PRECAUTIONARY STATEMENTS
Hazard to Humans & Domestic Animals

DANGER
Corrosive, Causes Irreversible Eye Damage and Skin Burns. Harmful if Swallowed. Harmful if Absorbed through Skin. Harmful, If Inhaled. Avoid Breathing Spray Mist. Do Not Get in Eyes, on Skin, or on Clothing. Prolonged or Frequent Repeated Skin Contact May Cause Allergic Reaction in Some Individuals. Remove Contaminated Clothing and Wash Clothing Before Reuse.

May cause minor injuries to the eyes and skin. Use in a well-ventilated area. Keep out of the reach of children.

Chemical Treatment

CL-2150
Industrial, residential, and commercial use in recirculating water cooling systems, air washer systems, paper mill slime control, recirculating closed loop water cooling systems, brewery pasteurizers, and can washer systems.

Active ingredient:
- 5-Chloro-2-methyl-4-isothiazolin-3-one........11.11%
- 2-Methyl-4-isothiazolin-3-one............. 0.06%

Insect Ingredients:............. 89.83%
Total.................... 100.00%

Keep out of reach of children.

Danger

First Aid

If in eyes:
- Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes.
- Call a poison control center or doctor for treatment advice.

If on skin:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for advice.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth.
- Call a poison control center or doctor for advice.

If swallowed:
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Have person sip a glass of water if able to swallow.

Note: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contribute to the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

See side panel for additional precautionary statements.

Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons.

For the control of bacteria, algae, and fungi, add Chemical Treatment CL-2150 to industrial recirculating water cooling towers, industrial recirculating closed loop water cooling systems, brewery pasteurizers, and can warmer systems. Add Chemical Treatment CL-2150 at some point in the system to ensure uniform mixing.

Initial Dose: When the system is noticeably fouled, apply 148.483 gpm Chemical Treatment CL-2150 (1.26-7.46 pounds or 19-113 fluid ounces of Chemical Treatment CL-2150 per 1000 gallons of water in the system). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

Subsequent Dose: When microbial control is evident, add 5.219-21.79 gpm Chemical Treatment CL-2150 (0.3-1.86 pounds or 4.3-28 fluid ounces of Chemical Treatment CL-2150 per 1000 gallons of water in the system) weekly, or as needed to maintain control.

Paper Mills

Chemical Treatment CL-2150 is recommended for the control of bacterial and fungal slime in the production of paper. Point of addition: Chemical Treatment CL-2150 should be added at a point in the system to ensure uniform mixing such as the head, hydrowasher, or flow on brake storage pumps.

Dosage: Apply 0.44 to 1.3 lbs (7-23 fluid ounces) of Chemical Treatment CL-2150 per ton (dry basis) of pulp or paper produced at a slug dose. If needed, repeat daily. Badly fouled systems should be cleaned before initial treatment.

Air Washers

Chemical Treatment CL-2150 is used to control bacteria in industrial air washing systems that maintain effective mist eliminating bacteria and other deposits.

Initial Dose: When the system is noticeably fouled, apply 1.26-7.46 lbs (19-113 fluid ounces) of Chemical Treatment CL-2150 per 1000 gallons of water in the system. Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 0.3 to 1.86 lbs (4.3-28 fluid ounces) Chemical Treatment CL-2150 per 1000 gallons of water in the system weekly, or as needed to maintain control. Badly fouled systems should be cleaned before treatment is begun.

Corrosive Liquids, N.O.S.
(5-Chloro-2-Methyl-4-Isothiazolin-3-one and 2-Methyl-4-Isothiazolin-3-one)
