dilution) use level, Sanox II is an effective 
sanitizer against Staphylococcus aureus and Klebsiella pneumoniae on hard, non-porous 
environmental surfaces. Treated surfaces must remain wet for 60 seconds.

Refill applicator bottle: Sanox II can be used with Conklin's Sanox II refill applicator 
bottle. When using this applicator, follow the use instructions found on the bottle label.

*Kills HIV on pre-cleaned environmental surfaces/objects previously soiled 
with blood/body fluids in health care settings or other settings in which there is an 
expected likelihood of soiling of (animate) surfaces/objects with blood or body fluids 
and in which the surfaces/objects likely to be soiled with blood or body fluids can be 
associated with the potential for transmission of human Immunodeficiency virus type 1 
(HIV-1), associated with AIDS.

Special instructions for cleaning and decontamination against HIV-1 on 
surfaces/objects soiled with blood/body fluids. Use a 1:16 dilution mix.

Personal protection: Cleaners should always be done wearing protective latex 
gloves, goggles, masks and eye protection.

Cleaning procedures: Blood and other body fluids containing HIV-1 must be 
thoroughly flushed from surfaces and objects before the application of Sanox II.

Contact times: Let surfaces/objects air dry for five minutes (15 seconds) for HIV-1 with a 
two ounce (Sanox II) per gallon of water (1:100 dilution) use level. Let air dry for one minute (15 seconds) for HIV-1 with a two 
ounce (Sanox II) per gallon of water (1:80 dilution) use level. Let air dry for ten minutes (15 seconds) for decontamination against all other viruses, bacteria and fungal disease.

Disposal of infectious material: Blood, body fluids, cleaning materials and clothing 
should be autoclaved and disposed of according to local regulations for infectious 
waste disposal.

PRECAUTIONARY STATEMENTS

DANGER

Hazards to humans and domestic animals. Contains a hazardif swallowed. Causes eye and skin damage. Do not get in eyes on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid contamination of food.

FIRST AID

Have the product container or label with you when calling a Poison Control Center 
or doctor, or going for treatment.

If in eyes

- Hold eye open and rinse slowly and gently with water for 15–20 minutes.
- Remove contact lenses, if present, after the first five minutes, then continue rinsing eye.
- Call Poison Control Center or doctor for treatment advice.

If on skin or clothing

- Take off contaminated clothing.
- Rinse skin immediately with water for 15–20 minutes.
- Call Poison Control Center or doctor for treatment advice.

If swallowed

- Call Poison Control Center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- DO NOT Induce vomiting unless told to do so by Poison Control Center 
or doctor.
- DO NOT give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against 
circulatory shock, respiratory depression and convulsion may be needed.

STORAGE AND DISPOSAL

Store in areas inaccessible to children. Always replace cap securely. DO NOT substitute cap with pump 
or other dispensers. Securely wrap original container in several layers of newspaper and dispose of in 
trash. DO NOT re-use container.

For US Health Hazard Information, call 1-888-786-0974.

Sanox™ is a proven "one-step" disinfectant-cleaner-sanitizer-fungicide-mildewocide** that is effective in water up to 400 ppm hardness in the presence of five percent serum contamination.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Apply Sanox II to walls, floors, and other hard (inanimate) non-porous surfaces such as tables, chairs, countertops, sinks, tile, porcelain, toilet bowls, and unlined with a cloth, mop or coarse spray so as to thoroughly wet surfaces. For heavily soiled areas, a preliminary cleaning is required. Prepare a fresh solution daily or when solution in use becomes visibly dirty.

Disinfection: To disinfect hard, non-porous surfaces in hospitals, add two ounces Sanox II per gallon of water (1:84 dilution). Treated surfaces must remain wet for 10 minutes. At 1/4 ounce per gallon of water (1:100 dilution), Sanox II will disinfect hard, non-porous surfaces in schools, industry and non-medical institutions.

Sanitizing non-food contact surfaces (such as floors, walls, tables, etc.): At two ounces per four gallons of water (1:256 dilution) use level, Sanox II is an effective sanitizer against Staphylococcus aureus and Klebsiella pneumoniae on hard, non-porous environmental surfaces. Treated surfaces must remain wet for 60 seconds.

Refill applicator bottle: Sanox II can be used with Conklin's Sanox II refill applicator bottle. When using this applicator, follow the use instructions found on the bottle label.

