**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**APPLICATION INFORMATION**

Select the proper concentration of GSI 800 PINE CLEANER DISINFECTANT from the directions below.

- Apply the concentrate with a clean mop, brush, cloth, sponge, or mechanicalscraper. For disinfection, thoroughly wet the surfaces to be treated.
- Surfaces must remain moist for at least 10 minutes to remove proper germination intact. Wear a clean cloth or dry cloth in air. Rinse all surfaces that come in contact with food such as countertops, appliances, tables and stovetops with potable water before use. Do not use this product on stainless, glassware, or ceramics. Prepare food use solutions. Do not reuse solutions. Destroy solutions when they become visibly soiled.

**CHEENING**

To Clean and Deodorize or to Prevent Post Disinfection. Depending on the soil level of the area to be cleaned, use 3 to 12 oz. of GSI 800 PINE CLEANER DISINFECTANT per gallon of water.

**Disinfecting:**

- Hospitals, Healthfood Facilities (Clinics), Nursing Homes. Use 7 1/2 oz. of GSI 800 PINE CLEANER DISINFECTANT per gallon of water for one step cleaning and disinfection of areas with little to medium soil load. For heavily soiled areas, pre-treat as directed above and then follow with 3 oz. of GSI 800 PINE CLEANER DISINFECTANT per gallon of water.
- Schools, Industrial areas, Home, Barber Shops, Restrooms, Restrooms, Food and Meat Processing Plants (non-food, processing areas). Public Restrooms, Other Non-Medical areas. Precision surfaces. Then, distribute a total solution of 4 oz. of GSI 800 PINE CLEANER DISINFECTANT in a gallon of water (1 part to 3 parts water). Alternately, clean and disinfect in one operation using 1 1/2 oz. of GSI 800 PINE CLEANER DISINFECTANT in a gallon of water.
- **TOILET INNARDS:** Normal Disinfectant and Cleaner Directions. Empty toilet bowl using a 1 oz. per gallon of water solution in the same way as any other surface disinfection.
- **VETERINARY PRACTICE:** Animal Care/Animal Laboratory/2000 Pet Shop/Kennel Disinfection Directions. For cleaning and disinfecting, the following hard nonporous surfaces: equipment used not for animal food or water, idler, instruments, cages, kennels, sickens, cages, etc. Remove all animals and animals from premises, animal transportation vehicles, crates, etc. Rinse all floors, doors and entrances from floors, walls and surfaces of facilities occupied or traversed by animals. Thoroughly clean all surfaces with soap or detergent and rinse with potable water. **Disinfect** surfaces with a solution of 7 1/2 oz. of GSI 800 PINE CLEANER DISINFECTANT per gallon of water (1 part to 3 parts water) or (equivalent diluted) for a period of 10 minutes. **Sanitize** buildings and other closed spaces. Do not house animals or provide equipment until treatment has been desalted, dried, and sanitized.

**Vehicles:** Clean all vehicles involving nuts, cranberries, and wheats with high pressure water and this product. Use 7 1/2 oz. of this product for water treatment to vehicles. Leave all surfaces wet for 10 minutes or more.

**Salon (Barber) INSTRUMENTS AND TOOLS DISINFECTION:** Mix 7 1/2 oz. of GSI 800 PINE CLEANER DISINFECTANT per gallon of water for equivalent disinfection to heat, nonporous instruments and tools. Completely immerse combs, brushes, rollers, razors, scissors, clippers, manicure and other similar instruments and tools for 15 minutes. Use a high speed instrument to flush immediately. Use a reduced solution in a spray mode. A preliminary cleaning is required. Rinse thoroughly and dry before use. Prepare a fresh solution daily or more often if the solution becomes visibly discolored or cloudy.

**Note:** 
- Fillers may remain immersed ready to use. Stainless steel shears and instruments must be removed after 15 minutes, rinsed, dried and kept in a clean, non-contaminated receptacle. Partially soiled may cause damage to metal instruments.

This product is not to be used as a personnel or surface/seat level solution on any surface or instrument that is not introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the skin barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

## DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**APPLICATION INFORMATION**

Select the proper use-director of GS800 PINE CLEANER DISINFECTANT from the diagram below.

Apply the use-director with a clean mop, sponge, cloth, spray, etc. in the desired location. For disinfection, thoroughly wet the surface to be treated. 

