DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Re-entry into treated water 관 must be prohibited above levels of 5 parts per million (ppm) free residual chlorine. Read all precautionary statements before use.

FOR REGULAR DOSAGE

1. Chlorinator: Add 5 cups of this product per 500 gallons of water to the water prior to entering the spa. Wait 5 minutes then check the chlorine residual. The residual chlorine level must be between 2 to 3 ppm. If the level is not, additional doses of material should be added until it does. Once the chlorine residual is established in the 2 to 3 ppm range, the spa or hot tub may be entered.

2. Maintain: This product should be added daily or as necessary to maintain a 2 to 3 ppm residual chlorine level. Frequent check should be made of residual chlorine using a reliable test kit. This product should be broadcast over the surface of the water and allowed at least 5 minutes in time before testing. Note: Heavy bather usage or the use of oils or lotions may increase the chlorine demand of the spa or hot tub resulting in the need for more frequent check of chlorine residual.

3. Check pH: The pH should be maintained with a reliable test kit and maintained in the 7.2 to 7.8 range for a spa, sparkling water. The pH can be decreased by adding a suitable agent such as Leisure Time® Acid Bicarbonate or increased by adding suitable agent such as Leisure Time® Sodium Bicarbonate.

4. SUPERCHLORINATION: It is good practice to superchlorinate every 2 to 4 weeks to control algae and bacteria. Superchlorinate, add 1 lb. of this product for every 500 gallons of water. Return program when chlorine residual needs 2 to 3 ppm.

PRECAUTIONARY STATEMENTS

RISKS TO HUMANS AND DOMESTIC ANIMALS:

DANGER. Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Read all precautionary statements and first aid statements before use.

FIRST AID

IF IN EYES: Hold eyelids open and rinse slowly with water for 15 to 20 minutes. Remove contact lenses if present after 5 minutes then continue rinsing eyes. Call poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucous membrane damage may contaminate the use of gastric lavage.

Leisure Time maintains clean, clear, sanitized water

ACTIVE INGREDIENT:
Sodium Dichloro-a-Triazinetrione Dihydrate.....................99%
OTHER INGREDIENTS:..................................................1%
TOTAL..............................................................100%

Available Chlorine................................................66%

PHYSICAL OR CHEMICAL HAZARD:
DANGER. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gas and spouts. Do not add water to this product. Add only into water. Do not allow to become wet or drip below use.

Can react with other materials, including other water treatment products, to cause flaring, explosion, and the release of toxic gases. Keep all foreign matter, including other water treatment products, away from this product. Use only clean hands to dispense this product. Do not allow this product to contact other water treatment products. If liquid with a wrapper, make sure wrapper is completely clean and free of residue from other water treatment products before filling this product in a dispenser. Avoid spilling this product. Exposure to heat can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases. Store in a cool, dry, well-ventilated area away from heat or open flame.

Storing oxidizing agent. This product can increase fire intensity. Keep away from heat and from flammable and burning materials (like a lit cigarette).

ENVIRONMENTAL HAZARD: This material is toxic to fish and aquatic organisms.

STORAGE & DISPOSAL:
Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contain hazardous or flammable or toxic or corrosive material.
