As a hygienic cleanser, disinfectant and active deodorizer for foods, and to maintain food-quality at its highest. For use in spaces, operating rooms, schools, businesses, health care facilities, banks, restaurants, and on all surfaces. Use in food contact surfaces, surgical cuts, swabs, forceps, scissors,ippers, keyboards, terminals, humidifiers, warmers, stools, bowls, forks, knives, spoons, dishes, pans, mops, and anywhere bacteria, mold or mildew may be present. Patented Residual Action is activated by moisture to provide continual hydration to prevent re-infection. Sporicidin is effective in hard to reach and hard to clean areas, including food processing, food handling, and food preparation surfaces. Sporicidin can be used to maintain food quality, prevent cross-contamination, and provide a barrier against the growth of bacteria, mold, and mildew.

**Precautions:**

- Not for use on packaged or canned food.
- Not for use on food preparation equipment.
- Not for use on food contact surfaces.

**Storage:**

- Store in a cool, dry place.
- Keep out of reach of children.