*Kills HIV on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in medical care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus type 1 (HIV-1, associated with AIDS).

Special instructions for cleaning and decontamination against HIV-1 on surfaces/objects soiled with blood/body fluids. Use a 1:84 dilution now.

Personal protection: Clean up should always be done wearing protective latex gloves, gowns, masks and eye protection.

Cleaning procedure: Blood and other body fluids containing HIV-1 must be thoroughly cleaned from surfaces and objects before the application of Sanox II.

Contact time: Leave surface wet for one minute 60 seconds for HIV-1 with a 2:1 mixture Sanox II per gallon of water (1:16 dilution) use level. Use a 10-minute contact time for disinfection against all other viruses, bacteria and fungi claimed.

Disposal of infectious material: Blood, body fluids, cleaning materials and clothing should be autoclaved and disposed of according to local regulations for infectious waste disposal.

PRECAUTIONARY STATEMENTS

NOTE TO PHYSICIAN:
Probable mucosal damage may compromise the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

ENVIROHORTAL HAZARDS
DO NOT discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. DO NOT discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL
DO NOT contaminate water, food or feed by storage or disposal.

Pesticide Storage: DO NOT store with: DO NOT reuse empty container. Always replace cap securely. DO NOT substitute cap with or other dispensers. AVOID creating or impacting of side walls.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide spray mixure or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Manager of the nearest EPA Region office for guidance.

Container Disposal: Treat waste (or equivalent) as toxic waste. That contains recycling or reconditioning or puncture and dispose of in a sanitary landfill or by incineration, or if lowered by state or local authorities, by burning, burned, avoids spill and smoke.

For US Health Hazard Information, call 1-800-746-6578.

SANOX® II is a proven "one-step" disinfectant-cleaner-sanitizer-fungicide-mildewstat-virucide® which is effective in water up to 400 ppm hardness in the presence of five percent serum contamination.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Apply SANOX II to walls, floors, and other hard (non-porous) non-porous surfaces such as tables, chairs, countertops, sinks, tile, porcelains, toilet bowls, and sinks with a cloth, mop or coarse spray so as to thoroughly wet surfaces. For heavily soiled areas, a preliminary cleaning is required. Prepare a fresh solution daily or when solution in use becomes visibly dirty.

Skin Irritations: To disinfect hard, non-porous surfaces for hospital, add two ounces SANOX II per gallon of water (1:94 dilution). Treated surfaces must remain wet for 10 minutes. At 0.1% concentration, SANOX II will disinfect hard, non-porous surfaces in schools, industry and non-medical institutions.

Saturating non-flood contact surfaces (such as floors, walls, tables, etc.): At two ounces per four gallons of water (1:256 dilution) use level, SANOX II is an effective disinfectant against Staphylococcus aureus and Escherichia coli on hard, non-porous environmental surfaces. Treated surfaces must remain wet for 60 seconds. 

Regal applicator bottles SANOX II can be used with Conklin SANOX II refill applicator bottles. When using this applicator, follow the use instructions found on the bottle label.

* Kills HIV on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings or other settings in which there is an expected likelihood of soiling of these surfaces/objects with blood or body fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus type 1 (HIV-1), associated with AIDS.

Environmental Hazards:
DO NOT discontinue emission containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. DO NOT discontinue emission containing this product into sewer systems without providing notice to the local sewage treatment plant authority. For guidance, contact your State Water Board or the Regional Office of the EPA.

Storage and Disposal:
DO NOT contaminate water, food, feed, by disposal of containers. Pesticide Disposal: DO NOT store inomit. DO NOT store in open or exposed to dust, debris, dirt, dust, etc. DO NOT introduce waste into basements or other areas which are subject to any form of pollution. DO NOT store in basements or other areas which are subject to any form of pollution.

Pesticide Disposal: Pesticide wastes are odorous, hazardous, improper disposal or disposal at a site of Federal, State or local laws is allowed. Wastes must be disposed of by a facility approved by the local, state or federal authority. Contact your State Pesticide or Environmental Protection Agency or the Hazardous Waste Representative at the nearest EPA Regional Office for assistance.

Disinfectant/Virucidal Directions

1. Apply solution in use to hard, non-porous surfaces with a cloth, mop, sponge, coarse sprayer, or by immersing, thoroughly wetting surfaces.

