UNITED 255

ONE-STEP DISINFECTANT GERMINICIDAL DETOXIFIER AND DEODORANT
Disinfectant Pseudomonas Staphylococcal Salmonellal Bacillus Fungicidal Mildewcide Virucidal

A multi-purpose, neutral pH, germincidal detoxifier and deodorant effective in high water up to 400 ppm (calculated as CaCO3) in the presence of a moderate amount of soil (0-20% of soil) according to U.S. A.O.C. Test. Disinfectants clean and deodorizes in one labor-saving step. Effective against the following pathogens:

- Bacilli
- Pseudomonas aeruginosa
- Staphylococcus aureus
- Salmonella cheerasaeus
- Actinobacteria caacooacetic
- Bordetella bronchiseptica
- Chlamydia psittaci
- Community Associated Methicillin Resistant Staphylococcus aureus - CA-MRSA (NR6384) (USA309)
- Community Associated Methicillin Resistant Staphylococcus aureus (NR6123) (USA400)
- Enterococci aerogenes
- Enterococcus cecaciae
- Enterococcus faecalis
- Vancomycin Resistant (VRE)
- Escherichia coli
- Fusobacterium necrophorum
- Klesermia pneumonia
- Listeria monocytogenes
- Pasteurella multocida
- Proteus mirabilis
- Proteus vulgaris
- Salmonella enterica
- Salmonella typhi
- Salmonella typhimurium
- Sorlidae marcescens
- Shigella flexneri
- Shigella sonnei
- Streptococcus aureus (MRSA) - Intermediate Resistant (VISA)
- Streptococcus pyogenes
- Streptococcus fecalis
- Streptococci pyogenes
- (Vizuses)
- Adenovirus Type 4
- Adenovirus Type 7, - 7.8 oz. per gal
- Hepatitis B Virus (HVB)
- Hepatitis C Virus (HVC)
- Hepatitis D Virus Type 1
- Hepatitis E Virus Type 2
- Human coronavirus
- HIV-1 (AIDS virus)
- Influenza A/Hong Kong
- Rabies (WA)
- Respiratory Syncytial Virus (RSV)
- Rubella (German Measles)
- SARS Associated Coronavirus (SARS) [cause of Severe Acute Respiratory Syndrome]
- Vaccina
- (Animal viruses)
- (Animal influenza A)
- (Animal polyomavirus)
- (Canine distemper)
- (Feeline felovirus)
- (Felis feline)
- (Infectious bovine rhinotrachilitis)
- (Infectious bovine rhinotrachilitis)
- (Leptospira canicola)
- (Transmissible Gastroenteritis virus (TGE)
- (Fungi)
- (Aspergillus niger)
- Candida albicans
- (Trichophyton mentagrophytes)

ACTIVE INGREDIENTS:
Didecyl dimethyl ammonium chloride .................................................. 2.54% 
n-Alkyl (C10-50%, C40%, C10%) dimethyl benzyl ammonium chloride .................................................. 1.69% 
Inert Ingredients: .......................................................... 95.77% 
TOTAL: .......................................................... 100.00%

KEEP OUT OF REACH OF CHILDREN

(Via see panel for Precautionary Statements and First Aid)

SAFE USE INSTRUCTIONS:
1. Avoid all animals and feeds from premises, trucks, coops, and enclosures.
2. Remove all litter and manure from floor, walls, and surfaces of eating areas, stables, barns, vehicles, and other facilities and fixtures occupied or traversed by animals.
3. Empty all troughs, nicks, and other feeding and watering apparatus.
4. Thoroughly clean all surfaces with soap or detergent, then rinse with water.

For use in hospitals, nursing homes, schools, colleges, commercial and industrial institutions, office buildings, vehicles, animal and human skin disorders, livestock, poultry, and meat establishments, equine farms, tack shops, pet shops, airports, kennels, hotels, motels, poultry farms, turkey farms, dairy farms, hog farms, breeding establishments, grooming companies, feedlots, hotels, and hostels.

Clean, and deodorizes the following hard, nonporous, inanimate surfaces: floors, walls (non-medical), metal surfaces (non-medical), stainless steel surfaces, glazed porcelain, plastic surfaces (such as polypropylene, polyethylene, acrylic, etc.).

Use to clean and disinfect nonporous athletic mats, wrestling mats, gymnastic mats, exercise equipment and training tables.

DIRECTIONS FOR USE
1. No product is to be used on medical device surfaces.

