RESTRICTED-USE PESTICIDE
Due to acute oral, acute dermal and primary dermal irritation toxicity.
For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator’s Certificate.

ACTIVE INGREDIENT: Zinc Phosphide (CAS #1314-84-7): 10%
OTHER INGREDIENTS: 90%
TOTAL 100%

KILLS HOUSE MICE

USE RESTRICTIONS:
- Do not apply by any method, to any part, or to any site not specified on this label.
- This product may only be used for the control of house mice (Mus musculus) inside homes, industrial and agricultural buildings, and similar man-made structures. The only exception is that the product may also be dusted from the outside of the building into structural voids.
- Apply only in locations accessible to children, pets or domestic animals.
- Do not place bait near or inside ventilation duct openings.
- If this product is in agricultural buildings where livestock feeds are stored, or in commercial food service, food manufacturing or food processing establishments, limit treatments to concealed, inaccessible places such as spaces between floors and walls. Do not apply tracking powder along walls, it comes, or in open floor area of rooms in which food or feed is handled or stored. Do not apply ZP TRACKING POWDER in areas where there is a possibility of containing water, food, foodstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come in direct contact with food.

APPLICATION DIRECTIONS:
SELECTION OF TREATMENT AREAS: Determine dry, solid-free areas where house mice will most likely pick up ZP TRACKING POWDER on their feet or fur and ingest it during grooming. Generally, these areas are along walls, by opened openings, in corners and concealed places, in spaces between floors and walls, or in locations where house mice or their signs have been observed. Remove goods piled directly on floor and place on skids. Use boxes or other obstacles to force house mice to travel through constrained areas. When using this product in homes, only treat in concealed, inaccessible spaces such as spaces between floors and walls. Evenly sprinkle 1 to 5 grams by lightly agitating spoon (one to two level teaspoonful amounts) of ZP TRACKING POWDER into 48 by 24 inch panels. Using a hand-powered duster, dust into wall voids and spaces between floors. While wearing waterproof gloves, where accessible, collected and dispose of all dead animals. Maintain ZP Tracking Powder in treated areas for seven days or until fresh signs of mouse activity cease to appear. Clean up any powder that is accessible and dispose of in accordance with disposal directions.

TREATMENT FOR PET POISONING:
If animal eats bait, call veterinarian at once. If animal eats tracking powder or loses tracking powder, call veterinarian at once. For animals ingesting bait, contact veterinarian for treatment advice. If animal eats tracking powder, call veterinarian for treatment advice. Induce vomiting by using hydrogen peroxide. Sodium bicarbonate can be given orally to neutralize the acidity of the stomach. It is recommended that atropine, a parasympathetic blocking agent be given to counteract the effects of stomach parasympathetic stimulation. Nitroglycerin, a heart stimulant, and atropine are given to control heart rate and rhythm. It is recommended that the patient is kept in a quiet environment. If the condition of the patient is not improving, immediately transport to a veterinarian.

FIRST AID:
- Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-694-4644 for emergency medical treatment information.
- If you experience signs and symptoms such as nausea, abdominal pain, tightness in chest, or weakness, see a physician immediately. For information on pesticide products (including health concerns, medical emergency, or pesticide incidents), call the National Pesticide Information Center at 1-800-858-7378.

IF SWALLOWED:
- Call a poison control center or doctor immediately for further treatment advice.
- For animals ingesting bait, contact veterinarian for treatment advice. Induce vomiting by using hydrogen peroxide. Sodium bicarbonate can be given orally to neutralize the acidity of the stomach. It is recommended that atropine, a parasympathetic blocking agent be given to counteract the effects of stomach parasympathetic stimulation. Nitroglycerin, a heart stimulant, and atropine are given to control heart rate and rhythm. It is recommended that the patient is kept in a quiet environment. If the condition of the patient is not improving, immediately transport to a veterinarian.

IF INHALED:
- If person is not breathing, call 911 or ambulance, then give artificial respiration, preferably mouth-to-mouth or by mouth.
- Call a poison control center or doctor immediately for treatment advice or transport the patient to the nearest hospital.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15 – 20 minutes.
- Do not use any skin cleanser. Rinse skin immediately with plenty of water for 15 – 20 minutes.
- Do not remove contaminated clothing.
- Call a poison control center or doctor for further treatment advice.

If person is not breathing, call 911 or ambulance, then give artificial respiration, preferably mouth-to-mouth or by mouth. If person is unconscious, give artificial respiration and/or airway to maintain the airway. Use an automatic resuscitation device (AED), if available. Call 911 or an emergency center or doctor.

IF SKIN OR CLOTHING IS CONTAMINATED:
- Wash contaminated skin with soap and water for at least 15 minutes.
- Wash contaminated clothing with soap and water.

EDIBLE PLANTS, TREES OR SHRUBS:
Waste resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

ENVIRONMENTAL HAZARDS:
This product is extremely toxic to birds, fish and other wildlife. Dogs, cats, and other animals might be poisoned if they feed upon animals that have eaten this bait. Do not contaminate water when disposing of equipment, wash water or runoff.

STORAGE AND DISPOSAL:
- Do not contaminate water, food, or feed by storage or disposal.
- Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

DISCLAIMER:
To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than that indicated on the label. To the extent consistent with applicable law, buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