2. For spray applications, use a coarse spray device. Spray six to eight inches from surface, and rub with brush, sponge or cloth. Avoid breathing spray.

3. Treated surfaces must remain wet for 10 minutes. Wipe dry with a cloth, sponge or mop; or allow to air dry.

4. Prepare a fresh solution daily, or more often if the solution in use becomes visibly diluted or soiled.

5. After disinfecting food contact surfaces, rinse with potable water. DO NOT use on utensils, glasses or dishes.

6. If heavily soiled, a preliminary cleaning is required.

SAFETY

For US Health Hazard Information, call 1-888-786-0974.

Proposition 65 Statement: This product contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

VOC Content: 0.1%
Disinfection of Poultry and Livestock Premises

Using a two ounce per gallon of water use rate (1:34 dilution)

1. Poultry and Swine premises:
   • Remove all animals and feeds from premises.
   • Remove all litter, droppings and manure from floors, walls and surfaces of barns, pens, stalls, chutes and other facilities and fixtures occupied or traversed by animals.
   • Empty all troughs, racks and other feeding and watering appliances.
   • Thoroughly clean all surfaces with soap or detergent, and rinse with water.
   • Saturate surfaces with the recommended disinfecting solution for 10 minutes.
   • Immerse all types of equipment used in handling and restraining animals, as well as forks, shovels and scrapers.
   • DO NOT use equipment or house animals until the treatment has been absorbed, set or dried.
   • Thoroughly scrub feeding and watering equipment with soap or detergent and rinse with potable water before reuse.

2. Hatcheries:
   • Treat the following hard, non-porous surfaces: hatchers, setters, trays, racks, carts, sexing tables, delivery vehicles and other hard surfaces.
   • Leave treated surfaces wet for 10 minutes or more.
   • Allow to air dry.

3. Vehicles:
   • Clean all mats, crates, cabs and wheels with high pressure water and Sanox II.
   • Leave treated surfaces wet for 10 minutes or more.

4. Dressing Plants:
   • Cover or remove all food and packaging materials.
   • Remove all heavy soils prior to application.
   • Saturate all surfaces (equipment, utensils, walls, floors and loading platforms) with disinfectant and scrub.
   • Leave wet for 10 minutes, then thoroughly rinse with potable water before resuming operations.

5. Veterinary Practice-Animal Care-Animal Laboratory-Zoos-Pet Shops-Kennels:
   • Remove all animals and feeds from premises, animal transportation vehicles, crates, etc.
   • Remove all litter, droppings and manure from floors, walls, equipment and utensils used or occupied by animals.
   • Empty all feeding and water appliances.
   • Clean all surfaces with soap or detergent and rinse with water.
   • Saturate surfaces for a period of 10 minutes.
   • Wipe or allow to air dry.
   • Immerse all halters, ropes and other types of equipment used in handling and restraining animals as well as forks, shovels and scrapers used for removing litter and manure.
   • Ventilate buildings and other closed spaces.
   • DO NOT house animals or use equipment until treatment has been absorbed, set or dried.

6. Farm Premises:
   • Remove all animals and feed from premises, vehicles and enclosures.
   • Remove all litter and manure from floors, walls, facilities and fixtures utilized by animals.
   • Thoroughly clean all surfaces with soap or detergent, and rinse with water.
   • Saturate all surfaces for a period of 10 minutes.
   • Ventilate buildings, cars, trucks, boats and other closed spaces.
   • DO NOT house livestock or use equipment until treatment has been absorbed, set or dried.
   • Thoroughly scrub all treated feeding equipment with soap or detergent and rinse with potable water before reuse.

Recommended Sanitation Directions

To sanitize hard, nonporous environmental non-food contact surfaces, add two ounces of Sanox II per four gallons of water (1:256 dilution). Treated surfaces must remain wet for one minute (60 seconds). Wipe dry with a sponge, mop or cloth; or, allow to air dry. Sanox II meets EPA Sanitizer Test Standards for non-food contact sanitizer at this dilution.

Sanox II is effective as a sanitizer against Staphylococcus aureus and Klebsiella pneumoniae on hard, nonporous environmental surfaces when mixed at two ounce Sanox II per four gallons of water (1/4 ounce to one gallon) use level.
