Phyton 27
Bactericide & Fungicide

ACTING INGREDIENT
Copper Sulphate Pentahydrate* 21.39%
INERT INGREDIENTS ........................................... 78.61%
* Copper as Metal .......................... 5.5%
Contains 2.05 lbs. Active Ingredient per gallon

KEEP OUT OF REACH OF CHILDREN
DANGER PELIGRO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle (si no usted, no entiende la etiqueta, llame a alguien para que se la explique detalladamente).

U.S. PAT. NO. 4,673,887 and 6,646,008 B1
E.P.A. REG. NO. 49538-2
E.P.A. EST. NO. 49538-MA-001
CONTENTS:
1 Gallon
3.785 Liters

FIRST AID
If In Eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If on Skin or Clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.
- If product diluted in accordance with the directions for use gets on skin, medical attention is not required.

If Swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Drink promptly a large quantity of milk, egg white, gelatin solution, or, if these are unavailable, 1 or 2 glasses of water.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.
- Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Note to Physicians: Skin symptoms may be similar to copper allergic reactions and can be treated similarly, including the use of stenosis-containing lotion. If swallowed, probiotics mucosal damage may contraindicate the use of gastric lavage.
Annual & Perennial Bedding Plants
denoted for use in the following:
Anemone, Phlox, Dianthus, and Eryngium, 1-2 plants per gallon

Potted Flowering Crops
denoted for use in the following:
Anemone, Phlox, Dianthus, and Eryngium, 1-2 plants per gallon

Nursery Crops
denoted for use in the following:
Anemone, Phlox, Dianthus, and Eryngium, 1-2 plants per gallon

Herbaceous & Woody Stock Plants and Cuttings
with noted indications:
Anemone, Phlox, Dianthus, and Eryngium, 1-2 plants per gallon

Tropical Foliage Crops
denoted for use in the following:
Anemone, Phlox, Dianthus, and Eryngium, 1-2 plants per gallon

Soil Drench Applications
Greenhouse, Field, Landscape & Interior
Drench at the following:
Anemone, Phlox, Dianthus, and Eryngium, 1-2 plants per gallon

SPECIFIC DIRECTIONS for Spraying and Dip Applications during Propagation:
When spraying cuttings or plants, apply spray to the portion of the cutting to which a new shoot or leaf will develop. When spraying cuttings, be sure to apply the spray to the terminal bud, not the base, to prevent the formation of new shoots.

SPECIFIC DIRECTIONS for Post-Harvest Dip Applications on Cut Flower Crops:
Dip flowers in a solution of a fungicide or other chemical to prevent the formation of new shoots.

SPECIFIC DIRECTIONS for Injection Applications:
Shade & Ornamental Trees
ELM: Treat with a mixture of 1 part ELM tree injection solution and 9 parts water. This solution should be applied to the trunk of the tree at the base, up to a height of 1 meter. The treatment should be repeated every 3 years to prevent the spread of ELM disease.

DAISY, ORCHID, AND PHLOX: Treat the affected plants with a solution of 1 part ELM tree injection solution and 9 parts water. This solution should be applied to the trunk of the plant at the base, up to a height of 1 meter. The treatment should be repeated every 3 years to prevent the spread of ELM disease.