Surfaces must remain moist for at least 10 minutes to assure proper germicidal action. Wipe dry with a clean cloth or sponge or allow to air dry. Rinse all surfaces that come in contact with food such as countertops, appliances, tables and countertops with soap and water before re-use. Do not use the product on animals, glasses or dishes.

Prepare fresh solutions daily. Do not reuse solutions. Discard solutions when they become visibly soiled.

**Cleaning To Clean and Deodorize or to Preclean Prior to Disinfections.**

Depending on the level of soil to be cleaned, use 1 to 3 oz. of GS800 PINE CLEANER DISINFECTANT per gallon of water.

**Disinfecting**

Hospitals, Healthcare Facilities (Clinic), Nursing Homes: Use 1 to 2 oz. of GS800 PINE CLEANER DISINFECTANT per gallon of water (1 part to 16 parts water) for one-step cleaning and disinfection of areas with light to medium soil loads. For heavily soiled areas, preclean as described above and then with 6 oz. of GS800 PINE CLEANER DISINFECTANT per gallon of water (1 part to 20 parts water).

Schools, Industrial areas, Home, Barber Shops, Restaurants, Food and Meat Processing Plants (non-food processing areas), Public Restrooms, Other Non-Medical use sites: Preclean surfaces. Then, dilute with a solution of 1 oz. of GS800 PINE CLEANER DISINFECTANT per gallon of water. Alternatively, clean and disinfect one operation using 7 oz. of GS800 PINE CLEANER DISINFECTANT per gallon of water.

**DEODORIZING:**

Garbage cans, garbage trucks, industrial waste receptacles and garbage handling equipment. It is especially important to preclean the products to perform properly. Then, apply a wetting concentration of 6 oz. of GS800 PINE CLEANER DISINFECTANT per gallon of water.

**WILDER CONTROL:**

Follow directions for hospital disinfectant. Repeat treatment every seven days, or more often if floor growth occurs. Toilet bowl cleaner/TOILET BOWL SRILL IN UNLERS AND CLEANING DIRECTIONS: Empty toilet bowl or urinal and apply 1 oz. of 4 oz. per gallon of water ratio to exposed surfaces including the rim with a cloth, mop, spray or sprayer. Brush or scrub thoroughly and allow to stand for 10 minutes and flush.

**VETERINARY PRACTICE/ANIMAL CARE/ANIMAL LABORATORY/ZOO/PET SHOP/KENNELS DISINFECTION DIRECTIONS:**

Continue and decontaminating the following hard nonporous surfaces: equipment not used for animal food or water; dens, instruments, cage, kennels, stools, tables, etc. Remove all animals and foods from premises, animal transportation vehicles, crates, etc. Remove all litter, droppings and manure from floors, walls and surfaces of facilities occupied or traveled by animals. Thoroughly clean all surfaces with soap and detergent and rinse with potable water. Saturate surfaces with a solution of 1 oz. of GS800 PINE CLEANER DISINFECTANT per gallon of water (1 part to 16 parts water) equivalent diluted for a period of 10 to 15 minutes. Ventilate buildings and other closed spaces. Do not house animals or employ equipment until treatment has been absorbed, or dried.

**VEHICLES:**

Clean all vehicles including tires, doors, windows and wheels with high pressure hot water and the product. Use 7 oz. of this product per gallon of water to wash vehicles. Leave all surfaces wet for 10 minutes or more.

**SALON (BARBER) INSTRUMENTS AND TOOLS DISINFECTING TRICKS/INSTRUCTIONS:**

Mix 1 oz. of GS800 PINE CLEANER DISINFECTANT per gallon of water (for equivalent dipping tooshfield, hard nonporous instruments and tools. Completely immerse comb, tooth, a preliminary dipping is required. Rinse thoroughly and let dry before use. Prepare a fresh solution daily or more often if the solution becomes visibly dirty, cloudy or cloudy.

Note: Plicata may remain immersed until ready to use. Stainless steel sharps and instruments must be removed after 10 minutes, rinsed, dried and kept in a clean, non-contaminated receptacle. Professionally trained may cause damage to metal instruments.

This product is not to be used as a terminal high level disinfectant on any surface or instrument that has been introduced directly into the human body, either into or in contact with the bloodstream or normally sterile sites of the body. (1) contains such minute microns that which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.
