DIRECTIONS FOR USE

This product may only be applied to active burrows to control Norway rats, and roof rats within 100 feet of buildings and man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to harboring or attracting rodent infestations provided that infestations of these rodents have been confirmed. Efforts should be made to remove food trash, garbage, clutter and debris. Bait must be placed no less than 6 inches into active Norway/roof rat burrows. Do not broadcast bait.

Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not use this product in sewers.

Do not sell this product in individual containers holding less than 16 pounds of bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners or concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain and snow. Remove any alternative food as possible.

APPLICATION DIRECTIONS:

RATS: Apply 3 to 16 ounces of bait at intervals of 15 to 30 feet per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.

HOUSE MICE: Apply 1/4 to 1/2 oz. (1 - 2 level tablespoons) of bait per placement at 8 to 12 foot intervals. Larger placements (up to 2 oz.) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse activity cease.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Wear gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Do not get in eyes, on skin, or on clothing. Keep away from children, domestic animals, and pets. All handlers (including applicators) must wear long sleeves, long pants, shoes, gloves and any other personal protective clothing to prevent contact with the product and its residue. Wear gloves when handling bait. Keep out of reach of children.

USER SAFETY REQUIREMENTS

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling the product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to fish, birds and other wildlife. Dogs, cats, and predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark.

CONTRAC®
RAT & MOUSE BAIT

BULK MEAL

KILLS RATS & MICE
Kills Warfarin Resistant Norway Rats

Norway rats, roof rats and house mice may consume a lethal dose in one night’s feeding with first dead rodents appearing four to five days after feeding begins.

ACTIVE INGREDIENT: Bromadiolone (CAS #28772-86-7): 0.005%
OTHER INGREDIENTS*: . . . . . . . . . . . . . . . . . . . . . . . 99.995%
*Contains Denatonium Benzoate

TOTAL 100.000%

KEEP OUT OF REACH OF CHILDREN

CAUTION

See side panels for First Aid and additional precautionary statements.

FOOD STORAGE:

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage:

Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal:

Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

Pesticide Container:

Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration. Call your Local Waste Agency for any questions on proper disposal.

WARRANTY:

To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

BULK MEAL

CAUTION

In areas open to vandalism.

Tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

Anticoagulant Bromadiolone:

If swallowed or absorbed through the skin, this material may reduce the clotting ability of the blood or elevate prothrombin times. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

NOTE TO PHYSICIAN

If swallowed or absorbed through the skin, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K1 intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

If in eyes:

Call a poison control center or doctor for treatment advice.

• • •

Do not give anything by mouth to an unconscious person.

FIRST AID

If inhaled:

Remove from exposure and allow to breathe fresh air. If unconscious, administer artificial respiration. Provide necessary medical care. Provide oxygen if breathing is difficult. Remove any clothing that might prevent access to skin.

• • •

If on skin:

Remove contaminated clothing. Wash affected area with soap and water. Call a poison control center or doctor for treatment advice.

• • •

If on eyes:

Wash the affected eye with running water for at least 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

• • •

If swallowed:

Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

• • •

WALLS, ROOF, GUTTERS, AND SADDLES

If a cockroach, mouse, or other pest fills another of the above, is prohibited. This product must not be applied directly to food or feed crops.
