SECTION 24(c) SPECIAL LOCAL NEED LABEL
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON
FOR USE BY THE WASHINGTON BULB COMPANY, INC. ONLY

ACTELLIC 5E INSECTICIDE
EPA REG. NO. 1381-170
EPA SLN NO. WA-900038

DANGER/PELIGRO

This label for Actellic 5E Insecticide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2017.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

DIRECTIONS FOR USE (FOGGING TREATMENT ONLY): For control of mealy bugs (Phenacoccus-types) in iris. Mealy bugs can be controlled with indoor space treatment. The effect of Actellic 5E Insecticide is strongly influenced by temperature. It is preferable to avoid treatment at less than 68°F (20°C).

Use Rate: 60 ml per 10 cu. m. cell content (0.0159 gallons per 13.1 cubic yards cell content).

Note:
1. For space treatment, 4 cc carrier substance per 10 cu. m. cell content (0.00106 gallons per 13.1 cubic yards cell content) must be added to the Actellic.
2. Mites can sometimes remain in an empty container. A container treatment can be carried out in advance by means of space treatment (60 ml per 10 cu. m. or 0.0159 gallons per 13.1 cubic yards).
3. When bulbs are stored in cube-shaped boxes or bins ("kuubskisten"), it may be difficult for the treatment to reach the center or inner portions of the bin.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed. Do not get in eyes. Wear protective eyewear (goggles or face shield) when handling. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.
PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are barrier laminate or viton. If you want more options, follow the instructions for category G on an EPA chemical-resistant category selection chart.

Mixers, loaders, applicators and other handlers supporting admixture seed and/or grain treatments must wear: long sleeve shirt and long pants, shoes plus socks, chemical-resistant gloves, protective eyewear.

All other mixers, loaders, applicators and other handlers must wear: coveralls over long sleeve shirt and long pants, chemical-resistant footwear plus socks, chemical-resistant gloves, protective eyewear. In addition, mixers and loaders must wear: chemical-resistant apron.

Handlers must have available to them for use in case they must enter the area during treatment, or before ventilation requirements have been met: chemical-resistant headgear, and a self-contained breathing apparatus (SCBA) (MSHA/NIOSH approval number prefix TC-13F).

Follow manufacturer's instruction for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent material that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them.

ENGINEERING CONTROLS

- Any handler who enters the treated area before the ventilation requirements have been met, must maintain continuous visual or voice contact with another handler. That other handler must have immediate access to the PPE required on this labeling for handlers in the event entry into the fumigated area becomes necessary for rescue.
- Application must only be made with use stationary or cart-mounted automated fogging devices, which when activated, functions automatically without an operator present.
- Use of hand-held foggers is prohibited.
- All entries to the structure must be blocked/barricaded and posted with the required fumigant warning signs.
- All area vents must be closed and all circulating fans must be turned off.
- All misting systems must be turned off.
- Immediately after activating the fogging device, the applicator must exit the treatment area.
- Notify workers of the application warning them orally and by posting fumigant warning signs at all entrances to the treated area. The signs must bear the skull and crossbones symbol and state: (1) "Danger/Peligro", (2) "Area under Fumigation, DO NOT ENTER/NO ENTRE", (3) the date and time of fumigation, (4) Actellic 5E Insecticide in use, and (5) the name, address and phone number of the applicator.
Entry by any person - other than properly trained and equipped handlers using the PPE specified above for reentry during treatment - is PROHIBITED in the entire enclosed treatment area from the start of application until the treated area is ventilated as follows:
  o 10 air exchanges, or
  o 2 hours of ventilation using fans or other mechanical ventilating systems, or
  o 4 hours of ventilation using vents, windows other passive ventilation, or
  o 11 hours with no ventilation followed by 1 hour of mechanical ventilation, or
  o 11 hours with no ventilation followed by 2 hours of passive ventilation, or
  o 24 hours with no ventilation.

For the first 48 hours after ventilation has been completed, reentry workers must wear chemical-resistant gloves.

Workers planting bulbs treated with Actellic 5E Insecticide must wear chemical-resistant gloves.
