It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. (For Restricted Use Pesticides only)

SUSTAINABLE PEST MANAGEMENT

This product is for use by authorized users who are educated in the use of pesticides and who have received a federal training certificate.

COOLING WATER

This product is effective in controlling algae and bacterial growth in fresh and seawater systems, including heat exchangers, condensers, and cooling towers. BUSAN 1009 is designed to be used in feed water systems, as well as in finished water systems, to prevent the growth of algae and bacteria in these types of applications.

COOLING WATER

This product is used in feed water systems, as well as in finished water systems, to prevent the growth of algae and bacteria in these types of applications. BUSAN 1009 is designed to inhibit the growth of algae and bacteria in fresh and seawater systems, including heat exchangers, condensers, and cooling towers.

PAPER MILLING

This product is designed to inhibit the growth of algae and bacteria in papermaking systems, such as pulp and paper mills. It is effective in preventing the growth of algae and bacteria in these systems, which can cause problems such as scaling, slime, and odor.

PAPER MILLS

This product is effective in controlling algae and fungal growth on paper and paperboard machines. BUSAN 1009 is used to the weight of the paper and stock being used. It is applied as a spray to the paper and stock being used to inhibit the growth of algae and fungi.

PAPER MILLS

This product is used to control bacterial and fungal growth on paper and paperboard machines. BUSAN 1009 is added to the weight of the paper and stock being used. It is applied as a spray to the paper and stock being used to inhibit the growth of algae and fungi.

PETROLEUM SECONDARY RECOVERY

This product is for use in the oil and gas industry, specifically in the process of secondary recovery. It is used to inhibit the growth of algae and bacteria in oil production systems, which can cause problems such as scaling, slime, and odor.

PETROLEUM SECONDARY RECOVERY

This product is effective in preventing the growth of algae and bacteria in oil production systems, specifically in the process of secondary recovery. It is used to inhibit the growth of algae and bacteria in oil production systems, which can cause problems such as scaling, slime, and odor.

PETROLEUM SECONDARY RECOVERY

This product is effective in preventing the growth of algae and bacteria in oil production systems, specifically in the process of secondary recovery. It is used to inhibit the growth of algae and bacteria in oil production systems, which can cause problems such as scaling, slime, and odor.

PETROLEUM SECONDARY RECOVERY

This product is effective in preventing the growth of algae and bacteria in oil production systems, specifically in the process of secondary recovery. It is used to inhibit the growth of algae and bacteria in oil production systems, which can cause problems such as scaling, slime, and odor.

PETROLEUM SECONDARY RECOVERY

This product is effective in preventing the growth of algae and bacteria in oil production systems, specifically in the process of secondary recovery. It is used to inhibit the growth of algae and bacteria in oil production systems, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.

PIGMENT SLURRIES (non-paint), COATINGS (non-paint), NON-FOOD ADHESIVES, CAULKS AND SEALANTS

This product is effective in preventing the growth of algae and bacteria in pigment slurries, coatings, non-food adhesives, caulks, and sealants. It is used to inhibit the growth of algae and bacteria in these types of applications, which can cause problems such as scaling, slime, and odor.
