SECTION 24(c) SPECIAL LOCAL NEED LABEL

Simazine 4L Flowable Herbicide is a state restricted use pesticide and is to be distributed only by licensed pesticide dealers. Only certified applicators or persons under the direct supervision of a certified applicator may apply Simazine 4L Flowable Herbicide

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

SIMAZINE 4L FLOWABLE HERBICIDE

EPA Reg. No. 34704-687

EPA SLN No. WA-900005

DIRECTIONS FOR USE

☐ IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

☐ THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF APPLICATION.

☐ FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, AND PRECAUTIONS ON THE EPA REGISTERED LABEL.

This label for Simazine 4L Flowable Herbicide expires and must not be distributed in or used in accordance with this SLN registration after December 31, 2019.

For Use on Brussels Sprout, Cabbage, and Cauliflower Grown for Seed Only to Control Annual weeds (such as Annual bluegrass, Chickweed, Groundsel, Pineappleweed, Prostrate knotweed, Smartweed, Wild buckwheat):

Ground Application: Apply SIMAZINE 4L in the fall and spring as a broadcast spray in a minimum 20 gallons of water per acre by ground. Make the first application of SIMAZINE 4L at 1.6 pints (0.8 lb active ingredient) in the fall (after the start of the winter rainfall period) to control fall germinating weeds, but before the ground is frozen. Make the second application of 1.6 to 2.5 pints (0.8 to 1.25 lb active ingredient) in the early spring just after the last cultivation. For better results, these broadcast over-the-top sprays should be made before there is any significant emergence of seedling annual weeds.

Restrictions / Precautions:

1. Do not enter or allow worker entry during the restricted entry interval (REI) of 12 hours.
2. Simazine can travel (seep or leach) through soil and can enter ground water which may be used as drinking water. Simazine has been found in ground water. Users are advised not to apply simazine to sand and loamy sand soils where the water table (ground water) is close to the surface and where the soil is very permeable, i.e., well-drained soils.
3. Do not apply Simazine 4L to sand, loamy sand or gravelly areas of the field. Do not apply to areas of the field where water will accumulate.
4. For use under this SLN label do not apply Simazine 4L by air or through any type of irrigation system.
5. When tank mixing or sequentially applying simazine or products containing simazine, the total pounds of simazine applied must not exceed the specific maximum rate per calendar year as noted in the use directions.
6. Land treated with Simazine 4L should not be planted to any crop except corn until the following year as injury may occur. After harvesting the treated crop, plow and thoroughly till the soil in the fall or spring to minimize possible injury to spring-seeded rotational crops. Avoid rotating to crops susceptible to injury from simazine.
7. All Brussels sprout, cabbage, and cauliflower seed screenings shall be disposed of in such a way that they cannot be distributed or used for human food or animal feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the WSDA immediately upon request. Conditioner disposal records shall consist of documentation of on-farm disposal, disposal at a controlled dumpsite, incinerator, composter, or other equivalent disposal site and shall include the lot numbers, amount of material disposed of, the growers(s), and the date of disposal.

8. No portion of the Brussels sprout, cabbage or cauliflower plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes.

9. Brussels sprout, cabbage, and cauliflower seed shall bear a tag or container label which forbids the use of the seed for human consumption or animal feed.

10. Brussels sprout, cabbage, and cauliflower seed may not be distributed for human consumption or animal feed.

WSDA Aquatic Advisory
This pesticide is toxic to aquatic invertebrates. Simazine 4L Flowable Herbicide should not be used in accordance with this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Natural Resources Assessment Section web site at agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

WSDA Container Disposal Guidance:
Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

Loveland Products, Inc. Special Conditions and Disclaimer for use of Simazine 4L on Brussels sprout, cabbage and cauliflower grown for seed. This product when used on Brussels sprout, cabbage and cauliflower grown for seed may lead to crop injury, loss, or damage. Loveland Products, Inc. recommends that the user and/or grower test this product in order to determine its suitability for such intended use.