DISSOLUTION / CLEANING / DEODORIZING DIRECTIONS: Remove heavy soil deposits from surface, then thoroughly wet surface with a use-solution of 2 ounces of the concentrate per gallon of warm water. (Use 8 oz per gallon of water to kill Adenovirus Type 7). The use-solution can be applied with a cloth, sponge, or commercial solution in sets. For spray applications, use a coarse spray device. Spray 6-8 inches from the surface, rub with brush, cloth or sponge. Do not breathe spray. Let solution remain on surface for a minimum of 10 minutes. Rinse or allow to air dry. Residence of foam is not necessary unless they are to be waxed or polished. Food contact surfaces must be thoroughly rinsed with potable water. This product must not to be used to clean the following food contact surfaces: utensils, glassware and dishes. BACTERIAL STABILITY OF USE-SOLUTION: Prepare a fresh use-solution daily or more often if the solution becomes visibly dirty or diluted.

TOILET BOWLS: Swab bowl with brush to remove heavy soil prior to cleaning or disinfecting. Clean by applying use-solution around the bowl and up and under the rim. Sootbombs may require brushing to dislodge, first to remove heavy soil, then remove or open up the inner lip of the residual bowl water. Four in three ounces of the use-solution in bowl. Swab the bowl completely using a brush or sponge, or a nylon or plastic, and allow to air dry. Apply use-solution of 2 ounces per gallon of water with a cloth, mop, sponge or coarse spray. Make sure to wet all surfaces completely. Let air dry. Reposition application weekly or when growth reappears.

MILDWEED INSTRUCTIONS: Effectively control the growth of mildew and mold, plus the odor. Inhogeneousd materials such as wood, paper, metal, plastic, and similar materials, such as walls, floors, and tables tops. Apply use-solution of 2 ounces per gallon of water with a cloth, mop, or coarse spray. Make sure to wet all surfaces completely. Let air dry. Reposition application weekly or when growth reappears.

RELIEF (AIDS VIRUS) AND IVDR (HEPATITIS B AND IVDR (HEPATITIS C VIRUS) ON SURFACE OR ENVIRONMENTAL SURFACES / OBJECTS PREVIOUSLY SOILED WITH BLOOD / BODYFLUIDS in health care settings or settings in which there is an expected likelihood of soiling of inanimate surfaces/object with blood/body fluids, and in which the surface/droplets/leakage contact the blood/body fluids can therefore be considered with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) or Hepatitis B Virus (HBV) or Hepatitis C Virus (HCV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTOAMINATION AGAINST HIV-1 (AIDS virus) OR HBV OR HCV OF SURFACE/OBJECTS SOILED WITH BLOOD/BODYFLUIDS:

Personal Protection: Disposable protective gloves, gowns, face masks, or eye coverings as appropriate, must be worn during all cleaning of blood/body fluids and during decontamination procedures.

Cleaning Procedure: Blood and body fluids must be thoroughly cleaned from surfaces/objects before application of disinfectant.

Contact Time: HIV-1 (AIDS virus) is inactivated after a contact time of 4 minutes at 25°C (77°F) room temperature. HBV and HCV are inactivated after a 10 minute contact time. Use 1-minute contact time for other viruses, fungi, and bactericidal.

Disposal of Infectious Materials: Blood/body fluids should be autodisinfected and disposed of according to federal, state, and local regulations for infectious waste disposal.

Cleansing OF BODIES SURFACES AND BODIES ORIFICES OF HUMAN REMAINS: This product removes body secretions, soil, and blood, along with their accompanying macromolecular, from the surfaces and body cavities of hearts in the absence of a sponge or washcloth, bath the entire body with a use-solution of 2 ounces of water per gallon of warm water. (Use 8 oz per gallon of water to kill Adenovirus Type 7). A soft brush may be employed on surfaces and hair to remove debris. Use fresh solution for each (cadaver) remains or when solution becomes visibly dirty or diluted.

FARM PREMISES, LIVESTOCK, POULTRY & TURKEY HOUSE DISINFECTANT

DISSOLUTION: 2 ounces per gallon of water

- Use 8 oz per gallon of water to kill Adenovirus Type 7.
- Remove all animals and feeds from premises, trucks, coops, and enclosures.
- Remove all litter and manure from floor, walls, and surfaces of eating areas, stables, barns, vehicles, and other facilities and fixtures occupied or traversed by animals.
- Empty all troughs, nicks, and other feeding and watering apparatus.
- Thoroughly clean all surfaces with soap or detergent, then rinse with water.
