When the air concentration level of methyl bromide is above 5 ppm and a respirator is required, shoes and socks should be worn. Loosely-fitting or well ventilated long-sleeved shirt and long pants or equivalent, e.g., a one-piece rubber apron. Do not reuse them.

Removal of PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

CAUTION PELIGRO

Methyl Bromide 100

Fumigation

NOTE TO PHYSICIAN

Early symptoms of overexposure are dizziness, headache, fatigue, depression, tremors, weakness, and collapse. Lung edema may develop in 4 to 8 hours after exposure, accompanied by cardiac arrhythmia; these effects are the usual cause of death. Recovery may result in permanent disability. Maximum permissible exposure (MPE) is 0.1 ppm for 15 minutes. Below 0.1 ppm, levels suggest the occurrence, but not the degree, of exposure. Treatment is symptomatic.

NOTE TO PHYSICIAN

Emergency phone numbers are: Hospital emergency room, county or city health department, and police. Long-term effects may be 3-18 months. Treat skin and mucous membrane irritation with water for 15-20 minutes. Call a poison control center or doctor for treatment. Call a poison control center or doctor for treatment. Call a poison control center or doctor for treatment.

First Aid
