INDUSTRIAL REcirculATING WATER COOLING TOWERS: For the control of bacteria, algae and fungi, add Busan 1078 microbicide (1.26 to 7.46 lbs or 195 to 1,070 fluid ounces of Busan 1078 per 1,000 gallons of water in the system) to maintain a level of 100–400 ppm Busan 1078 microbicide (1.86 pounds or 4.5 to 28 fluid ounces of Busan 1078 per 1,000 pounds of water) in the system weekly or as needed to maintain control. See General Storage and Disposal below for further treatment advice.

AIR WASH SYSTEMS: Add to the air washer or mist chiller or washer, to insure uniform mixing. 35 to 88 lbs (5.0 to 12.5 kg) of 1.0% Busan 1078 microbicide is recommended in the system) for the system, depending upon the severity of contamination to control bacteria, fungi, and algae which cause fouling of water/air systems. (Use BUSAN 1078 CONCENTRATE OR BUSAN 1078 METHOD I – Initial Dose: When the system is just not noticeably fouled, apply 148 to 843 lbs (195 to 1,110 fluid ounces) of 1.0% Busan 1078 microbicide to the system for the first application. Repeat until control is achieved. Subsequent dose: 35 to 219 lbs (5.0 to 3.5 kg) 1.0% Busan 1078 microbicide to the system for the second application. Repeat until control is achieved. Busan 1078 microbicide is recommended as an in-container preservative for tackifiers derived from resin and hydrocarbon resins. Add 0.43–1.65 lbs of Busan 1078 microbicide (1.95–7.46 pounds or 150–570 fluid ounces active isothiazolone) to 1,000 lbs (454 kg) of fluid to provide 425 to 1,675 ppm active isothiazolone product (6.25 to 25 ppm active isothiazolones).

INDUSTRIAL REcirculATING CLOSED LOOP WATER COOling SYSTEMS: For the control of bacteria, algae, and fungi, and Busan 1078 microbicide to the reservoir, recirculating line, or some other part of the system in use at the rate of 0.43–1.65 lbs (1.95–7.46 pounds or 150–570 fluid ounces) of Busan 1078 microbicide (1.26 to 7.46 lbs or 195 to 1,110 fluid ounces of Busan 1078 per 1,000 gallons of water in the system). Repeat until control is achieved. Subsequent dose: 35 to 219 lbs (5.0 to 3.5 kg) 1.0% Busan 1078 microbicide to the system for the second application. Repeat until control is achieved. Busan 1078 microbicide is recommended as a preservative for tackifiers derived from resin and hydrocarbon resins. Add 0.43–1.65 lbs of Busan 1078 microbicide (1.95–7.46 pounds or 150–570 fluid ounces) to the fluid system (6.25 to 25 ppm active isothiazolones).

POLYMER LATEX PRESERVATION: Busan 1078 microbicide is recommended for the control of bacteria and fungi in latex polymerization. Add 0.26–3.3 lbs. (1.16–15.0 kg) of Busan 1078 microbicide (12.6–75.0 g) to each 1,000 lbs (454 kg) of fluid to provide 150 to 1500 ppm (2.5–25 ppm active isothiazolones).

NOTE TO PHYSICIAN

Inhalation ORAL INGESTION: Do not attempt to induce vomiting or administer anything by mouth to an unconscious person.

Skin: Take off contaminated clothing.

Symptoms: Skin irritation, respiratory distress.

Inhalation: Remove from exposure area. Supply fresh air and seek medical attention;

Treatment: Remove contaminated clothing. Wash skin thoroughly with soap and water for 15–20 minutes. Use a jet of water if possible. Do not attempt to remove clothing or呼叫 911 if an ambulance is needed. Do not give mouth-to-mouth resuscitation.

First Aid: Keep person calm and at rest. Keep warm. Do not give mouth-to-mouth resuscitation. DO NOT give anything to an unconscious person. Give equal quantities of water and milk. Avoid dormin and hot water. Keep and wash PPE separately from other laundry. Users should wash hands before eating, drinking, or using the toilet. Users should remove clothing immediately if pesticide gets inside. Apply this pesticide only as directed.

FIRST AID

Potentially dangerous only if ingested by a person who is not an adult or is in poor health. NO特別注意: Ordinary first aid and life support measures can be used. Do not attempt to cause vomiting. Only 16 oz. of fluid per person in 30 minutes, or 30 oz. of fluid in 2 hours. DO NOT give anything to a person if they are unconscious. If inhaled, flush eyes with water. If inhaled, give artificial respiration. Subsequent dose: 148 to 843 lbs (195–1,110 fluid ounces) of Busan 1078 microbicide to the system for the second application. Repeat until control is achieved. Busan 1078 microbicide is a preservative for water-based coatings such as paper coatings. Add 0.43–1.65 lbs. of Busan 1078 microbicide to the reservoir, recirculating line, or some other part of the water distribution system, or in-process water. (Use BUSAN 1078 METHOD II – Initial Dose: When the system is just not noticeably fouled, apply 148 to 843 lbs (195–1,110 fluid ounces) of 1.0% Busan 1078 microbicide to the system for the first application. Repeat until control is achieved. Busan 1078 microbicide is recommended as an in-container preservative for water-based coatings such as paper coatings. Add 0.43–1.65 lbs. of Busan 1078 microbicide to the reservoir, recirculating line, or some other part of the water distribution system. (Use BUSAN 1078 METHOD III – Initial Dose: When the system is just noticeably fouled, apply 148 to 843 lbs (195–1,110 fluid ounces) of 1.0% Busan 1078 microbicide to the system for the first application. Repeat until control is achieved. Busan 1078 microbicide is recommended as an in-container preservative for water-based coatings such as paper coatings. Add 0.43–1.65 lbs. of Busan 1078 microbicide to the reservoir, recirculating line, or some other part of the water distribution system. (Use BUSAN 1078 METHOD IV – Initial Dose: When the system is noticeably fouled, apply 148 to 843 lbs (195–1,110 fluid ounces) of 1.0% Busan 1078 microbicide to the system for the first application. Repeat until control is achieved. Busan 1078 microbicide is recommended as an in-container preservative for water-based coatings such as paper coatings. Add 0.43–1.65 lbs. of Busan 1078 microbicide to the reservoir, recirculating line, or some other part of the water distribution system.

INDUSTRIAL REcirculATING CLOSED LOOP WATER COOling SYSTEMS: For the control of bacteria, algae, and fungi, and Busan 1078 microbicide to the reservoir, recirculating line, or some other part of the system in use at the rate of 0.43–1.65 lbs (1.95–7.46 pounds or 150–570 fluid ounces) of Busan 1078 microbicide (1.26 to 7.46 lbs or 195 to 1,110 fluid ounces of Busan 1078 per 1,000 gallons of water in the system). Repeat until control is achieved. Subsequent dose: 35 to 219 lbs (5.0 to 3.5 kg) 1.0% Busan 1078 microbicide to the system for the second application. Repeat until control is achieved.
